**Remembering and Forgetting the Ancient City** Javier Martínez Jiménez,Sam

Ottewill-Soulsby,2022-03-24 The Greco Roman world is identified in the modern mind by its cities This includes both specific places such as Athens and Rome but also an instantly recognizable style of urbanism wrought in marble and lived in by teeming tunic clad crowds Selective and misleading this vision may be but it speaks to the continuing importance these ancient cities have had in the centuries that followed and the extent to which they define the period in subsequent memory Although there is much that is mysterious about them the cities of the Roman Mediterranean are for the most part historically known That the names and pasts of these cities remain known to us is the product of an extraordinary process of remembering and forgetting stretching back to antiquity that took place throughout the former Roman world This volume tackles this subject of the survival and transformation of the ancient city through memory drawing upon the methodological and theoretical lenses of memory studies and resilience theory to view the way the Greco Roman city lived and vanished for the generations that separate the present from antiquity This book analyzes the different ways in which urban communities of the post Antique world have tried to understand and relate to the ancient city on their own terms examining it as a process of forgetting as well as remembering Many aspects of the ancient city were let go as time passed but those elements that survived that were actively remembered have shaped the many understandings of what it was In order to do so this volume assembles specialists in multiple fields to bring their perspectives to bear on the subject through eleven case studies that range from late Antiquity to the mid twentieth century and from the Iberian Peninsula to Iran Through the examination of archaeological remains changing urban layouts and chronicles travel guides and pamphlets they track how the ancient city was made useful or consigned to oblivion

provides a survey of modern debates on Greek and Roman cities and a sketch of the cities chief characteristics Urban Religion Jörg Rüpke, 2020-02-24 So far religion has been seen as cause for dramatic developments in the history of cities it has contributed to the monumentalisation of centres and or has given importance to ex centric places Very recently anthropologists have been discovering religion in the contemporary global city But still awaiting historical investigation is the specific urban character of religious ideas practices and institutions and the role of urban space shaping this very religion in the course of history The time span from the Hellenistic age to Late Antiquity was crucial in the establishment of concepts and institutions of religion and witnessed extended waves of urbanisation Rome being central to this In addressing this problem this book fills a significant gap in the scholarship on urban religion across time Taking seriously the proposition that space is condition medium and outcome of social relations the development of urban religion in lived urban space and urban culture or urbanity offers a lens onto processes of religious change that have been neglected for the history of religion and for the study of urbanism The key thesis is that city space engineered the major changes that revolutionised religions This

stimulating book makes use of archaeology and history to address religion as an essential component of urban life in both the past and the present With a strong basis in the ancient Mediterranean as well as an insightful view of modern urban life R pke emphasizes that the practice and performance of religion at the everyday level is as essential in the creation of an urban ethos as the grand temples and institutions promulgated by the elite Monica L Smith author of *Cities The First 6 000 Years* J rg R pke offers a characteristically original and learned series of reflections on some of the many ways in which the history of religions and the history of cities might be entangled *Urban Religion* offers no single overarching thesis but it is consistently thought provoking and suggests many intriguing lines of investigation for the future Greg Woolf Institute of Classical Studies London     [Mediterranean Urbanization 800-600 BC](#) Robin Osborne,Barry Cunliffe,British Academy,2005-10-27 Urban life as we know it in the Mediterranean began in the early Iron Age settlements of great size and internal diversity appear in the archaeological record This collection of essays offers for the first time a systematic discussion of the beginnings of urbanization across the Mediterranean from Cyprus through Greece and Italy to France and Spain Leading scholars in the field look critically at what is meant by urbanization and analyse the social processes that lead to the development of social complexity and the growth of towns The introduction to the volume focuses on the history of the archaeology of urbanization and argues that proper understanding of the phenomenon demands loose and flexible criteria for what is termed a town The following eight chapters examine the development of individual settlements and patterns of urban settlement in Cyprus Greece Etruria Latium southern Italy Sardinia southern France and Spain These chapters not only provide a general review of current knowledge of urban settlements of this period but also raise significant issues of urbanization and the economy urbanization and political organization and of the degree of regionalism and diversity to be found within individual towns The three analytical chapters which conclude this collection look more broadly at the town as a cultural phenomenon that has to be related to wider cultural trends as an economic phenomenon that has to be related to changes in the Mediterranean economy and as a dynamic phenomenon not merely a point on the map Wide ranging in its geographical coverage this volume will be essential reading for scholars and students of archaeology settlement studies the archaic period and geographers interested in the history of urban forms     [Pompeii](#) Alex Butterworth,Ray Laurence,2013-12-17 Please note that this ebook does not contain the photo insert that appears in the print book The ash of Mt Vesuvius preserves a living record of the complex and exhilarating society it instantly obliterated two thousand years ago In this highly readable lavishly illustrated book Alex Butterworth and Ray Laurence marshal cutting edge archaeological reconstructions and a vibrant historical tradition dating to Pliny and Tacitus they present a richly textured portrait of a society not altogether unlike ours composed of individuals ordinary and extraordinary who pursued commerce politics family and pleasure in the shadow of a killer volcano Deeply resonant in a world still at the mercy of natural disaster Pompeii recreates life as experienced in the city and those frantic awful hours in AD 79 that wiped the bustling city from the face of the earth     [The Inner Lives of](#)

Ancient Houses J. A.
