Readings In Global History V1 2nd:

The World that Trade Created Kenneth Pomeranz, Steven Topik, 2006 Why are railroad tracks separated by the same four feet eight inches as ancient Roman roads How did 19th century Europeans turn mountains of bird excrement from Peru into mountains of gold The answers to these tantalizing questions and dozens more will be revealed *Lifelines from Our Past* L. S. Stavrianos, 2015-03-04 This book offers an extraordinary interpretation of world history from the paleolithic era to the present Renowned historian L S Stavrianos conceptualizes human history into three categories kinship societies tributary societies and capitalist societies In each he discerns and studies four life line issues ecology gender relations social relations and war that encompass the broadest areas of human experience The revised edition projects forward to the twenty first century offering the author s views on possible future scenarios involving the same lifeline issues **World History**, 1998

A History of the Laws of War: Volume 1 Alexander Gillespie, 2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations

together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself **World Civilizations** Peter N. Stearns,1999-10 The primary goal of World Civilizations The Global Experience Third Edition is to present a truly global history one that both discusses the development of the world s leading civilizations and also emphasizes the major stages in the interactions among different peoples and societies The book examines all the world s civilizations including those in the Western tradition but also those civilizations sometimes neglected in world history texts for example the nomadic societies of Asia Latin America and the nations and states of the Pacific Rim World Civilizations balances this discussion of independent developments in all the world s major civilizations with comparative analysis of the results of international contact MARKET Appropriate for anyone interested in World History **The Cambridge Global History of Fashion: Volume 1** Christopher Breward,Beverly Lemire,Giorgio Riello,2023-08-17 Explores how the long history of fashion from antiquity to c 1800 created global networks and animated world communities **Encyclopedia of Global Warming and Climate Change, Second Edition** S. George Philander,2012-06-13 The First Edition of the Encyclopedia of Global Warming and Climate Change provided a multi authored academic yet non technical resource for students and teachers to understand the importance of global warming to appreciate the effects of human activity and greenhouse gases around the world and to learn the history of climate change and the research enterprise examining it This edition was well received with notable reviews Since its publication the debate over the advent of global warming at least partially brought on by human enterprise has continued to ebb and flow depending literally on the weather politics and media coverage of climate summits and debates Advances in research also change the discourse as new data is collected and new scientific projects continue to explore and explain global warming and climate change Thus a new Second Edition updates more than half of the original entries and adds new perspectives and content to keep students and researchers up to date in a field that has proven provocatively lively *Reading from This Place, Volume 1* Fernando F. Segovia,Mary Ann Tolbert, How does one s life situation shape one s reading of the Bible In this landmark volume Segovia Tolbert and their 15 other contributors measure the impact of social location on the theory and practice of biblical interpretation Reading From This Place helps readers come to terms with the interpretive revolution sweeping through biblical studies *The Chautauquan* ,1884 *Research in Education* ,1968 *The Cambridge World History: Volume 1, Introducing World History, to 10,000 BCE* David Christian,2015-04-09 Volume 1 of the Cambridge World History is an introduction to both the discipline of world history and the earliest phases of world history up to 10 000 BCE In Part I leading scholars outline the approaches methods and themes that have shaped and defined world history scholarship across the world and right up to the present day Chapters examine
