This book is concerned with the presence of familiar objects in unfamiliar places It examines the literary practice of inserting imaginary photographs of art architecture and people into novels and short stories These photographs are fictive objects although some especially those of art and architecture have equivalents in real life The book examines the presence of invented photographs in the writings of six authors who made extensive use of this practice The first part of the book concentrates on E M Forster while also including some discussion of imaginary photographs in Sinclair Lewis's novel *Main Street* The second part of the book analyses the uses of photographs in the writings of Forster's near contemporaries with separate chapters being devoted to Henry James Marcel Proust James Joyce and Virginia Woolf An epilogue touches on Christopher Isherwood a member of the next generation of British writers The book focuses upon largely unexplored areas in the writings of these authors what Virginia Woolf in *Modern Fiction* styled unexpected places ,

The Player Piano and the Edwardian Novel Cecilia Bjorken-Nyberg,2016-03-03 In her study of music making in the Edwardian novel Cecilia Bjorken-Nyberg argues that the invention and development of the player piano had a significant effect on the perception performance and appreciation of music during the period In contrast to existing devices for producing music mechanically such as the phonograph and gramophone the player piano granted its operator freedom of individual expression by permitting the performer to modify the tempo Because the traditional piano was the undisputed altar of domestic and highly gendered music making Bjorken-Nyberg suggests the potential for intervention by the mechanical piano s operator had a subversive effect on traditional notions about the status of the musical work itself and about the people who were variously defined by their relationship to it She examines works by Dorothy Richardson E M Forster Henry Handel Richardson Max Beerbohm and Compton Mackenzie among others contending that Edwardian fiction with music as a subject undermined the prevalent antithesis expressed in contemporary music literature between a nineteenth century conception of music as a means of transcendence and the increasing mechanisation of music as represented by the player piano Her timely survey of the player piano in the context of Edwardian commercial and technical discourse draws on a rich array of archival materials to shed new light on the historically conditioned activity of music making in early twentieth century fiction
