Global Geopolitical Power and African Political and Economic Institutions John James Quinn, 2015-12-30 Global Geopolitical Power and African Political and Economic Institutions When Elephants Fight describes the emergence and nature of the prevailing African political and economic institutions in two periods In the first most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites usually through one or no party military political systems inward oriented development policies and or state led and often state owned industrialization In the second period most countries adopted institutions that diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral systems more outward oriented trade policies and the privatization of many state owned or controlled sectors though significant political and economic power remains in their hands The choices made in each period were consistent with prevailing ideas on governance and development the self interests of political elites and the perceived availability of support or autonomy vis vis domestic regional and international sources of power at the time This book illustrates how these two region wide shifts in prevailing political and economic institutions and practices of Africa can be linked to two prior global geopolitical realignments the end of WWII with the ensuing American and Soviet led bipolar system and the end of the Cold War with American primacy Each period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic regional and international forces material and intellectual all which were themselves greatly transformed in the wake of these two global geopolitical realignments The Engineer, 2013 Presents professional information designed to keep Army engineers informed of current and emerging developments within their areas of expertise for the purpose of enhancing their professional development Articles cover engineer training doctrine operations strategy equipment history and other areas of interest to the engineering community

Sieckhaus, Ph.D.,2001-11-01 There are few clues as to why a person responds to the vicissitudes of life in a given way As John Sieckhaus states in this memoir of his own spiritual journey some have the courage to choose life from their earliest moments of sober reflection while others opt to soothe their pain with addictions of the mind and body some choose an early final exit and still others stay the healing course trusting that there is purpose to their lives meaning in their suffering and healing as the intended outcome of some higher power The tragic slaying of his parents propels the author as sixteen year old onto a life course dictated initially by his own errant choices and the acculturations of family tribe and society His

decision to pursue a Ph D in chemistry is consistent with his search for life's magic formula the alchemist's quest for the philosopher's stone but the first fruits of this venture are depression and a horrific encounter with his family demons Resort to psychotherapy and chemical disease management a therapeutic model characterized by a patient's need to trust in the alchemical wisdom of his or her therapist proves to be a mere palliative in a desperate striving to arrest the pain and it is only through an encounter with the living God amidst a small band of refugees from mainline Christian churches that his journey of faith remembrance and healing begins John Sieckhaus tells this story with conviction and a deep sense of gratitude for God's provision of trustworthy guides and fellow travelers on the way It was from James and Mary Baird a couple whose decision to stand against the racial prejudices inherent in their small town culture in Baird Mississippi in the 1950s forced them to leave family clan and culture to reach out to the hurting and the needy in southeast Asia that he learned to heed God's call in his life and to pursue his vocation with a new sense of adventure and purpose In so doing he had to come to grips with his work as a scientist engaged in the development of weapon systems and was eventually led to challenge his company's involvement with nerve gas research and resign his position With each step in his vocational journey the healing went deeper and finally after staying the course for more than twenty years the author was gifted with a revelation of his family pathology which provided the clues concerning his own responses to life This is a story that the author was compelled to tell because the telling was an integral part of his healing journey and because as he states in the introduction I believe that what I have experienced and learned is not just for my own healing and spiritual growth that perhaps it may help others walk their own path to wholeness If this should prove to be the case for only one other person it the telling will have been worth the effort **The Internationalization of Internal Conflicts** Amy L.

Freedman,2016-04-29 Internal security crises from environmental disaster extreme poverty and deprivation armed conflicts or ethnic or religious conflict provide sites of opportunity for those seeking to internationalize conflicts Domestic conflicts in Africa the Middle East and Southeast Asia have started as internal problems but have taken on regional and international dimensions as parties to the conflict within the country and sympathetic external forces have joined forces with each other for mutual gain This book examines the international dimension to internal conflicts and asks under what conditions do domestic conflicts become opportunities for regional or global actors to become involved Why have some countries been able to successfully deal with this problem while others have not Who are the actors who seek to internationalize conflicts Why and with what means do they become involved and how do their agendas get internalized localized Cases include the separatist movements in the Philippines Southern Thailand Aceh Indonesia and the civil wars in Rwanda Congo and Sierra Leone Liberia Lebanon and Iraq This book finds that a combination of greater democratization internally coupled with constructive outside mediation efforts can produce conditions necessary to prevent conflicts from escalating or diffusing and can facilitate peace building Several chapters in this book were originally published as a special issue of Asian Security

Oil Is Not a Curse Pauline Jones Luong, Erika Weinthal, 2010-08-23 This book makes two central claims first that mineral rich states are cursed not by their wealth but rather by the ownership structure they choose to manage their mineral wealth and second that weak institutions are not inevitable in mineral rich states Each represents a significant departure from the conventional resource curse literature which has treated ownership structure as a constant across time and space and has presumed that mineral rich countries are incapable of either building or sustaining strong institutions particularly fiscal regimes The experience of the five petroleum rich Soviet successor states Azerbaijan Kazakhstan the Russian Federation Turkmenistan and Uzbekistan provides a clear challenge to both of these assumptions Their respective developmental trajectories since independence demonstrate not only that ownership structure can vary even across countries that share the same institutional legacy but also that this variation helps to explain the divergence in their subsequent fiscal regimes

