Real Dreams:

Real dreams are actions of the true Self Helena Petrovna Blavatsky, 2018-01-03 Dreams are images of hopes and fears Somnambulism premonitions and second sight are a disposition energised by the power of the imagination to perceive and guess by intuition reflections from the Astral Light In sense dreams the mind is always asleep The sensual tendencies of the dreamer are readily impressed by pictures from the Astral Light and thus the direction of such dreams is always towards the animal plane We should therefore train ourselves to wake up when a sense dream occurs and the instantaneous rejection of impure thoughts during the period of waking consciousness will tend to set up a habit of rejection which will act automatically in sleep There is no simple answer to the question what is it that dreams for it depends entirely on each individual what principle will be the chief motor in dreams and whether they will be remembered or forgotten When the material man dreams all he sees with his eyes shut and in or through his mind is of course subjective But the Inner Man who is the silent spectator of the life of the dreamer all he sees is as objective as he is himself to himself The dream state is common not only to all men but also to all animals from the highest mammalia to the smallest birds and even insects Every being endowed with a physical brain or organs approximating thereto must dream Human dreams do not differ much from those of the animals But that which is entirely terra incognita for science is the real dreams and experiences of the immortal Ego overshadowing mortal man which thinks and acts independently of the physical body What we often regard as dreams or idle fancies may be stray pages torn out from the life and experiences of the Inner Man the dim recollection of which at the moment of awakening becomes more or less distorted by our physical memory Every night when the Inner Man is freed from the trammels of matter he lives a separate life within his prison of clay But the outer man cannot be conscious of the Inner Man for his brain and thinking apparatus are paralyzed more or less completely Ordinary dreams are caused by sensuously desirous consciousness awakened into chaotic activity by the slumbering reminiscences of the lower mind The combined action of desires and animal soul is purely mechanical It is instinct not reason which is active in them But as a rule our memory registers only the fugitive and distorted impressions which the brain receives at the moment of awakening Among the vast number of meaningless dreams there are some in which presages are given of coming events When such dreams come true they may be termed prophetic In the case of individuals who have truly prophetic dreams it is because their physical brains and memory are in closer relation and sympathy with their Higher Ego than in the generality of men The Adept however does not dream he just paralyzes his lower self during sleep and becomes perfectly free Dreams are illusions and the Adept is beyond illusion Imagination is the best guide of our blind senses We see through our imagination and that is the natural aspect of the miracle But we also see actual and true things and it is in this that lies the marvel of the natural phenomenon Those of a nervous temperament whose sight is weak and imagination vivid are the fittest persons for this kind of divination The stronger the spirituality of the dreamer the easier it will be for the Higher Ego to impress on the brain a

vivid picture of the dream In the materialistic man in one whose proclivities and passions have severed his astral soul from her spiritual counterpart and master in him whose labour has so worn out the body as to render him temporarily insensible to the voice of his soul such persons rarely if ever will have any dreams at all On the other hand highly spiritual people will see visions and dreams when asleep and even in their hours of wakefulness Messages sent by one soul to another are perceived as premonitions dreams and visions Facts are generally inverted in dreams and this can be explained by the law of introverted mental vision The Higher Ego does not think as its evanescent personality does Its thoughts are vivid pictures and visions of past and future scenes of wonderful living acts and heroic deeds which are all present in the eternal now even as they were when speech expressed in sounds did not exist when thoughts were things and men did not need to express them in speeches for they instantly realised themselves in action by the power of Kriyashakti that mysterious power which transforms instantaneously ideas into visible forms In persons of a very materialistic mind because the Ego is so trammelled by matter it can hardly give all its attention to one s actions even though the latter may commit sins for which that Ego will have to suffer conjointly in future True dreams being actions of the Higher Ego they produce effects which are recorded on their own plane Ordinary dreams by and large are the waking and hazy recollections of such actions Between the inner man and the physical brain there is a kind of conscious telegraphic communication going on incessantly day and night When the brain is asleep the physical memory and imagination are also asleep and all cognitive functions are at rest Our mundane life is a dream to the Higher Ego while the inner life or what we call the dream plane is the real life for it The will of the common man is dormant in dreams and therefore inactive A sick person especially just before death is very likely to see in dream or vision those whom he loves and is continually thinking of and so also is a person awake but intensely thinking of a person who is asleep at the time In cases of consumption or other emaciating diseases dreams become pleasant because the astral soul of the patient has begun detaching from the physical body and therefore becomes more clairvoyant in proportion As death approaches the body wastes away and ceases to be an impediment or barrier between the brain of the ailing man and his Higher Ego In Black Magic it is no rare thing to evoke the spirit of a sleeping person Thus the sorcerer may learn from the apparition any secret he chooses while the sleeper remains ignorant of what is going on A nightmare arises from oppression and difficulty in breathing and the latter will always create a feeling of oppression and a sensation of impending calamity By cultivating the power of dreaming clairvoyance is developed But only one s clairvoyant faculty aided by spiritual intuition can interpret one s dreams The only one who profits from a dream book is its author If you could remember your dreams in deep sleep when the spiritual consciousness is active you would be able to remember all your past incarnations That exalted state of remembrance is the Memory of the Heart and the capacity to impress itself on the brain so that it becomes part of its consciousness marks the opening of the Third Eye

