Roman Builders A Study In Architectural Process:

Roman Builders Rabun Taylor, 2003-01-09 How were the architectural ideas behind great Roman building projects carried out in practice Each major phase of the building process is considered in the building histories of the Baths of Caracalla the Pantheon the Coliseum and the great temples at Baalbek New hypotheses are advanced on the raising of monolithic columns the construction sequence of the Coliseum and the vaulting of the Pantheon The illustrations include archival and original photographs as well as numerous explanatory drawings The Colosseum Keith Hopkins, Mary Beard, 2005-11-14 Byron and Hitler were equally entranced by Rome's most famous monument the Colosseum Mid Victorians admired the hundreds of varieties of flowers in its crannies and occasionally shuddered at its reputation for contagion danger and sexual temptation Today it is the highlight of a tour of Italy for more than three million visitors a year a concert arena for the likes of Paul McCartney and a national symbol of opposition to the death penalty Its ancient history is chock full of romantic but erroneous myths There is no evidence that any gladiator ever said Hail Caesar those about to die and we know of not one single Christian martyr who met his finish here Yet the reality is much stranger than the legend as the authors two prominent classical historians explain in this absorbing account We learn the details of how the arena was built and at what cost we are introduced to the emperors who sometimes fought in gladiatorial games staged at the Colosseum and we take measure of the audience who reveled in or opposed these games The authors also trace the strange afterlife of the monument as fortress shrine of martyrs church and glue factory Why are we so fascinated with this arena of death *Divine Institutions* Dan-el Padilla Peralta, 2023-06-06 How religious ritual united a growing and diversifying Roman Republic Many narrative histories of Rome's transformation from an Italian city state to a Mediterranean superpower focus on political and military conflicts as the primary agents of social change Dan el Padilla Peralta places religion at the heart of this transformation showing how religious ritual and observance held the Roman Republic together during the fourth and third centuries BCE a time when the Roman state significantly expanded and diversified Blending the latest advances in archaeology with innovative sociological and anthropological methods this incisive book overcomes many of the evidentiary hurdles that for so long have impeded research into this pivotal period in Rome's history *Divine institutions* reconstructs the scale and social costs of these religious practices and reveals how religious observance emerged as an indispensable strategy for bringing Romans of many different backgrounds to the center both physically and symbolically Back cover

in 1 Corinthians 1-4 Bradley J. Bitner, 2015-06-25 This volume examines 1 Corinthians 1-4 within first century politics demonstrating the significance of Corinth's constitution to the interpretation of Paul's letter Bradley J. Bitner shows that Paul carefully considered the Roman colonial context of Corinth which underlay numerous ecclesial conflicts Roman politics however cannot account for the entire shape of Paul's response Bridging the Hellenism Judaism divide that has characterised much of Pauline scholarship Bitner argues that Paul also appropriated Jewish biblical notions of covenant Epigraphical and papyrological evidence indicates that his chosen content and manner are best understood with reference to an ecclesial politeia informed by a distinctively Christ-centred political theology This emerges as a politics of thanksgiving in 1 Corinthians 14:9 and as a politics of construction in 3:5-4:5 where Paul redirects gratitude and glory to God in Christ This innovative account of Paul's political theology offers fresh insight into his pastoral strategy among nascent Gentile Jewish assemblies **Ancient Cities** Charles Gates, 2011-03-21 Ancient Cities surveys the cities of the Ancient Near East Egypt and the Greek and Roman worlds from the perspectives of archaeology and architectural history bringing to life the physical world of ancient city dwellers by concentrating on evidence recovered from archaeological excavations Urban form is the focus the physical appearance and overall plans of the cities their architecture and natural topography and the cultural and historical contexts in which they flourished Attention is also paid to non-urban features such as religious sanctuaries and burial grounds places and institutions that were a familiar part of the city dweller's experience Objects or artifacts that represented the essential furnishings of everyday life are discussed such as pottery sculpture wall paintings mosaics and coins Ancient Cities is unusual in presenting this wide range of Old World cultures in such comprehensive detail giving equal weight to the Preclassical and Classical periods and in showing the links between these ancient cultures User friendly features include use of clear and accessible language assuming no previous background knowledge lavishly illustrated with over 300 line drawings maps and photos historical summaries further reading arranged by topic plus a consolidated bibliography and comprehensive index new to the second edition a companion website with an interactive timeline chapter summaries study questions illustrations and a glossary of archaeological and historical terms Visit the website at <https://routledge/textbooks.com/textbooks/9780415498647> In this second edition Charles Gates has comprehensively revised and

to his Roman readers most of whom were undoubtedly laymen The inaccuracy of Vitruvius architectural rules when compared with surviving ancient buildings has knocked Vitruvius off his pedestal Nichols argues that the author never intended to provide an accurate view of contemporary buildings Instead Vitruvius crafted his authorial persona and remarks on architecture to appeal to elites and would be elites eager to secure their positions within an expanding empire In this major new analysis of *De architectura* from archaeological and literary perspectives Vitruvius emerges as a knowing critic of a social landscape in which the house made the man
