Rivers Handbook Vol 2 The Science And Management Of River Environments:

The Rivers Handbook Peter P. Calow, Geoffrey E. Petts, 2009-07-08 Fast changing legislation and increasing environmental awareness within the non scientific community demands that the modern approach to the management of rivers and water resources should be based on a sound understanding and application of the scientific and ecological principles that underlie freshwater processes In two volumes The Rivers Handbook offers an expert and exhaustive insight into the principles methods and tools of modern river management always within an integrated and environmentally acceptable framework This second volume develops the principles and philosophies expounded in the first volume into the management sphere organizing the approach around problems diagnosis and treatment A fully comprehensive reference to sound methods of modern river management The ideal information resource for all river managers

River Channel Management Peter Downs, Ken Gregory, 2014-02-24 River Channel Management is the first book to deal comprehensively with recent revolutions in river channel management It explores the multi disciplinary nature of river channel management in relation to modern management techniques that bear the background of the entire drainage basin in mind use channel restoration where appropriate and are designed to be sustainable River Channel Management is divided into five sections The Introduction outlines the need for river channel management Retrospective Review offers an overview of twentieth century engineering methods and the ways that river channel systems operate Realisation explains how greater understanding of river channel adjustments channel hazards and river basin planning created a context for twenty first century management Requirements for Management explains and examines environmental assessment restoration based approaches and methods that work towards design with nature Final Revision speculates about prospects for twenty first century river channel management River Channel Management is written for higher level undergraduates and for postgraduates in geography ecology engineering planning geology and environmental science for professionals involved in river channel management and for staff in environmental agencies

Methods of Environmental Impact Assessment Peter Morris, Riki Therivel, 2001-08-23 Offers a comprehensive coverage of the methods used in environmental impact assessment which is now firmly established as an obligatory procedure in proposing or launching any development project with possible impacts on the environment

Handbook of Ecological Restoration Martin R. Perrow, Anthony J. Davy, 2002-09-05 The two volumes of this handbook provide a comprehensive account of the emerging and vibrant science of the ecological restoration of both habitats and species Ecological restoration aims to achieve complete structural and functional self maintaining biological integrity following disturbance In practice any theoretical model is modified by a number of economic social and ecological constraints Consequently material that might be considered as rehabilitation enhancement reconstruction or re creation is also included Restoration in Practice provides details of state of the art restoration practice in a range of biomes within terrestrial and aquatic marine coastal and freshwater ecosystems Policy and legislative issues on all continents are

also outlined and discussed The accompanying volume Principles of Restoration defines the underlying principles of restoration ecology The Handbook of Ecological Restoration will be an invaluable resource to anyone concerned with the restoration rehabilitation enhancement or creation of habitats in aquatic or terrestrial systems throughout the world

Land, Water and Development Malcolm Newson,2002-09-11 This is a fully revised and expanded second edition of Malcolm Newson s acclaimed book Exploring in greater depth the meaning of sustainability in river basin development this new edition highlights the rapid evolution of practical concepts since the Rio Earth Summit features new illustrations and case studies from Australia South Africa and Israel makes the ecosystem model more explicit throughout strengthens coverage of the linkages between land and water management Hydroecology and Ecohydrology Paul J. Wood,David M. Hannah,Jonathan P. Sadler,2008-02-28 This state of the art research level text considers the growing volume of research at the interface of hydrology and ecology and focuses on the evolution of hydroecology ecohydrology process understanding hydroecological interactions dynamics and linkages methodological approaches detailed case studies future research needs The editors and contributors are internationally recognised experts in hydrology and ecology from institutions across North America South America Australia and Europe Chapters provide a broad geographical coverage and bridge the traditional subject divide between hydrology and ecology The book considers a range of organisms plants invertebrates and fish provides a long term perspective on contemporary and palaeo systems and emphasises wider research implications with respect to environmental and water resource management Hydroecology and Ecohydrology is an indispensable resource for academics and postgraduate researchers in departments of physical geography earth sciences environmental science environmental management civil engineering water resource management biology zoology botany and ecology It is also of interest to professionals working within environmental consultancies organizations and national agencies **River Science** David J. Gilvear,Malcolm T. Greenwood,Martin C. Thoms,Paul J. Wood,2016-03-03 River Science is a rapidly developing interdisciplinary field at the interface of the natural sciences engineering and socio political sciences It recognises that the sustainable management of contemporary rivers will increasingly require new ways of characterising them to enable engagement with the diverse range of stakeholders This volume represents the outcome of research by many of the authors and their colleagues over the last 40 years and demonstrates the integral role that River Science now plays in underpinning our understanding of the functioning of natural ecosystems and how societal demands and historic changes have affected these systems The book will inform academics policy makers and society in general of the benefits of healthy functioning riverine systems and will increase awareness of the wide range of ecosystem goods and services they provide **The State of Canada's Environment, 1996** Canada. Environment Canada,1996 The State of Canada s Environment 1996 is Canada s third national state of the environment SOE report As such it continues the ongoing evolution in national environmental reporting that began several decades ago The goal remained the same as it had been for the 1991 report that is to provide

