Science, Geopolitics

and Culture in the Polar Region Professor Sverker Sörlin,2013-10-28 Throughout the twentieth century glaciologists and

geophysicists from Denmark Norway and Sweden made important scientific contributions across the Arctic and Antarctic

This research was of acute security and policy interest during the Cold War as knowledge of the polar regions assumed military importance But scientists also helped make the polar regions Nordic spaces in a cultural and political sense with

scientists from Norden punching far above their weight in terms of population geographical size or economic activity This volume presents an image of Norden that stretches far beyond its conventional limits covering a vast area in the North

Atlantic and the Arctic Sea as well as parts of Antarctica Rich in resources scarce in population but critically important in

global and regional geopolitics these spaces were contested by major powers such as Russia the United States Canada and in the Antarctic Argentina Australia South Africa and others The empirical focus on Danish Norwegian and Swedish influence in

the polar regions during the twentieth century embraces a diverse array of themes from the role of science in policy and diplomacy to the tensions between nationalism and internationalism with clear relevance to the important role science plays

in contemporary discussions about Nordic engagement with the polar regions
