River Of Tears The Rise Of The Rio Tinto:

River of Tears Richard West,1972 **Labour and Globalisation** Ronaldo Munck,2004-01-01 It is often assumed that social movements such as that of labour will simply be overwhelmed by the changes brought about by globalisation This volume points to this conclusion as at best premature and possibly also misguided The House of Rothschild in Spain, 1812-1941 Miguel A. Lopez-Morell,2016-03-09 Amongst the serried ranks of capitalists who drove European industrialisation in the nineteenth century the Rothschilds were amongst the most dynamic and the most successful Establishing businesses in Germany Britain France Austria and Italy the family soon became leading financiers bankrolling a host of private and government businesses ventures In so doing they played a major role in fuelling economic and industrial development across Europe providing capital for major projects particularly in the mining and railway sectors Nowhere was this more apparent than in Spain where for more than a century the House of Rothschild was one of the primary motors of Spanish economic development Yet despite the undoubted importance of the Rothschild s role questions still remain regarding the actual impact of these financial activities and the effect they had on financial sectors companies and Spanish markets It is to such questions that this book turns its attention utilising a host of archive sources in Britain France and Spain to fully analyse the investments and financial activities carried out by the Rothschild House in Spain during the nineteenth and early twentieth centuries In so doing the book tackles a variety of interrelated issues Firstly fixing the period when the main capital entries sprung from the initiatives taken by the Rothschild family how consequential they really were and the sectors they affected Secondly quantifying the importance of these investments and financial activities and the weight they had on financial sectors companies and Spanish markets as well as in foreign investment in each period Thirdly outlining the steps followed and means used by the Rothschild House in order to achieve the success in each of their businesses Finally analysing the consequences of this phenomenon in the actual growth of Spanish contemporary economy both in a general and in a partial scale By exploring these crucial questions not only do we learn much more about the working of one of the leading financial institutions and the development of the Spanish economy but a greater understanding of the broader impact of international finance and the flow of capital in the nineteenth century is achieved *Ancestral Rainforests And The Mountain Of Gold* David Hyndman,2021-10-28 The ancestral rain forests for the Wopkaimin people have long been a sacred geography a place that has allowed them to act out the obligations of the male cult system and social relations of production based on kinship Today the people and their place are suffering disastrous consequences from the sudden imposition of one of the worlds largest mining projects which has brought about severe social and ecological disruptions Based on fieldwork spanning more than a decade David Hyndmans book traces the extraordinary socioecological transformation of a traditional society confronting modern technological risk Across the island of New Guinea the clash between the simple reproduction and subsistence production system of indigenous peoples and the expanded production and private accumulation system of

Anthropology in the Mining Industry Glynn Cochrane, 2017-01-14 This book outlines how Rio Tinto one of the world's largest miners redesigned and rebuilt relationships with communities after the rejection of the company during Bougainville's Civil War Glynn Cochrane recalls how he and colleagues utilized their training as social anthropologists to help the company to earn an industry leadership reputation and competitive business advantage by establishing the case for long term on the ground smoke in the eyes interaction with people in local communities around the world despite the appeal of maximal efficiency techniques and quicker easier answers Instead of using ready made formulaic toolkits Rio Tinto relied on community practitioners to try to accommodate local preferences and cultural differences This volume provides a step by step account of how mining companies can use social anthropological and ethnographic insights to design ways of working with local communities especially in times of upheaval

Defending the Investment Saima Nakuti Ndahangwapo, 2025-03-01 In the 1970s Rio Tinto Zinc's Rossing Uranium mine became a symbol of injustice for Namibian nationalists and international opponents of South African rule Yet counterintuitively the mine survived decolonisation in Namibia virtually unscathed and was reimagined as part of modern independent Namibia This book explores the development of the Rossing Uranium mine during the colonial and early post colonial period The book presents a detailed understanding of the strategies adopted by big business in response to changes in the political and economic environment in Namibia It does so through a case study of big business and diplomacy in the establishment and operations of the Rossing Uranium mine under colonial rule and decolonisation The focus of the book is ultimately on the public relations campaign which was adopted by Rossing Uranium in anticipation of the impending political change in Namibia

Extraction Politics Nicholas S. Paliewicz, 2024-03-12 An investigation into one of the largest and most lucrative mineral mining companies in the world Rio Tinto Extraction Politics reveals how the company constructs a presence in the places it operates

and shapes meanings and orientations toward the environment Taking readers on a rhetorical pilgrimage across the American Southwest Nicholas Paliewicz shows how Rio Tinto creates adaptable corporate identities From Ronald Reagan s frontiersman advertisements for the Borax Mine in California to the pioneer Mormon persona at Bingham Canyon Mine in Salt Lake City and the folksy paternalistic perspective toward the San Carlos Apache at the proposed mine at Oak Flat Arizona the company appropriates local history to embed itself as a valued member of the public without having to settle in those ecological communities and bear the costs of extraction This does not occur without resistance however Paliewicz also shows how activists use these same tactics to expose Rio Tinto as an exploitative colonialist polluter In an era of surging demand for dwindling supplies of minerals and metals this book previews what the future of extractivism may look like *Extraction Politics* will appeal to scholars and students of environmental communication and activist politics as well as general readers interested in the climate crisis

Being Nuclear Gabrielle Hecht, 2014-08-29 The hidden history of African uranium and what it means for a state an object an industry a workplace to be nuclear Uranium from Africa has long been a major source of fuel for nuclear power and atomic weapons including the bomb dropped on Hiroshima In 2003 after the infamous yellow cake from Niger Africa suddenly became notorious as a source of uranium a component of nuclear weapons But did that admit Niger or any of Africa s other uranium producing countries to the select society of nuclear states Does uranium itself count as a nuclear thing In this book Gabrielle Hecht lucidly probes the question of what it means for something a state an object an industry a workplace to be nuclear Hecht shows that questions about being nuclear a state that she calls nuclearity lie at the heart of today s global nuclear order and the relationships between developing nations often former colonies and nuclear powers often former colonizers Hecht enters African nuclear worlds focusing on miners and the occupational hazard of radiation exposure Could a mine be a nuclear workplace if as in some South African mines its radiation levels went undetected and unmeasured With this book Hecht is the first to put Africa in the nuclear world and the nuclear world in Africa By doing so she remakes our understanding of the nuclear age

Moving Mountains Geoffrey Russell Evans, James Goodman, Nina Lansbury, 2002 Transnational mining companies are key agents of corporate globalization They are often larger than national economies and dominate governments local peoples and their environments In response affected communities and non government organizations are creating new agendas for change and justice
