**What Room for Manoeuvre?** Jean Daudelin,Daniel Schwanen,2008-03-26 Canada's thirty four million people and trillion dollar GDP don't occupy much space on a planet of seven billion whose economy is now worth forty trillion dollars The country is not a lightweight yet but certainly its position as a power is shrinking What does that mean for the country's foreign policy and its various players What room is left and for whom      Being-in-the-World Hubert L. Dreyfus,1990-12-14 Being in the World is a guide to one of the most influential philosophical works of this century Division I of Part One of Being and Time where Martin Heidegger works out an original and powerful account of being in the world which he then uses to ground a profound critique of traditional ontology and epistemology Hubert Dreyfus's commentary opens the way for a new appreciation of this difficult philosopher revealing a rigorous and illuminating vocabulary that is indispensable for talking about the phenomenon of world The publication of Being and Time in 1927 turned the academic world on its head Since then it has become a touchstone for philosophers as diverse as Marcuse Sartre Foucault and Derrida who seek an alternative to the rationalist Cartesian tradition of western philosophy But Heidegger's text is notoriously dense and his language seems to consist of unnecessarily barbaric neologisms to the neophyte and even to those schooled in Heidegger thought the result is often incomprehensible Dreyfus's approach to this daunting book is straightforward and pragmatic He explains the text by frequent examples drawn from everyday life and he skillfully relates Heidegger's ideas to the questions about being and mind that have preoccupied a generation of cognitive scientists and philosophers of mind      **Political Decisions and Agency**

**Performance** R. Torenvlied,2012-12-06 All over the world many people who live in urban areas find themselves in an arduous social situation In the third world people in overcrowded metropolitan areas have a problem in maintaining even the slightest standards of living But also richer parts of the world the United States Europe and the far East show growing social inequalities in their cities And social problems are not confined to the large metropolitan areas impoverishment long term unemployment social isolation and the dependency on welfare programs pops up in medium sized cities and even in smaller communities At the same time these cities are confronted with a growing bureaucratic conglomerate which is increasingly inapt to fight social degeneration The catastrophe seems to be total how to deal at once with declining social conditions and bureaucratic inadequacy Two American authors Osborne and Plastrik 1997 claim to have found the answer just banish bureaucracy The liberating accomplishments of the free market will elevate ordinary citizens and force lazy incompetent bureaucrats to do their work properly If they succeed they survive Otherwise these agencies will vanish They illustrate their arguments with the American city of Uphill Battle which stopped its decline by reinventing government Strict performance measures allotting financial controls and incentives to the citizens and improving accountability have saved the city We

should however be very careful in taking such measures so far that they banish bureaucracy It is far from obvious that simply banishing bureaucracy indeed will help people in poor social situations *Models of Reading* Martha J.