Dreams and Dreaming in the Roman Empire Juliette Harrison,2013-07-04 The history and literature of the Roman Empire is full of reports of dream prophecies dream ghosts and dream gods This volume offers a fresh approach to the study of ancient dreams by asking not what the ancients dreamed or how they experienced dreaming but why the Romans considered dreams to be important and worthy of recording Dream reports from historical and imaginative literature from the high point of the Roman Empire the first two centuries AD are analysed as objects of cultural memory records of events of cultural significance that contribute to the formation of a group s cultural identity The book also introduces the term cultural imagination as a tool for thinking about ancient myth and religion and avoiding the question of belief which arises mainly from creed based religions The book s conclusion compares dream reports in the Classical world with modern attitudes towards dreams and dreaming identifying distinctive features of both the world of the Romans and our own culture

The Tel Quel Reader Patrick Ffrench,Roland-François Lack,1998 The Tel Quel Readerpresents for the first time in English many of the key essays that played an instrumental role in shaping the contours of literary and cultural debate in the 1960s and 1970s Tel Quelwas a French journal and publishing team that printed some of the earliest work by Derrida Bataille Kristeva Barthes Foucault and Deleuze From its beginning in 1960 to its closure in 1982 TQpublished some of the key essays of major poststructuralist thinkers The Readerincludes essays available in English for the first time by Kristeva and Foucault and a fascinating interview with Barthes It provides a unique insight into the poststructuralist movement and presents some of the

pioneering essays on literature and culture gender film semiotics and psychoanalysis Although articles included here cover diverse areas from the semiology of paragrams to the readability of Sade a common perspective runs through them the recognition of excess and the seduction of writing The Tel Quel Readerfills a crucial gap in the English literature on literary and cultural theory and presents a case for the enduring value of the journal's enterprise *Dreams in Greek Tragedy* George Devereux,1976-01-01 The Dream and the Text Carol Schreier Rupprecht,1993-07-01 This book partakes of a long tradition of dream interpretation but at the same time is unique in its cross cultural and interdisciplinary methods and in its mix of theoretical and analytical approaches It includes a great chronological and geographical range from ancient Sumeria to eighteenth century China medieval Hispanic dream poetry to Italian Renaissance dream theory Shakespeare to Nerval and from Dostoevsky through Emily Bront to Henry James Rupprecht also incorporates various critical orientations including archetypal comparative feminist historicist linguistic postmodern psychoanalytic religious reader response and self psychology *Dreams Beyond Time* Lee Irwin,2022-05-04 *Dreams Beyond Time* On Sacred Encounter and Spiritual Transformation offers readers an overview of dreams research as applied to non ordinary dreams Lee Irwin describes four basic types of dreaming normative mythic psychic and transpersonal and he illustrates each type with specific dream examples These types of dreaming are then used as a lens to look more closely at additional dream types that indicate dreaming as a process of creative discovery Through virtual dreaming encounters latent human potentials are revealed and suggest aspects for spiritual development based on dream recording interpretation and analysis In turn this leads to a metaphysical description that is pan sentient illustrating a vivid living universe of process becoming in which certain dream types reveal mythic psychic and transpersonal capacities as intrinsic to a deeper more awakened sense of intersubjective self awareness While dream theories from many diverse authors are explored the author uses an existential and phenomenological method to analyze dreaming contents in relationship to altered states of mind trance out of body and near death experience meditation imagination and stages of lucid self awareness Transpersonal dreams are given considerable attention in relationship to mystical traditions paranormal research and the comparative anthropology of self **Dreams & Reality** Simon S. Godfrey,2003 Dreaming is a universal phenomenon Nearly everybody dreams and is anxious to know what it means Perhaps no other human experience has aroused so much interest and curiosity as this alien visitation that forces itself upon us without warning during the dead of sleep Since antiquity thousands of books and articles have been written to shed some light on this mysterious and often unwelcome nightly visitor Despite tremendous work in this field the riddle remains unsolved Still no satisfactory answers have been provided to these basic questions Why do we dream What are dreams about Where do they come from How can we understand them This book is significantly different from those of others in this area as the answers presented are not the author's own views they are largely his dreams answers to the questions just posed Instead of speculation this author a psychologist by profession has put forward what his own dreams

