 - Evaluate for any past history or potential barriers to adherence with medical treatment.
 - Provide education and/or guidance about all medications and their dose, purpose, and adverse effects prior to the start of treatment and every time there is a change in treatment.

- Provide education about potential diet/nutritional changes associated with cancer treatment and possible interventions. Refer to a registered dietitian-certified specialist in oncology (RD-CSO).
- Provide education on physical conditioning and related health benefits during and following cancer treatment. Refer to a rehabilitation specialist (ie, physiatrist, physical therapist, occupational therapist) to address physical impairments and initiate physical activity interventions. Medical evaluation and clearance by a physician (such as an oncologist or a physiatrist) are recommended prior to initiating exercise in patients in whom exercise modifications or precautions might be needed.
- Consider evidence-based integrative therapies/interventions.
- Refer patients experiencing challenges with their faith or belief in a just or fair world to faith-based resources or activities (eg, church youth groups, mentors). If necessary, refer to a chaplain or pastoral counselor.
