Reading The Rocks:

Reading the Rocks Marcia Bjornerud, 2008-07-31 To many of us the Earth's crust is a relic of ancient unknowable history. But to a geologist, stones are richly illustrated narratives telling gothic tales of cataclysm and reincarnation. For more than four billion years in beach sand, granite, and garnet schists, the planet has kept a rich and idiosyncratic journal of its past. Fulbright Scholar Marcia Bjornerud takes the reader along on an eye-opening tour of Deep Time, explaining in elegant prose what we see and feel beneath our feet. Both scientist and storyteller, Bjornerud uses anecdotes and metaphors to remind us that our home is a living thing with lessons to teach. Containing a glossary and detailed timescale as well as vivid descriptions and historic accounts, **Reading the Rocks** is literally a history of the world for all friends of the Earth.

Reading the Rocks Marcia Bjornerud, 2005-04-26 To many of us, the Earth's crust is a relic of ancient unknowable history. But to a geologist, stones are richly illustrated narratives telling gothic tales of cataclysm and reincarnation. For more than four billion years in beach sand, granite, and garnet schists, the planet has kept a rich and idiosyncratic journal of its past. Fulbright Scholar Marcia Bjornerud takes the reader along on an eye-opening tour of Deep Time, explaining in elegant prose what we see and feel beneath our feet. Both scientist and storyteller, Bjornerud uses anecdotes and metaphors to remind us that our home is a living thing with lessons to teach. She shows how our planet has long maintained a delicate balance and how the global give and take has sustained life on Earth through numerous upheavals. But with the rapidly escalating effects of human beings on their home planet, that cosmic balance is being threatened, and the consequences may be catastrophic. Containing a glossary and detailed timescale as well as vivid descriptions and historic accounts, **Reading the Rocks** is literally a history of the world for all friends of the Earth.

Reading the Rocks Brenda Maddox, 2017-11-21 A rich and exuberant group biography of the early geologists, the people who were first to excavate from the layers of the world its buried history. The birth of geology was fostered initially by gentlemen whose wealth supported their interests, but in the nineteenth century it was advanced by clergymen, academics, and women whose findings expanded the field. **Reading the Rocks** brings to life this eclectic cast of characters who brought passion, eccentricity, and towering intellect to the discovery of how Earth was formed. Geology opened a window on the planet's ancient past. Contrary to the Book of Genesis, the rocks and fossils dug up showed that Earth was immeasurably old. Moreover, fossil evidence revealed progressive changes in life forms. It is no coincidence that Charles Darwin was a keen geologist. Acclaimed biographer and science writer Brenda Maddox's story goes beyond William Smith, the father of English geology; Charles Lyell, the father of modern geology; and James Hutton, whose analysis of rock layers unveiled what is now called deep time. She also explores the lives of fossil hunter Mary Anning, the Reverend William Buckland, Darwin, and many others, their triumphs and disappointments, and the theological, philosophical, and scientific debates their findings provoked. **Reading the Rocks** illustrates in absorbing and revelatory details how this group of early geologists changed irrevocably our understanding of the world.

Reading the Archive of Earth's Oxygenation Victor Melezhik, Anthony R.

Prave,Anthony E. Fallick, Lee R. Kump, Harald Strauss, Aivo Lepland, Eero J. Hanski, 2012-10-22 Earth's present day environments are the outcome of a 4.5 billion year period of evolution reflecting the interaction of global scale geological and biological processes punctuated by several extraordinary events and episodes that perturbed the entire Earth system. One of the earliest and arguably greatest of these events was a substantial increase orders of magnitude in the atmospheric oxygen abundance sometimes referred to as the Great Oxidation Event. Volume 1: The Palaeoproterozoic of Fennoscandia as Context for the Fennoscandian Arctic Russia Drilling Earth Project describes the implementation of the FAR DEEP drilling project in Arctic Russia. It summarises the knowledge of more than 50 years of largely Russian led fieldwork information hitherto virtually unavailable in the west and provides geological description of drilling areas with an overwhelming illustration of rocks by high quality representative photographs. The volume offers a comprehensive review and rich photo illustration of palaeotectonic, palaeogeographic and magmatic evolution of the Fennoscandian Shield in the early Palaeoproterozoic and links the evolution of the shield to the emergence of an aerobic Earth system. The volume unfolds the event based Fennoscandian chronostratigraphy and discusses the chronology of the Palaeoproterozoic global events as the base for a new subdivision of Palaeoproterozoic time. Welcome to the illustrative journey through one of the most exciting periods of planet Earth.

Literary Reading, Cognition and Emotion Michael Burke, 2010-10-18 This work seeks to chart what happens in the embodied minds of engaged readers when they read literature Despite the recent stylistic linguistic and cognitive advances that have been made in text processing methodology and practice very little is known about this cultural cognitive process and especially about the role that emotion plays Burk s theoretical and empirical study focuses on three central issues the role emotions play in a core cognitive event like literary text processing the kinds of bottom up and top down inputs most prominently involved in the literary reading process and what might be happening in the minds and bodies of engaged readers when they experience intense or heightened emotions a phenomenon sometimes labelled reader epiphany This study postulates that there is a free flow of bottom up and top down affective cognitive inputs during the engaged act of literary reading and that reading does not necessarily begin or end when our eyes apprehend the words on the page Burke argues that the literary reading human mind might best be considered both figuratively and literally not as computational or mechanical but as oceanic