timely accurate and accessible environmental information integrated with socioeconomic factors to improve decision making and support progress towards sustainability Preface **River Conservation and Management** Philip Boon,Paul Raven,2012-04-02 This book is intended for those with an academic scientific and practical interest in river conservation and management It provides an overview of how changes in legislation policies institutional responsibilities science technology practical techniques and public perception have influenced how rivers have been managed over the past 20 years and the challenges that lie ahead during the next 20 years The book is based on the international conference River Conservation and Management 20 Years On held at York Thirty one chapters with contributions from North and South America Europe Asia and Australasia provide a wide ranging perspective on this complex but profoundly important subject Following an introduction that chronicles the most important contextual changes the book is organized into four broad topics Catchment management ecosystem integrity and the threats to river ecosystems this covers progress on understanding and addressing the pressures affecting rivers many of which will be amplified by climate change and increasing human demands for water Methods and approaches illustrating some recent techniques that have been developed to assess condition and conservation status across different types of river Recovery and rehabilitation providing an insight into the principles practice public involvement and institutional networks that support and make improvements to modified river reaches Integrating nature conservation into wider river management demonstrating the importance of integrated planning involvement of local communities and the use of adaptive management in achieving multiple environmental and economic benefits along rivers used for different purposes The final chapter discusses the challenges faced in dealing with an uncertain future More than 1200 different references and numerous web site citations provide the reader with an invaluable source of knowledge on the subject area The Structure, Function and Management Implications of Fluvial Sedimentary Systems Fiona J. Dyer,Martin C. Thoms,Jon M. Olley,2002 Decision Support Systems for Risk-Based Management of Contaminated Sites Antonio Marcomini,Glenn Walter Suter II,Andrea Critto,2008-12-16 Decision Support Systems for Risk Based Management of Contaminated Sites addresses decision making in environmental risk management for contaminated sites focusing on the potential role of decision support systems in informing the management of chemical pollutants and their effects Considering the environmental relevance and the financial impacts of contaminated sites all over the post industrialized countries and the complexity of decision making in environmental risk management decision support systems can be used by decision makers in order to have a more structured analysis of a problem at hand and define possible options of intervention to solve the problem Accordingly the book provides an analysis of the main steps and tools for the development of decision support systems namely environmental risk assessment decision analysis spatial analysis and geographic information system indicators and endpoints Sections are dedicated to the review of decision support systems for contaminated land management and for inland and coastal waters management Both include discussions of management problem formulation

and of the application of specific decision support systems This book is a valuable support for environmental risk managers and for decision makers involved in a sustainable management of contaminated sites including contaminated lands river basins and coastal lagoons Furthermore it is a basic tool for the environmental scientists who gather data and perform assessments to support decisions developers of decision support systems students of environmental science and members of the public who wish to understand the assessment science that supports remedial decisions
