Essays in the History of Psychiatry. By Mark D. Altschule, M.D., with the Collaboration of Evelyn Russ Hegedus. Second Revised and Enlarged Edition** Mark David ALTSCHULE, Evelyn Russ HEGEDUS, 1965      **Race and Culture in Psychiatry (Psychology Revivals)** Suman Fernando, 2014-10-14 As psychiatry has developed it has proved to be susceptible to the influence of contemporary social and political mores With its origins in nineteenth century Europe psychiatry evolved as an ethnocentric body of knowledge the vehicle of implicit and overt racism Originally published in 1988 this author however saw no reason why the contemporary psychiatrist should not challenge this ethnocentrism He provides a critical account of the development of psychiatry in relation to its cultural context and then examined contemporary practice of the time in the light of this development Throughout the book is informed by an awareness of issues of race and culture and of their difficult interactions the author emphasising both the frequency of racist attitudes and the very real cultural distinctions in our society distinctions that can be used to mask what are actually racist sentiments What emerges is not just a plea for an anti racist culture sensitive psychiatry but a blueprint for how this can be brought about He argued that the shift towards community work and social psychiatry could reorientate the profession by confronting it with its social setting and responsibilities This book represented a significant contribution to this literature for all mental health professionals and

social scientists with an interest in this field at the time the author has gone on to write many more

**History of Psychiatry and Medical Psychology** Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e.g. Mora's Marx's D.B. Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp. xi-xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re- editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
