Robert Motherwell 2nd Edition New Revised:

Robert Motherwell, Abstraction, and Philosophy Robert Hobbs, 2020-06-07 Employing an interdisciplinary approach this book breaks new ground by considering how Robert Motherwell's abstract expressionist art is indebted to Alfred North Whitehead's highly original process metaphysics. Motherwell first encountered Whitehead and his work as a philosophy graduate student at Harvard University and he continued to espouse Whitehead's processist theories as germane to his art throughout his life. This book examines how Whitehead's process philosophy inspired by quantum theory and focusing on the ongoing ingenuity of dynamic forces of energy rather than traditional views of inert substances set the stage for Motherwell's future art. This book will be of interest to scholars in twentieth century modern art philosophy of art and aesthetics and art history.

The Writings of Robert Motherwell Robert Motherwell, 2023-11-15 Robert Motherwell 1915-1991 one of the leading American Abstract Expressionist painters was also a theorist and exponent of the movement. His writing articulated the intent of the New York school: Jackson Pollock, Willem de Kooning, Adolph Gottlieb, Franz Kline, Arshile Gorky and others during a period when their work was often reviled for its departure from traditional representation. As founder of the Documents of Modern Art series later renamed the Documents of Twentieth Century Art, Motherwell gave modern artists a voice at a time when very few people understood their theories or work. This authoritative new edition of the artist's writings about art includes public lectures, essays and interviews. Impeccably edited with an informative introductory essay and rigorous annotation, it is illustrated with black and white images that elucidate Motherwell's writings. Robert Motherwell 1915-1991 one of the leading American Abstract Expressionist painters was also a theorist and exponent of the movement. His writing articulated the intent of the New York school: Jackson Pollock, Willem de Kooning, Adolph Gottlieb, F. Robert Motherwell On Paper Robert Motherwell, 1997 The Abstract Expressionist artist Robert Motherwell 1915-1991 was best known as a painter but he also created a remarkable body of works on paper. The drawings, prints and collages in this book show a more intimate side of his visual sensibility; they reveal the very personal handwriting of the artist as he responded to the subtleties of paper both as a medium and a material. Motherwell was in fact a most extraordinary draftsman as this volume testifies. Reproduced in color and in a generous format are more than a hundred of the artist's finest works on paper. The book is published to accompany an exhibition at the Miriam and Ira D. Wallach Art Gallery at Columbia University, an exhibition that was conceived and developed in discussions with the artist during the final year of his life. For this celebration of Motherwell's creative legacy, David Rosand has gathered a distinguished group of contributors. Together their essays on different aspects of Motherwell's work create a complex picture of a multifaceted artist.

Conceptual Revolutions in Twentieth-Century Art David W. Galenson,2009-09-14 From Picasso s Cubism and Duchamp s readymades to Warhol s silkscreens and Smithson s earthworks the art of the twentieth century broke completely with earlier artistic traditions A basic change in the market for advanced art produced a heightened demand for innovation and young conceptual innovators from Picasso and Duchamp to Rauschenberg and Warhol to Cindy Sherman and Damien Hirst responded not only by creating dozens of new forms of art but also by behaving in ways that would have been incomprehensible to their predecessors Conceptual Revolutions in Twentieth Century Art presents the first systematic analysis of the reasons for this discontinuity David W Galenson whose earlier research has changed our understanding of creativity combines social scientific methods with qualitative analysis to produce a fundamentally new interpretation of modern art that will give readers a far deeper appreciation of the art of the past century and of today than is available elsewhere **The Expression of Emotion in the Visual Arts** Derek Matravers,Vanessa Brassey,2024-11-08 The visual arts have long been held to have an intimate link with emotions Despite this the topic remains underexplored when the expression of emotion is discussed it is usually in relation to music This volume corrects this lacuna and presents a variety of perspectives on the expression of emotion in the visual arts with contributions from both established and early career

academics There are chapters on the empathy theory of beauty enaction and artistic expression emotion and experimental psychology a persona theory of visual expression and self expression in portraiture There are also chapters discussing the contributions to the topic by Susanne Langer and Richard Wollheim as well as a chapter comparing the work of R G Collingwood and Maurice Merleau Ponty The Expression of Emotion in the Visual Arts will be of interest to students and researchers in the philosophy of art and aesthetics as well as those interested in conceptual issues in the visual arts

Exploring the Invisible Lynn Gamwell, 2020-03-17 How science changed the way artists understand reality Exploring the Invisible shows how modern art expresses the first secular scientific worldview in human history Now fully revised and expanded this richly illustrated book describes two hundred years of scientific discoveries that inspired French Impressionist painters and Art Nouveau architects as well as Surrealists in Europe Latin America and Japan Lynn Gamwell describes how the microscope and telescope expanded the artist's vision into realms unseen by the naked eye In the nineteenth century a strange and exciting world came into focus one of microorganisms in a drop of water and spiral nebulae in the night sky The world is also filled with forces that are truly unobservable known only indirectly by their effects radio waves X rays and sound waves Gamwell shows how artists developed the pivotal style of modernism abstract non objective art to symbolize these unseen worlds Starting in Germany with Romanticism and ending with international contemporary art she traces the development of the visual arts as an expression of the scientific worldview in which humankind is part of a natural web of dynamic forces without predetermined purpose or meaning Gamwell reveals how artists give nature meaning by portraying it as mysterious dangerous or beautiful With a foreword by Neil deGrasse Tyson and a wealth of stunning images this expanded edition of Exploring the Invisible draws on the latest scholarship to provide a global perspective on the scientists and artists who explore life on Earth human consciousness and the space time universe Difference/indifference Moira Roth, Jonathan D.
