Burnside, Simone Pulver, Kathryn J. Fiorella, Meghan L. Avolio, Steven M. Alexander, 2022-12-08 This anthology convenes 53 foundational readings that showcase the rich history of socio environmental research from the late 1700s onwards The introduction orients readers to the topic and how it has evolved and describes how to best use the book The original readings are organised into six sections documenting the emergence of socio environmental research first as a shared concern and then as a topic of specific interest to anthropology and geography economics sociology and political science ecology ethics religious studies and history and technology energy and materials A noted scholar introduces each section putting the readings into historical and intellectual context The conclusion links the legacy readings to contemporary approaches to socio environmental research and discusses how these links can enrich the reader s understanding and work Invaluable to students instructors and researchers alike this canonical reference illuminates underappreciated linkages across research domains and creates a shared basis for dialogue and collaboration

Rational Readings on Environmental Concerns Jay H. Lehr, 1992-08-04 the proof of man s destruction of the environment is consistently flawed the scientific method is being abused and ignored The errors are not random however but are systematically biased toward attempting to prove the guilt of man in the alleged destruction of the planet Objective science is disappearing and is being replaced by the pursuit of a philosophical agenda Richard F Sanford in *Environmentalism and the Assault on Reason* Chapter 1 The public has numerous misconceptions about the relationship between environmental pollution and human cancer Underlying these misconceptions is an erroneous belief that nature is benign Bruce N Ames Ph D and Lois Swirsky Gold Ph D in *Environmental Pollution and Cancer Some Misconceptions* Chapter 7 Greenhouse gases have been increasing in the atmosphere largely as a result of human activities However the climate record does not show the temperature increase and other telltale signs of the expected greenhouse effect The mathematical models used for predicting such effects are evidently not complete enough to encompass all of the relevant physical processes in the atmosphere thus throwing grave doubt on the drastic warming hypothesized for the next century S Fred Singer in *Global Climate Change Facts and Fiction* Chapter 13 There is now no prima facie case for any expensive policy of safeguarding species without more extensive analysis than has so far been done Julian L Simon in *Disappearing Species Deforestation and Data* Chapter 26
