I have new software, which is fun but difficult to use

I have new software on my computer. It is called "Google Sketchup". Even though it is called "Google Sketchup", it is made by a company called Trimble. Do you know that software? Have you ever used design software? At first, I thought it was another C.A.D. Program. That's because it looks similar. However, the rules are different.

Sometimes it is really easy to use, and sometimes it becomes quite hard. It depends on what you are doing with it. I don't use it seriously – it is just a hobby for me at the moment. I have tried to design a boat. My first boat was a failure. It looked OK, but because there are many things about the software that I don't understand yet, it was not constructed properly, and I was unable to work on its surfaces. I was disappointed, as it took several hours to make it, but I did not give up. Now I have made another boat, and this time I have thought about my previous mistakes while building this second boat. It is not perfect, but is certainly better than the first attempt. It is not complete yet, and I have not decided what style to use, but at the moment I think I want to make it into a Viking style boat, with a high front and a mast and sails. I am not very good at doing maths in my head, and not very good at geometry, so it takes me a long time to think about design changes, angles, surfaces and structure. However, the software does the work for me most of the time. I just have fun, and I often click the "undo" icon because I don't like the result of the changes that I have tried to make. Why don't you try Sketchup? There is a free version, which has fewer tools than the professional version, but it great fun.

**Reading Comprehension in Polish and English** Monika Kusiak, 2013-06-01 This book is about reading Throughout the book the author explains the complexity of the dual language involvement of FL L2 reading by showing how L1 and FL L2 factors interplay in FL L2 reading The main aim of the book is to

explore reading in English in the foreign second language context as a cross linguistic phenomenon and to present the results of a think aloud study which investigated reading in Polish as the L1 and English as the FL of Polish learners of English. The project consisted of six stages each focussing on a different aspect of reading. Thus the following was explored: reading strategies, problems and solutions, the way the subjects constructed their representations of the texts, the students' individual patterns of developing comprehension and effectiveness in identifying the main ideas. The findings revealed both differences and similarities between the subjects reading in Polish and their reading in English. The book offers implications for further research and elucidates the usefulness of think aloud protocols in foreign language instruction.
