Roadside Picnic:

Roadside Picnic Arkady Strugatsky, Boris Strugatsky, Olena Bormashenko, 2012-05-01 Red Schuhart is a stalker one of those young rebels who are compelled in spite of extreme danger to venture illegally into the Zone to collect the mysterious artifacts that the alien visitors left scattered around His life is dominated by the place and the thriving black market in the alien products But when he and his friend Kirill go into the Zone together to pick up a full empty something goes wrong And the news he gets from his girlfriend upon his return makes it inevitable that he ll keep going back to the Zone again and again until he finds the answer to all his problems First published in 1972 Roadside Picnic is still widely regarded as one of the greatest science fiction novels despite the fact that it has been out of print in the United States for almost thirty years This authoritative new translation corrects many errors and omissions and has been supplemented with a foreword by Ursula K Le Guin and a new afterword by Boris Strugatsky explaining the strange history of the novel s publication in Russia

Space Forces Fred Scharmen, 2021-11-09 The radical history of space exploration from the Russian Cosmists to Elon Musk Many societies have

imagined going to live in space What they want to do once they get up there whether conquering the unknown establishing space colonies privatising the moon s resources reveals more than expected In this fascinating radical history of space exploration Fred Scharmen shows that often science and fiction have combined in the imagined dreams of life in outer space but these visions have real implications for life back on earth For the Russian Cosmists of the 1890s space was a place to pursue human perfection away from the Earth For others such as Wernher Von Braun it was an engineering task that combined in the Space Race the Cold War and during World War II with destructive geopolitics Arthur C Clark in his speculative books offered an alternative vision of wonder that is indifferent to human interaction Meanwhile NASA planned and managed the space station like an earthbound corporation Today the market has arrived into outer space and exploration is the plaything of superrich technology billionaires who plan to privatise the mineral wealth for themselves Are other worlds really possible Bringing these figures and ideas together reveals a completely different story of our relationship with outer space as well as the dangers of our current direction of extractive capitalism and colonisation
