Feldman, 2017-12-28 This book is premised on a very powerful social educational concern about college retention rates one third of first year students seriously consider leaving college during their first term and only half of all students who start college ultimately graduate This book examines the first year of college from a variety of perspectives to paint a comprehensive picture of the intersecting challenges facing today's students and higher education institutions Technological advances increases in college attendance costs and increasing political pressure on colleges to prove their value have changed the landscape of the first year of college but researchers have identified new approaches to improve student and institutional success that have shown considerable success and promise In this comprehensive volume top educational researchers explore topics of student success persistence and retention in the first year of college **College Made Whole** Chris W. Gallagher, 2019-09-24 How can universities shape creative adaptive integrated learners ready to confront the world This book's clear eyed optimism is a challenge to everyone in higher education American higher education is being torn apart Institutions curricula courses and faculty roles are being unbundled broken into constituent parts in the name of efficiency and cost savings As a result the college learning experience is fragmented and incoherent leaving graduates less and less equipped to confront the dire social problems that cause those divisions in the first place In *College Made Whole* Chris W Gallagher lays bare the dangers of the dis integration of the college experience and shows how we can put higher education back together again The successful colleges and universities of the future Gallagher argues will be integrated coherently and cohesively designed to help students achieve a lifelong learning experience that is more than the sum of its parts Pushing back against pernicious dichotomies that frame much discussion of US higher education Gallagher critiques many of the hottest educational trends including the overhyping of technological solutions rampant adjunctification the promotion of nondegree credentials as a suitable replacement for college degrees and the increasingly narrow focus on the vocational aims of a college education Investigating the purposes of higher education historically and today he suggests audacious proposals to enhance learning including reorganizing institutions reordering institutional priorities redesigning curricula and courses and rethinking edtech and learning technologies Lucidly

written and packed with practical recommendations and real student stories College Made Whole will challenge higher education professionals and policy makers as well as anyone with a stake in the future of US higher education which is to say all of us who inhabit this fragile planet      The College Affordability Crisis Laurie Collier Hillstrom,2020-11-06 This volume provides a comprehensive and evenhanded overview of the escalating college affordability crisis in the United States It explains how higher education became so expensive and explores the implications of high college loan debt for students and American society The 21st Century Turning Point series is a one stop resource for understanding the people and events changing America today Each volume provides readers with a clear authoritative and unbiased understanding of a single issue or event that is driving national debate about our country s leaders institutions values and priorities This particular volume is devoted to the issue of the rising cost of higher education in the United States The expense of pursuing a college degree has become so high for so many students in fact that the country is experiencing what many educators economists parents and students describe as a college affordability crisis This work provides an accessible accurate account of the factors driving this trend including dramatic reductions in higher education spending by states for profit colleges predatory unscrupulous and lightly regulated student loan service companies and spiraling spending by colleges and universities competing to attract students      *Selling Hope and College* Alex Posecznick,2017-04-25 It has long been assumed that college admission should be a simple matter of sorting students according to merit with the best heading off to the Ivy League and highly ranked liberal arts colleges and the rest falling naturally into their rightful places Admission to selective institutions where extremely fine distinctions are made is characterized by heated public debates about whether standardized exams high school transcripts essays recommendation letters or interviews best indicate which prospective students are worthy And then there is college for everyone else But what goes into less selective college admissions in an era when everyone feels compelled to go regardless of preparation or life goals Ravenwood College where Alex Posecznick spent a year doing ethnographic research was a small private nonprofit institution dedicated to social justice and serving traditionally underprepared students from underrepresented minority groups To survive in the higher education marketplace the college had to operate like a business and negotiate complex categories of merit while painting a hopeful picture of the future for its applicants *Selling Hope and College* is a snapshot of a particular type of institution as it goes about the business of producing itself and justifying its place in the market Admissions staff members were burdened by low enrollments and worked tirelessly to fill empty seats even as they held on to the institution s special spirit Posecznick documents what it takes to keep a mediocre institution open and running and the struggles tensions and battles that members of the community tangle with daily as they carefully walk the line between empowering marginalized students and exploiting them
