Readings in Sociology Brigitte Berger,1974 **The Individualization of Chinese Society** Yunxiang Yan,2020-08-19 Chinese society has seen phenomenal change in the last 30 years Two of the most profound changes have been the rise of the individual in both public and private spheres and the consequent individualization of Chinese society itself Yet despite China s recent dramatic entrance into global politics and economics neither of these significant shifts has been fully analysed China may indeed present an alternative model of social transformation in the age of globalisation so its path to development may have particular implications for the developing world The Individualization of Chinese Society reveals how individual agency has been on the rise since the 1970s and how this has impacted on everyday life and Chinese society more broadly The book presents a wide range of detailed case studies on the impact of economic policy patterns of kinship changes in marriage relations and the socio economic position of women the development of youth culture the politics of consumerism and shifting power relations in everyday life *Studies in the Sociology of Sport* North American Society for the Sociology of Sport. Hamm,1987-03-09 More than 450 years after their birth in the Anabaptist movement 125 years after their secession from Russian Mennonitism and 60 years after their immigration to Canada the Mennonite Brethren exhibit specific and measurable signs of sectarian viability and religious vitality To explain the persistence of the sect Hamm analyses the process of sacralization within the Canadian Mennonite Brethren Church which safeguards identity a system of meaning or a definition of reality and the process of secularization which erodes boundaries dislodges stable structures and destroys identity It is an oversimplification the author argues to insist that the factors of continuity ethical and cognitive norms family solidarity ethnicity worship evangelism community and church structures and service agencies are solely integrative and that the factors of change urbanization education occupational change and economic affluence are solely disruptive Instead a complex dialectic between the two processes is at work that prevents

restrictive rigidity within the sect and excessive accommodation to the host society According to the author this analysis of the Canadian Mennonite Brethren becomes a case study to test the utility of an identity theory of religion which hinges on the integration differentiation dialectic It is at the same time a serious self study in religious sociology by which the author seeks to gain a better understanding of the processes of growth and decline of continuity and change and of the ongoing tension resulting from the religious movement s confrontation with society

Library of Congress Catalogs Library of Congress,1976 **Paperbound Books in Print** ,1984 *The Aging Experience* Cherry Russell,2024-05-10

Local writing on the subject of old age had tended to a fairly uniform approach focusing on empirical studies of old age as a social problem using census and survey type data Little attention had been paid to theory development Originally published in 1981 this book provides an in depth study of how old age was experienced in contemporary Australian society at the time It was the first major piece of original research on aging to be published in Australia and in several important senses represented a clear departure from the mainstream of Australian gerontology The Aging Experience links original in depth data to a broad theoretical framework Working from the premise that old age is a devalued status it examines the implications of this for the personal experience and interpersonal relations of elderly people Through detailed case studies of elderly Australians their interaction with family age peers and welfare services are described The analysis concentrates less on the overt characteristics of these relationships and their material functions than on their symbolic content and meaning for the participants Thus the study moves beyond conventional statistical documentation of the problems of old age to a sharper delineation of aging as a lived experience It is an approach which offers new perspectives and challenges many of the assumptions underlying previous research
