The American Technological Challenge Jan Vigg, 2011 The American Technological Challenge Stagnation and Decline in the 21st Century refutes the myth that we live in the most innovative of times Inventions themselves are only one of the factors that determine the technological fate of a society Sometimes inventions are adopted and eagerly sometimes not The history of technological progress and the historical and societal factors that impel or restrain the adoption of inventions are explored in the book New life changing

inventions have become rare and in spite of ample vocal support of innovation an increasingly complacent society has lost its taste for risk and often actively resists change Far from being unique technology slowdowns are recurrent events in history occurring in civilizations that have reached the zenith of their success They are the inevitable fate of an increasingly regulated successful society Most people would characterize the dawn of the 21st century as the age of technological progress par excellence If you are one of them then think again While our parents grandparents and great grandparents witnessed life changing inventions every decade very little major new technology has seen the light of day over the last half century We find ourselves in the midst of a technology slowdown This book is about the causes and consequences of technology slowdowns which are not unique but recurrent events in human history They occur not in times of upheaval when violent interstate conflicts are the order of the day Such periods foster innovation and allow major breakthrough inventions to be adopted quickly Instead innovation seriously stalls in times that are peaceful when governments reign supreme and citizens are encapsulated by layers of benign regulation to protect them against all possible harm We find ourselves in the best of times The long period of bloody combat that characterized so much of the 20th century has finally ended Violent conflicts between states are minimal and conditions for almost everyone on the planet are on an upswing with poverty on the decline and life expectancy and literacy increasing Responsible government and industry leaders have begun to refrain from risky bets on exciting new exploits and the time of grand projects such as the Eisenhower Interstate System the Moon Landing Program or the development of the internet is behind us Instead we have to make do with incremental improvements of existing technology catch up programs in developing countries and social programs The consequences are stalling wealth generation and an end to the dramatic changes society has undergone since the industrial revolution now more than 200 years ago

ultimate nature of Central American families Alexander the Great and Hernán Cortés Justin D. Lyons, 2015-03-04 This is a biographical pairing of two of the greatest conquerors in human history drawing its inspiration from Plutarch's Parallel Lives. Like Plutarch the purpose of the pairing is not primarily historical. While Plutarch covers the history of each of the lives he chronicles he also emphasizes questions of character and the larger lessons of politics to be derived from the deeds he recounts. The book provides a narrative account both of Alexander's conquest of the Persian Empire and Cortés's conquest of the Aztec Empire while reflecting on the larger questions that emerge from each. The campaign narratives are followed by essays devoted to leadership and command that seek to recover the treasures of the Plutarchian approach shaped by moral and political philosophy. Analysis of leadership style and abilities is joined with assessment of character. Special emphasis is given to the speeches provided in historical sources and meditation on rhetorical successes and failures in maintaining the morale and willing service of their men.
