From the Margins to the Centre in Seventeenth-Century England Angela McShane, Tim

Reinke-Williams, 2025-05-20 Collection of essays showcasing how one of the greatest historians of seventeenth century England has shaped and continues to influence the direction of studies in early modern society culture and belief This collection of essays showcases how over an illustrious career spanning more than fifty years Professor Bernard Capp FBA has shaped and continues to influence the direction of studies in early modern English social and cultural history Initially influenced by the historiographical agendas set in the 1960s by Christopher Hill and Sir Keith Thomas over the last five decades Capp has produced important studies of religious radicalism print culture gender and sibling relations the culture wars of the 1650s and the maritime world Collectively this body of work enabled him not only to recover the experiences of the marginalised but also to highlight the importance of topics previously deemed at best of marginal interest to historians of seventeenth century England The contributions to this volume produced by a new generation of historians whose doctoral work Capp supervised and examined are similarly wide ranging and innovative Engaging in dialogue with Capp's work as well as those he has been in dialogue with himself the authors provide novel studies of hermits sailors and surgeons as well as shedding fresh light on topics such as the politics of the parish the lives of plebeian women men's emotions and the cultural worlds of Jane Shore and John Taylor the Water Poet Like Capp the authors use evidence from legal records life writings and cheap printed texts to recover marginalised voices and reconstruct the everyday lives of those overlooked and misunderstood by their contemporaries and by historians By doing so they demonstrate how one of the greatest historians of seventeenth century England continues to inspire the production of innovative studies of early modern society culture and

belief **Conservation Chemistry** Ted Lister, Janet Renshaw, 2004 This book is divided into three sections dealing with the conservation of plastics stone and wood It provides teaching and learning materials that deal with familiar chemistry in an unfamiliar context it also helps to show how the chemical sciences play a part in many unexpected areas of life Many people think of objects made of plastic as throwaway and do not consider them as collectable items or ones that might be found in museums In fact there are increasing numbers of plastic objects in museums as well as in private collections and many are increasing in value To give just one example some Barbi TM dolls can change hands for thousands of pounds it is also a misconception that plastics do not decay easily many of them do and this raises issues about how best to preserve them This section is set in a context of the collection care identification and display of objects in museums and by private collectors The section on stone focuses on a case study In order to prevent damage to a stone object conservation scientists sometimes surround the object with filter paper soaked in pure water This is called poulticing Conservation scientists at the British Museum wanted to investigate the poulticing process to see how effective it was at removing salts and to find out whether previous treatment of the stone affected the efficiency of the removal process The section on wood focuses on the Mary Rose a wooden Tudor warship that sank off Portsmouth in 1545 In 1982 the hull was raised and since then has been undergoing conservation treatment in a former dry dock at Portsmouth Over 19 000 artefacts were recovered The material processed here looks at the chemistry of the decay processes and the methods used to conserve the wood of the Mary Rose s hull and some of the other materials involved *Elizabethan Sea-Dogs* William Wood, 2018-04-05 Reproduction of the original Elizabethan Sea Dogs by William Wood
