Looking For The Aliens:

Looking for the Aliens Jenny Randles, Peter Hough, 1999 Are we alone in the universe Many people are convinced that contact with extraterrestrial beings may have already happened and that if not contact with intelligent alien life forms will almost certainly occur in the future [Looking for the Aliens](#) Peter A. Hough, Jenny Randles, 1997 **The Search for Aliens: A Rough Guide to Life on Other Worlds** Rough Guides, 2012-05-24 The Search for Aliens A Rough Guide to Life on Other Worlds provides the first vivid and completely accessible guide to the most exciting field of modern science the search for extraterrestrial life All the latest research projects are identified located and described everything from radio dishes searching for intelligent alien signals to deep oceanic research seeking links between terrestrial organisms and the broader cosmos It also explores the idea of Panspermia the notion that asteroids and comets brought biological building blocks to the early earth plus exactly which factors must align for life to arise across our galaxy and the universe The Search for Aliens A Rough Guide to Life on Other Worlds explains why we may be closer than ever to finding out the answer to the question is there any life beyond life on earth Now available in ePub format **Alien Universe** Don Lincoln, 2013-10-15 Are alien civilizations really possible If extraterrestrials exist where are they How likely is it that somewhere in the universe an Earth like planet supports an advanced culture Why do so many people claim to have encountered Aliens In this gripping exploration scientist Don Lincoln exposes and explains the truths about the belief in and the search for life on other planets In the first half of Alien Universe Lincoln looks to Western civilization s collective image of Aliens showing how our perceptions of extraterrestrials have evolved over time The roots of this belief can be traced as far back as our earliest recognition of other planets in the universe the idea of them supporting life was a natural progression of thinking that has fascinated us ever since Our captivation with Aliens has however led to mixed results The world was fooled in the nineteenth century during the Great Moon Hoax of 1835 and many people misunderstood Orson Welles s 1938 radio broadcast The War of the Worlds leading to significant anxiety among some listeners Our continuing interest in Aliens is reflected in entertainment successes such as E T The X Files and Star Trek The second half of the book explores the scientific possibility of whether advanced Alien civilizations do exist For many years researchers have sought to answer Enrico Fermi s great paradox if there are so many planets in the universe and there is a high probability that many of those can support life then why have we not actually encountered any Aliens Lincoln describes how modern science teaches us what is possible and what is not in our search for extraterrestrial civilizations Whether you are drawn to the psychological belief in Aliens the history of our interest in life on other planets or the scientific possibility of Alien existence Alien Universe is sure to hold you spellbound [Vanishings in National Parks and Else where. Captured by Aliens

Joel Achenbach, 2003 The great minds of the human race employing ever more fabulous technology have peered into the depths of space and discovered that we exist on a tiny speck in a universe that is vast beyond comprehension But there is one thing we have yet to discover a single scrap of extraterrestrial life We have heard no signals found no alien picnic trash The aliens who allegedly abduct people in the middle of the night have a strange way of evaporating in the harsh glare of scientific scrutiny And so at the turn of the millennium we are in an intellectual fix we know the universe only through its structure its physical properties its chemistry Of its biology we can only guess Are there creatures out there like us with big brains and restless spirits Or are we for all intents and purposes alone If aliens exist if there really are intelligent creatures zooming around the galaxy then where in far nation are they Washington Post reporter Joel Achenbach the author of *Why Things Are* and a commentator for National Public Radio puts the ET debate into the context of the space program discoveries in astronomy and the hunger for meaning and spiritual nourishment in an era when science often doesn't provide the answers that people desire He finds that the topic of extraterrestrial life is poisoned by wishful thinking by the natural human yearning to make contact with our brothers and sisters in space But he also finds some fascinating admirable and maddening characters who have pursued the truth about extraterrestrial life Carl Sagan the brilliant astronomer who brought the cosmos to the masses Dan Goldin the cantankerous head of NASA who still believes in the dream of the Space Age Henry Harris a former Las Vegas lounge singer who is assigned the job of figuring out how to get a spaceship to Alpha Centauri and various and sundry ufologists experiencers spiritualists and channelers for whom the aliens are an ever present reality In this fascinating funny and spirited book Achenbach discovers that the search for life elsewhere leads us on a looping road back to the fundamental questions about life on Earth To think coherently about extraterrestrial life we first must come to terms with who we are why we exist and what it means to carry around in our cells an evolutionary history that took four billion years to unfold Achenbach's message is that it is a wonderful and thrilling thing to be a sentient human being a creature capable of foolish romanticism in a universe that is mostly rocks and gas and dust and empty space
