recognizing the inherent inequities in the field of integrated dance in the UK which currently places greater emphasis on the learning disabled performer This is the first book ever written by a physically disabled dancer on the subject of physically disabled dancers Inherent in this examination is the model of examining disability that is most closely associated with the disability arts movement which is the affirmative model of disability This model is defined as an approach to disability in which the disabled person is neither an object of medical care nor a victim of social indifference but a self respecting autonomous individual in which their disability is a positive and affirming aspect of their self identity This book based on interviews with physically disabled dancers choreographers academics and arts producers all in a UK context combines a wide range of perspective of disability dance together with the intellectual rigour of disability studies to produce a new definition of the physically disabled dancer as an affirming positive indispensable practitioner of contemporary performance art The volume pioneers perspectives of the physically disabled dancer prioritizing first person accounts from the performers themselves to produce an unprecedented contribution to the study of disability arts from a uniquely British perspective This book will offer educators as well as arts and cultural professionals a critical resource for facilitating work by and in alliance with practitioners of integrated dance

Inclusion requires changed mindsets and actions towards every member of society particularly towards the historically marginalized and people with disabilities Their inclusion has been a major problem due to numerous factors such as conceptions about disability and what it constitutes as they often come with stigma and stereotypes Current sources often present disability conceptions in general terms as if they apply to all categories of disabilities making it difficult to extract correct information about each disability Disability is not a homogenous category Conceptions about each category may differ among cultures and communities Uncovering conceptions about each category is a crucial step towards creating positive living and safe educational environment for people with disabilities *Global Stigmas and Attitudes Towards Persons With Disabilities* discusses conceptions about different disabilities children or family members with a disability and organizations for people with disabilities It demonstrates how negative conceptions influence service provision in various sectors and perpetuates their exclusion in education and society Covering topics such as stereotypes support services and promoting dignity this book is an excellent resource for sociologists caregivers educators policymakers advocates business owners researchers academicians and more

The Female Body in the Looking-Glass Basia Sliwinska, 2016-06-29 In his theory of the mirror stage the psychoanalyst and psychiatrist Jacques Lacan argued that the female body is defined by its lack of male attributes Within this framework he described female sexuality primarily as an absence and assumed female subordination to the male gaze However what happens if one follows Jean Baudrillard's advice to swallow the mirror and go through the looking glass to explore the reflections and realities that we encounter in the cultural mirror which reflects the culture in question its norms ideals and values What if the beautiful is inverted and becomes ugly and the ugly is considered beautiful or shape shifts into something conventionally thought of as beautiful These are the fundamental questions that Basia Sliwinska poses in this important new enquiry into gender identity and the politics of vision in contemporary women's art Through an innovative discussion of the mirror as a metaphor Sliwinska reveals how the post 1989 practices of woman artists from both sides of the former Iron Curtain such as Joanna Rajkowska Marina Abramovic Boryana Rossa Natalia LL and Anetta Mona Chisa and Lucia Tkacova go beyond gender binaries and instead embrace otherness and difference by playing with visual tropes of femininity Their provocative works offer alternative representations of the female body to those seen in the cultural mirror Their art challenges and deconstructs patriarchal representations of the social and cultural other associated with visual tropes of femininity such as Alice in Wonderland Venus and Medusa *The Female Body in the Looking Glass* makes a refreshing radical intervention into art theory and cultural studies by offering new theoretical concepts such as the mirror and genderland inspired by Alice's adventures in Wonderland as critical tools with which we can analyse and explain recent developments in women's art *Identifying Handicapped Children for Child Development Programs* Malinda
