Hoover, 1975 The monograph consists of an examination of the rationale for higher police educational standards a report of research relevant to the impact of upgrading efforts a critique of current educational programming and the explication of a model criminal justice curriculum appropriate for both police and other criminal justice system personnel Three distinct but related rationales are developed relevant to educational upgrading The rationales involve police ability to control crime perform their order maintenance function and properly exercise discretion The research reported includes an assessment of current police recruit educational levels patterns of employment of collegiate recruits the impact of the Law Enforcement Education Program police cadet programs and agency reward programs the influence of agency characteristics in attracting and retaining collegiate recruits and the impact of the development of educational programs in law enforcement and criminal justice An examination of present educational programming postulates several major deficiencies A model curriculum is proposed which provides a broad theoretical orientation to the entire criminal justice process The model consists of guidelines for twenty criminal justice courses Each guideline includes both selected related readings and a content outline **Forensic Evidence and the Police** Joseph L. Improving the Use of Quality Circles in Police Departments Harry P. Hatry, 1986 This report examines the practical issues that police departments face when considering the adoption design and implementation of quality circle programs in which small groups of employees primarily nonmanagement personnel from the same work unit meet regularly to identify analyze and recommend solutions to problems confronting their work unit This book reports on a 2 year 1983 and 1984 study of quality circles that involved a relevant literature review a mail survey of police departments telephone interviews with department personnel responsible for quality circles a review of materials and onsite field work The study resulted in indications of the likely outcomes of police quality circles and information about specific ways to better apply quality circles and similar employee participation programs in police departments The study concludes that the use of quality circles in police departments has the potential to achieve a number of small scale service improvements in work units that use them The effective use of quality circles however requires modest expenditures for training overtime pay and other activities of quality circles There is no evidence to date that quality circles produce any major improvements in service delivery or productivity The circles have typically focused on improving working conditions and the resolution of relatively minor narrowly focused operating problems Absent continuing maintenance of the circles and the identification of issues that impact employees work quality circles tend to deteriorate after a year or two The long term survival of quality circles

depends on voluntary participation a motivated facilitator who is given time to devote to the circle s operation and explicit support and recognition from upper management Detailed recommendations are offered for the development and maintenance of quality circles so they can fulfill their potential for improving work unit operations and employee morale 24 notes and 101 references *Law Enforcement Operations and Management* Marilyn D. European Journal of Policing Studies ,2018-07-31 Contents Introduction Antoinette Verhage Lieselot Bisschop and Wim Hardyns br Articles How to Police a Porous Fortress Monica den Boer 1 Abstract The purpose of this article is to provide an overview of the way in which the European Union has gradually but steadily built a security architecture based on the control of mobility and borders Different logics of policing are interwoven in several projects which are strongly interdependent with technological innovation Furthermore the European policing of mobility is primarily performed by mounting surveillance both inside and beyond European borders by means of which all forms of movement transactions travelling etc are subjected to intensive monitoring by multiple actors who are interlinked through strategies and systems The main finding is that border policing is shifting in a fundamental way from fixed to fluid from territorial to virtual and from physical to technological Hence paradoxically though mobility is strongly promoted as one of the main virtues of the European Union Europe s precautionary protection may be at ill ease with the free movement of people The article seeks to stimulate the knowledge and debate about deeper shifts in Europe s security apparatus and develops this from a law enforcement perspective Keywords Europe borders security mobility technology 1 Academic Dean at the Police Academy of The Netherlands Member of the Committee on European Integration of the Advisory Council on International Affairs and Visiting Professor at the College of Europe in Bruges Police Science in Germany History and New Perspectives Joachim Kersten 1 and Ansgar Burchard 2 Abstract In the German speaking academic world Police Science Polizeiwissenschaft is a fairly new and little known area of social science Accordingly the academic status of police science is anything but firmly established but rather at a hybrid stage of development The very combination of policing and academic study research seems to remain largely incompatible not only to police managers but also to main stream sociology German police science differs substantially from the Anglo American Australian approach One main difference pertains to legal traditions others are due to historical and cultural developments that will be taken up in this descriptive essay However Anglo American Australian police theories have a lot to offer to German and European police scientists and this will be demonstrated For a future common approach to an evolving European police science similar descriptions will be required from other European countries to establish a comparative foundation of joint EU police studies Some of the principal dimensions of such a comparison will be sketched in this essay It concludes with a presentation of empirically based police studies carried out by instructors and Master students at the newly founded German Police University in M nster Topics are media coverage of clashes between police and demonstrators a typology of third party intervention in cases of assault in public places and COREPOL EU FP7 a

Psychology and Policing Neil Brewer, Carlene Wilson, 2013-06-17 Psychological theory and research have much to contribute to the knowledge and skill bases underlying effective policing Much of the relevant information however is dispersed across a variety of different psychological and criminal justice policing journals and seldom integrated for those applied psychologists interested in policing issues or for police policymakers administrators and others working in the criminal justice area who are not familiar with the psychological literature Designed to accommodate the needs of these different groups this book addresses both operational policing issues and issues relevant to the improvement of organizational functioning by providing integrative reviews of psychological theory and research that deal with effective policing It illustrates how the theory and research reviewed are relevant to specific policing practices These include eyewitness testimony conflict resolution changing driver behavior controlling criminal behavior effective interviewing and techniques of face reconstruction The volume's readable style makes it accessible to a diverse audience including undergraduate and postgraduate students in forensic organizational applied psychology criminal justice and police science programs and police administrators and policymakers It will also interest psychologists whose primary focus includes policing and criminal justice issues The book should draw attention to the often unrecognized and valuable contribution that mainstream psychology can make to the knowledge base underpinning a wide variety of policing practices
