

The image shows a highly detailed Minecraft construction of a medieval coastal village. The village is built on a steep, grassy cliffside that drops down to a dark blue ocean. The architecture features numerous houses with steeply pitched, brown-tiled roofs. Several prominent stone buildings with Gothic-style spires and towers are visible, including a large church or cathedral at the top of the cliff. The surrounding landscape is lush with green trees and foliage. The overall scene is a testament to complex Minecraft building techniques.

Frug, 2001-02-20 American metropolitan areas today are divided into neighborhoods of privilege and poverty often along lines of ethnicity and race City residents traveling through these neighborhoods move from feeling at home to feeling like tourists to feeling so out of place they fear for their security As Gerald Frug shows this divided and inhospitable urban landscape is not simply the result of individual choices about where to live or start a business It is the product of government policies and in particular the policies embedded in legal rules A Harvard law professor and leading expert on urban affairs Frug presents the first ever analysis of how legal rules shape modern cities and outlines a set of alternatives to bring down the walls that now keep city dwellers apart Frug begins by describing how American law treats cities as subdivisions of states and shows how this arrangement has encouraged the separation of metropolitan residents into different sometimes hostile groups He explains in clear accessible language the divisive impact of rules about zoning redevelopment land use and the organization of such city services as education and policing He pays special attention to the underlying role of anxiety about strangers the widespread desire for good schools and the pervasive fear of crime Ultimately Frug calls for replacing the current legal definition of cities with an alternative based on what he calls community building an alternative that gives cities within the same metropolitan region incentives to forge closer links with each other An incisive study of the legal roots of today's urban problems City Making is also an optimistic and compelling blueprint for enabling American cities once again to embrace their historic role of helping people reach an accommodation with those who live in the same geographic area no matter how dissimilar they are **Medieval Towns** John Schofield, A. G. Vince, 2003-01-01 Though the book is primarily about medieval towns in Britain many parallels are drawn with contemporary towns and cities all over Europe from Ireland to Russia and from Scandinavia to Italy It is written in the belief that medieval urban archaeology should be a Europe wide study as are the fields of architecture and urban history **BOOK JACKET The Medieval Town , Making a Living** Leverett Samuel Lyon, 1926 *The Medieval City* Norman Pounds, 2005-04-30 An introduction to the life of towns and cities in the medieval period this book shows how medieval towns grew to become important centers of trade and liberty Beginning with a look at the Roman Empire's urban legacy the author delves into urban planning or lack thereof the urban way of life

Making a Living in the Middle Ages Christopher Dyer, 2003-08-11 Dramatic social and economic change during the middle ages altered the lives of the people of Britain in far reaching ways from the structure of their families to the ways they made their livings In this masterly book preeminent medieval historian Christopher Dyer presents a fresh view of the British economy from the ninth to the sixteenth century and a vivid new account of medieval life He begins his volume with the formation of towns and villages in the ninth and tenth centuries and ends with the inflation population rise and colonial expansion of the sixteenth century This is a book about ideas and attitudes as well as the material world and Dyer shows how people regarded the economy and responded to economic change He examines the growth of towns the clearing of lands the Great Famine the Black Death and the upheavals of the fifteenth century through the eyes of those who experienced them He also explores the dilemmas and decisions of those who were making a living in a changing world from peasants artisans and wage earners to barons and monks Drawing on archaeological and landscape evidence along with more conventional archives and records the author offers here an engaging survey of British medieval economic history unrivaled in breadth and clarity

The Making of Urban Europe, 1000-1994 Paul M. HOHENBERG, Lynn Hollen Lees, Paul M Hohenberg, 2009-06-30 Europe became a land of cities during the last millennium The story told in this book begins with North Sea and Mediterranean traders sailing away from Dorestad and Amalfi and with warrior kings building castles to fortify their conquests It tells of the dynamism of textile

towns in Flanders and Ireland While London and Hamburg flourished by reaching out to the world and once vibrant Spanish cities slid into somnolence a Russian urban network slowly grew to rival that of the West Later as the tide of industrialization swept over Europe the most intense urban striving and then settled back into the merchant cities and baroque capitals of an earlier era By tracing the large scale processes of social economic and political change within cities as well as the evolving relationships between town and country and between city and city the authors present an original synthesis of European urbanization within a global context They divide their study into three time periods making the early modern era much more than a mere transition from preindustrial to industrial economies Through both general analyses and incisive case studies Hohenberg and Lees show how cities originated and what conditioned their early development and later growth How did urban activity respond to demographic and technological changes Did the social consequences of urban life begin degradation or inspire integration and cultural renewal New analytical tools suggested by a systems view of urban relations yield a vivid dual picture of cities both as elements in a regional and national hierarchy of central places and also as junctions in a transnational network for the exchange of goods information and influence A lucid text is supplemented by numerous maps illustrations figures and tables and by substantial bibliography Both a general and a scholarly audience will find this book engrossing reading

Make the City Mary P. Ryan,2019-03-15 This historical study shows how San Francisco and Baltimore were central to American expansion through the eighteenth and nineteenth centuries The history of the United States is often told as a movement westward beginning at the Atlantic coast and following farmers across the continent But early settlements and towns sprung up along the Pacific as well as the Atlantic as Spaniards and Englishmen took Indian land and converted it into private property In this ambitious study of historical geography and urban development Mary P Ryan reframes the story of American expansion Baltimore and San Francisco share common roots as early coastal trading centers immersed in the international circulation of goods and ideas Ryan traces their beginnings back to the first human habitation of each area showing how the juggernaut toward capitalism and nation building could not commence until Europeans had taken the land for city building She then recounts how Mexican ayuntamientos and Anglo American city councils pioneered a prescient form of municipal sovereignty that served as both a crucible for democracy and a handmaid of capitalism Moving into the nineteenth century Ryan shows how the citizens of Baltimore and San Francisco molded the shape of the modern city the gridded downtown rudimentary streetcar suburbs and outlying great parks This history culminates in the era of the Civil War when the economic engines of cities helped forge the East and the West into one nation *Medieval Science, Technology,*