have consistently and persistently revealed to him over the past thirty years Since 1973 he has recorded over 100 000 dreams filling some 230 journals of 200 pages each The length of the dreams varies greatly some consist of a single word or phrase others fill a page or more This book is written to share with others what the author has gained from his journey into the dreamworld and from his long and patient analysis of this vast number of dreams Three conclusions have been drawn from this investigation 1 Dreams are not caused by repressed sexual wishes somatic sources impressions of the preceding days or other mundane instigators as claimed by Freud and his followers 2 Dreams do have a supernatural source as pronounced by many writers through the ages and 3 Through dreams this supernatural source reveals to us who we really are brings to light who He is and invites us to lead our own lives sensibly and purposefully Using his own dreams as illustrations the author addresses a wide variety of topics relating to the domain of dreams including Are dreams a source of creativity Why do some of us have frequent nightmares Can we control the content of our dreams Why are dreams so cryptic How can we decipher our dream symbols to understand their meanings Do characters in our dreams refer to persons we know of or do they stand for components of our own identity How should we understand the verbal contents of our dreams Can dreams guide us as to how we should conduct our lives Is the reality we experience during our dreams more dependable or the one we experience in waking life The main purpose of the book is to elucidate that dreams are trustworthy teachers In the realm of growth and self discovery we must regard as suspect whatever we learn from others however wise and well meaning But whatever is conveyed to us directly through dreams is credible since it emanates from within us and is free from inconsistencies and adulterations Our major challenge is to understand the symbolic language used by the wise guide we have within

Dreams in French Literature Tom Conner, 2023-10-16 The nine essays in this volume deal with several well known French authors through the ages for example Descartes Voltaire Mme de Sta l Nerval Verlaine and explore the problematic relationship between dreams and literature Generally speaking contributors are interested in the production of literary meaning How does various dream material ranging from the traditional dream to visions and hallucinations and day dreams come to be And how is the dream image transformed into discourse What exactly is the relationship between dream and narrative Each essay focuses on a different author and different period ranging from the Middle Ages to the late nineteenth century but also takes a unique critical and theoretical approach What the contributors have in common though is an analytical sensemaking strategy that characterizes the interpretation of dreams through the ages from ancients such as Artemidorus and Cicero to modern thinkers such as Freud Most of the texts studied here from the Chanson de Roland to Chateaubriand s M moires d outre tombe lend themselves to this type of approach because they promote narrative unity So too do Voltaire Mme de Sta l Nerval and Verlaine Many if not most texts however in the end turn out to be not quite so tightly knit as one may have supposed at first and in the case of Agrippa d Aubign and Descartes the reader is in for several surprises when the normal course of events leading from dream to text from signifier to signified is interrupted and

Minds Without Fear Nalini Bhushan,Jay L. Garfield,2017 Minds Without Fear is an intellectual and cultural history of India during the period of British occupation It demonstrates that this was a period of renaissance in India in which philosophy both in the public sphere and in the Indian universities played a central role in the emergence of a distinctively Indian modernity This is also a history of Indian philosophy It demonstrates how the development of a secular philosophical voice facilitated the construction of modern Indian society and the consolidation of the nationalist movement Authors Nalini Bhushan and Jay Garfield explore the complex role of the English language in philosophical and nationalist discourse demonstrating both the anxieties that surrounded English and the processes that normalized it as an Indian vernacular and academic language Garfield and Bhushan attend to both Hindu and Muslim philosophers to public and academic intellectuals to artists and art critics and to national identity and nation building Also explored is the complex interactions between Indian and European thought during this period including the role of missionary teachers and the influence of foreign universities in the evolution of Indian philosophy This pattern of interaction although often disparaged as inauthentic is continuous with the cosmopolitanism that has always characterized the intellectual life of India and that the philosophy articulated during this period is a worthy continuation of the Indian philosophical tradition
