The Future We Need Erica Smiley, Sarita Gupta, 2022-04-15 In The Future We Need Erica Smiley and Sarita Gupta bring a novel perspective to building worker power and what labor organizing could look like in the future suggesting ways to evolve collective bargaining to match the needs of modern people not only changing their wages and working conditions but being able to govern over more aspects of their lives Weaving together stories of real working people Smiley and Gupta position the struggle to build collective bargaining power as a central element in the effort to build a healthy democracy and explore both existing levers of power and new ones we must build for workers to have the ability to negotiate in today and tomorrow s contexts The Future We Need illustrates the necessity of centralizing the fight against white supremacy and gender discrimination while offering paths forward to harness the power of collective bargaining in every area for a new era

Chinese Way, The: Overcoming Challenges For A Shared Future Fabio Massimo Parenti, 2023-07-07 The book aims to communicate to readers in a clear fluent and well documented fashion the new role that China plays in the geography of world power evaluating its weight influence and impact on future developments China s ambition and its vision of international affairs can be summed up in Beijing s desire to build a community of common destiny for mankind Behind this concept lies the desire to present itself as a peaceful nation interested in a common global development in full compliance with the principles embraced by the United Nations to be achieved through win win relationships capable of bringing mutual benefits to the actors engaged in international cooperation China has experienced extraordinary growth in recent decades and intends to continue carving out the space it deserves in various international fora According to the author this does not necessarily represent a threat as its Western

detractors contend given the People's Republic's intention to achieve its goals through mutual respect, spatial interconnection and long term productive investments. The book has been published in Italy by Meltemi and is in course of publication by the Chinese publisher New Star Press. Those who deal with China are well aware that the West's gaze on the People's Republic has often been dismissive, superficial and distorted. A sort of festival of stereotyped opinions with value judgments constantly used to highlight the West's alleged superiority vis-à-vis the Chinese model. Regardless of whether one likes the Chinese political economic system or not, no country can avoid engaging with it. Especially if we consider that the exhaustion of the propulsive thrust of Western globalization is increasingly evident and corresponds conversely to the rise of a new constructive globalization with Chinese characteristics. Safety for Future Transport and Mobility Hans-Leo Ross, 2020-09-17. The book provides background information about technical solutions, processes and methodology to develop future automated mobility solutions. Beginning from the legal requirements as the minimum tolerable risk level of the society, the book provides state of the art risk management methodologies. The system engineering approach based on today's engineering best practices enhanced by principles derived from cybernetics. The approach derived from the typical behaviour of a human driver in public road traffic to a cybernetical based system engineering approach. Beyond the system engineering approach, a common behaviour model for the operational domain will show aspects how to extend the system engineering model with principles of cybernetics. The role and the human factors of road traffic participants and drivers of motor vehicles are identified and several viewpoints for different observers show how such mixed traffic scenarios could be assessed and optimised. The influence of the changing mobility demands of the society and the resulting changes to the origination of producer, owner, driver and supplier show aspects for future liability and risk share options for new supply chains. Examples from various industries provide some well proven engineering principles how to adapt those for the future mobility for the benefit of the users. The aim of the book is to raise awareness that the safety provided by a product, a means of transport or a system up to an entire traffic system depends on the capabilities of the various actors. In addition to the driver and passengers, there are also other road users, maintenance personnel and service providers who must have certain abilities to act safely in traffic. These are also the capabilities of the organisation, not only the organisation that develops or brings the product to market but also the organisation that is responsible for the operation and the whole lifecycle of the products. The book is for people who want to get involved in the mobility of the future. People that have ideas to become a player who want to help shape the future mobility of society and who want to bring responsible solutions for users into the market. *The On-line Electric Vehicle* Nam P. Suh, Dong Ho Cho, 2017-04-04. This book details the design and technology of the on-line electric vehicle (OLEV) system and its enabling wireless power transfer technology, the shaped magnetic field in resonance SMFIR. The text shows how OLEV systems can achieve their three linked important goals: reduction of CO₂ produced by ground transportation, improved energy efficiency of

ground transportation and contribution to the amelioration or prevention of climate change and global warming SMFIR provides power to the OLEV by wireless transmission from underground cables using an alternating magnetic field and the reader learns how this is done This cable network will in future be part of any local smart grid for energy supply and use thereby exploiting local and renewable energy generation to further its aims In addition to the technical details involved with design and realization of a fleet of vehicles combined with extensive subsurface charging infrastructure practical issues such as those involved with pedestrian safety are considered Furthermore the benefits of reductions in harmful emissions without recourse to large banks of batteries are made apparent Importantly the use of Professor Suh s axiomatic design paradigm enables such a complicated transportation system to be developed at reasonable cost and delivered on time The book covers both the detailed design and the relevant systems engineering knowledge and draws on experience gained in the successful implementation of OLEV systems in four Korean cities The introduction to axiomatic design and the in depth discussion of system and technology development provided by The On line Electric Vehicle is instructive to graduate students in electrical mechanical and transportation engineering and will help engineers and designers to master the efficient timely and to cost implementation of large scale networked systems Managers responsible for the running of large transportation infrastructure projects and concerned with technology management more generally will also find much to interest them in this book

Seeking a Future for the Past Philipp Demgenski,2024-02-19 *Seeking a Future for the Past* Space Power and Heritage in a Chinese City examines the complexities and changing sociopolitical dynamics of urban renewal in contemporary China Drawing on ten years of ethnographic fieldwork in the northeastern Chinese city of Qingdao the book tells the story of the slow fragmented and contentious transformation of Dabaodao an area in the city s former colonial center from a place of common homes occupied by the urban poor into a showcase of architectural heritage and site for tourism and consumption The ethnography provides a nuanced account of the diverse experiences and views of a range of groups involved in shaping and being shaped by the urban renewal process local residents migrant workers preservationists planners and government officials foregrounding the voices and experiences of marginal groups such as migrants in the city Unpacking structural reasons for urban developmental impasses it paints a nuanced local picture of urban governance and political practice in contemporary urban China *Seeking a Future for the Past* also weighs the positives and negatives of heritage preservation and scrutinizes the meanings and effects of preservation on diverse social actors By zeroing in on the seemingly contradictory yet coexisting processes of urban stagnation and urban destruction the book reveals the multifaceted challenges that China faces in reforming its urbanization practices and ultimately in managing its urban future **The**

Future Regulation of Work Nicole Busby,Douglas Brodie,Rebecca Zahn,2016-04-01 Labour law is in crisis Global economic factors and the changing contours of work and workplace relations have led to a reorientation of the social economic political and cultural environment within which labour law has developed This is not a jurisdictional problem but rather is deeply

entrenched in transnational development Solutions must recognise and mobilise the transformational shift that has taken place over recent decades Law should be viewed as a force for and a facilitator of change capable of expressing and determining social relations The essays in this book explore the challenges posed by labour law s potential reinvention as a discipline fit for accommodating and investigating such change within a range of different but connected jurisdictional and regulatory concepts and paradigms The Future of Legal Europe: Will We Trust in It?
