Beyond the World's End T. J. Demos, 2020-08-03 In *Beyond the World's End* T J Demos explores cultural practices that provide radical propositions for living in a world beset by environmental and political crises Rethinking relationships between aesthetics and an expanded political ecology that foregrounds just futurity Demos examines how contemporary artists are diversely addressing urgent themes including John Akomfrah's cinematic entanglements of racial capitalism with current environmental threats the visual politics of climate refugees in work by Forensic Architecture and Teddy Cruz and Fonna Forman and moving images of Afrofuturist climate justice in projects by Arthur Jafa and Martine Syms Demos considers video and mixed media art that responds to resource extraction in works by Angela Melitopoulos Allora Calzadilla and Ursula Biemann as well as the multispecies ecologies of Terike Haapoja and Public Studio Throughout Demos contends

that contemporary intersections of aesthetics and politics as exemplified in the Standing Rock NoDAPL campaign and the Zad's autonomous zone in France are creating the imaginaries that will be crucial to building a socially just and flourishing future *The World's Progress* Delphian Society,1913 **Flowing Adrenaline: Navigating the World's Best**

This unique richly illustrated account of the landforms and geology of the world's coasts presented in a country by country state by state sequence assembles a vast amount of data and images of an endangered and increasingly populated and developed landform. An international panel of 138 coastal experts provides information on what is where on each sector of coast together with explanations of the landforms their evolution and the changes taking place on them. As well as providing details on the coastal features of each country state or county the compendium can be used to determine the extent of particular features along the world's coasts and to investigate comparisons and contrasts between various world regions. With more than 1440 color illustrations and photos it is particularly useful as a source of information prior to researching or just visiting a sector of coast. References are provided to the current literature on coastal evolution and coastline changes.

A World of Rivers Ellen Wohl, 2010-11-15 Far from being the serene natural streams of yore modern rivers have been diverted dammed dumped in and dried up all in efforts to harness their power for human needs. But these rivers have also undergone environmental change. The old adage says you can't step in the same river twice and Ellen Wohl would agree. Natural and synthetic change are so rapid on the world's great waterways that rivers are transforming and disappearing right before our eyes. A World of Rivers explores the confluence of human and environmental change on ten of the great rivers of the world. Ranging from the Murray Darling in Australia and the Yellow River in China to Central Europe's Danube and the United States Mississippi the book journeys down the most important rivers in all corners of the globe. Wohl shows us how pollution such as in the Ganges and in the Ob of Siberia has affected biodiversity in the water. But rivers are also resilient and Wohl stresses the importance of conservation and restoration to help reverse the effects of human carelessness and hubris. What all these diverse rivers share is a critical role in shaping surrounding landscapes and biological communities and Wohl's book ultimately makes a strong case for the need to steward positive change in the world's great rivers.

Beyond the Blue River B. Vinayan, 2011 Grace an autoriksha in India goes on an unusual journey in search of the source of the river in the song Blue River. The vehicle will encounter new worlds new creatures new ways of life and new systems of language and communication.