Crossing the River Sorrow Janet Richards, 2013-06-12 *Crossing the River Sorrow* tells the story of one woman's plunge from a sheltered childhood in the 50s into the world of medicine and her personal search for answers to questions about suffering A single moment at the bedside of a paralyzed girl begins her journey on the *River Sorrow* which takes her on a life long quest to come to terms with the problem of pain More than medical case stories or tales of overcoming *Crossing the River Sorrow* is a narrative told from the perspective an ordinary wife mother and nurse as she lives her way to peace in the face of some of life's most troubling questions From the first pages I immediately realized I was in the presence of a gifted writer In Nurse Richards you find a gentle yet courageous soul an artistic master of words intellectual and guileless with an endearing simplicity of heart Follow her as she battles unseen enemies with refreshing candor while deftly drawing the reader into her struggles against the stark and dark realities of adversity This work is the story of a soul coming to a profound understanding of Christ the gospels and the cross a place where all should journey Read You will be nursed into someone you need to become Danl C Markham Director of Partner Relations at Life Without Limbs Author with Nick Vujicic of *The Lost Mandate A Christ Command Revealed*

Majority State Ownership of Oil and Mining Sectors in Africa John James Quinn, 2024-09-30 *Majority State Ownership of Oil and Mining Sectors in Africa* The *Resource Curse Undermined* shows that countries in sub Saharan Africa with majority state ownership of their major oil or mineral export sectors suffered from more severe versions of the natural resource curse than other similar countries Examining natural resource exporting nations in sub Saharan Africa between 1966 to 2000 Quinn shows that on average states with majority state ownership of these sectors featured lower growth lower incomes declining alternative export sectors more debt lower levels of investment lower levels of political and civil rights and more domestic conflict than other similar countries These results remained fairly consistent across both cross country data as well as in paired case studies One surprise finding is that these countries either had depreciating currencies or did not feature high levels of currency appreciation on average which is inconsistent with resource curse literature predictions Rather most countries with majority state ownership had high levels of currency overvaluation which operated in a similar manner as currency appreciation This work should appeal to students and faculty interested in the political economy of development the natural resource curse and African development as well as politicians policy makers and NGO workers working in these areas The strong recommendation of the book is that governments should control 50% or less of these sectors

The Oil Curse Michael L. Ross, 2013-09-08 Explaining and solving the oil curse in the developing world Countries that are rich in petroleum have less democracy less economic stability and more frequent civil wars than countries without oil What explains this oil

curse And can it be fixed In this groundbreaking analysis Michael L Ross looks at how developing nations are shaped by their mineral wealth and how they can turn oil from a curse into a blessing Ross traces the oil curse to the upheaval of the 1970s when oil prices soared and governments across the developing world seized control of their countries oil industries Before nationalization the oil rich countries looked much like the rest of the world today they are 50 percent more likely to be ruled by autocrats and twice as likely to descend into civil war than countries without oil The Oil Curse shows why oil wealth typically creates less economic growth than it should why it produces jobs for men but not women and why it creates more problems in poor states than in rich ones It also warns that the global thirst for petroleum is causing companies to drill in increasingly poor nations which could further spread the oil curse This landmark book explains why good geology often leads to bad governance and how this can be changed

The Rapture of God William Lloyd Newell, 2020-07-02 This is a book offering Balthasar s theological oeuvre as a kerygma of Christ s love proclaimed theologically as Christ s esthetics of glory in his mission to reinvent himself the world and us as beauty and glory Balthasar s hypothesis is that there is true theology and there is false theology For him theology is the unique science across the methods of which the decision of faith cuts and divides it into two halves that cannot be united to each other a genuine theology which presupposes faith and does its thinking within the nexus of Christ and the Church and a false theology which rejects faith as methodologically dubious and irresponsible and subsumes the truth of the phenomenon which discloses itself under an anthropological truth however this may be understood In William Newell s book he deeply reflects on the radical thinking being done in Catholic theology since the 1940s in Europe and now in the United States Each chapter each excursus each elision ushers the reader towards consolations without previous causes the essence of mysticism in its first stages The book as with true theology is a come and see beckoning the reader to an endless furtherance of the archetypal experience of Christ

Dictating Development Jonathan T. Kriekhaus, 2010-06-15 Dictating Development presents a powerful and original analysis of how colonialism has profoundly impacted the varying economic growth of developing nations While previous studies have focused primarily on the domestic neoliberal policies of government and the political capacity of developing states Dictating Development argues that economic growth is equally influenced positively and negatively by colonial powers Jonathan Kriekhaus examines both historic colonial influences on human capital and state structures as well as contemporary ones war market access and foreign aid Based on an in depth study of the regionally diverse nations of Mozambique Korea and Brazil and a statistical analysis of growth in ninety one countries from 1960 to 2000 Kriekhaus effectively demonstrates that most seemingly domestic political variables are in fact the byproduct of relationships with colonial powers While not denying the role of neoliberalism as an important factor in development

Dictating Development reveals the roots of these policies how colonialism influences the very nature of government and societal productivity
