Work of History Peter Beilharz, Sian Supski, 2022-07-05

Stuart Macintyre was an eminent figure within the world of Australian history scholarship for 45 years This collection of essays and responses revisits and extends this extraordinary life of achievement and engagement Leading scholars write here of Macintyre's contribution to understanding radicalism and communism postwar reconstruction education and civics universities liberalism historiography and the history wars They also tell us about collegiality and friendship The practice of history writing and telling has long been central to the narrative of the nation in Australia The Work of History connects us to that past It raises the question of what comes next and re-values Macintyre's contribution serving both as a snapshot of the state of the historian's art and an introduction to those who come more recently to this highly contested field

The Prince and the Assassin Steve Harris, 2018-09-01

The engrossing real life story of how Queen Victoria's favourite son Prince Alfred undertook the most ambitious Royal tour only for Australia's overwhelming joy of having the first Royal on its shores jolted by his decadent behaviour then shocked by an attempted assassination by a man trained as a priest The British Empire's youngest and most distant outpost found itself at the epicentre of a new crime and empirical fears about the first intercontinental terrorist group a conspiracy and a lone wolf In a resulting reign of terror extraordinary steps were taken to safeguard security with laws on treason and sedition which even the Queen felt went too far and the would be assassin was hastily executed in a miscarriage of justice led by opportunistic politicians This is an extraordinary and atmospheric weaving of the stories some detailed for the first time of royal intrigue sexual appetite religious bigotry patriotic vengeance naked ambition national security and moral panic They are stories of royals immigrants archbishops republicans and the founding fathers of Australia and issues that remain with us today Drawing on Royal British and Australian archives the compelling narrative embraces a pivotal time in the evolution of Australia and on the 150th anniversary reveals how a minute of madness rocked the country to its foundations with a legacy which helped shape Australia's history and continues to influence and challenge us today Revelations insights in *The Prince and the Assassin* Prince Alfred's spare heir upbringing as the chosen one and prospective King of Australia Sexually decadent royal behaviour An historic tour which became the model for 50 subsequent royal tours to Australia Religious bigotry violence and death in early Australia How a young migrant trained and destined to be a priest became an assassin How the biggest crime in Australia shocked shamed terrorised and divided the country How Henry Parkes founder of federation suppressed and doctored evidence hired private spies and criminals for political advantage Australia suppressing civil liberties even making it a crime of treason to discuss republicanism and to not drink a toast to the Queen Australian Catholics accused of disloyalty and an Archbishop conspiring against the Government Australia's most sensational trial one of injustice and vengeance for a crime not on the Empire's capital list Alfred appealing

for his would be killer to not be executed An Australian Government accused of promoting fear for political advantage and committing treason and fraud *Progressive New World* Marilyn Lake,2019-01-07 In a bold argument Marilyn Lake shows that race and reform were mutually supportive as Progressivism became the political logic of settler colonialism at the turn of the 20th century She points to exchanges between American and Australasian reformers who shared racial sensibilities along with a commitment to forging an ideal social order Shaping Nations Linda Cardinal,David Headon,2002-03-01 As questions concerning nationhood and national identity continue to preoccupy both Canada and Australia *Shaping Nations* brings together the work of Australian and Canadian scholars around five core themes constitutionalism colonialism republicanism national identity and governance Published in English The Making and Remaking of Australasia Tony Ballantyne,2022-11-03 This book explores the emergence of Australasia as a way of thinking about the culture and geography of this region Although it is frequently understood to apply only to Australia and New Zealand the concept has a longer and more complicated history Australasia emerged in the mid 18th century in both French and British writing as European empires extended their reach into Asia and the Pacific and initially held strong links to the Asian continent The book shows that interpretations and understandings of Australasia shifted away from Asia in light of British imperial interests in the 19th century and the concept was adapted by varying political agendas and cultural visions in order to reach into the Pacific or towards Antarctica *The Making and Remaking of Australasia* offers a number of rich case studies which highlight how the idea itself was adapted and moulded by people and texts both in the southern hemisphere and the imperial metropole where a range of competing actors articulated divergent visions of this part of the British Empire An important contribution to the cultural history of the British Empire Australia New Zealand and Pacific Studies this collection shows how Australasia has had multiple often contrasting meanings *Global Matrix* Tom Nairn,Paul James,2005-03-20 Globalization has brought with it many difficult and contradictory phenomena violence deep national insecurities religious divisions and individual insecurities This book takes a critical look at three key areas globalism nationalism and state terror to confront common mythologies and identify the root causes of the problems we face Too many commentators still argue that globalization is predominantly a neo liberal economic phenomenon that nation states are on the way out and that terror is something that primarily comes from below *Global Matrix* exposes the limitations of this argument Written by two leading scholars this is a lucid study of what place the nation state has in a globalizing world that will appeal to students across the political and social sciences **Australia and the World** Beaumont, Joan,Jordan, Matthew,2013-05-20 Australia and the World celebrates the pioneering role of Neville Meaney in the formation and development of foreign relations history in Australia and his profound influence on its study teaching and application The contributors to the volume historians practitioners of foreign relations and political commentators many of whom were taught by Meaney at the University of Sydney over the years focus especially on the interaction between geopolitics culture and ideology in shaping Australian and American approaches to the world

Individual chapters examine a number of major themes informing Neville Meaney's work including the sources and nature of Australia's British identity the hapless if dedicated efforts of Australian politicians public servants and intellectuals to reconcile this intense cultural identity with Australia's strategic anxieties in the Asia Pacific region and the sense of trauma created when the myth of Britishness collapsed under the weight of new historical circumstances in the 1960s They survey relations between Australia and the United States in the years after World War Two Finally they assess the US perceptions of itself as an exceptional nation with a mission to spread democracy and liberty to the wider world and the way in which this self perception has influenced its behaviour in international affairs

The Court as Archive Ann Genovese, Trish

Luker, Kim Rubenstein, 2019-02-19 Until the late 20th century an archive generally meant a repository for documents as well as the generic name for the wide range of documents the repository might hold An archive could be visited and then also searched to discover past actions or lives that had meaning for the present While historians and historiographers have long understood the contests that archives contain and represent the very idea of the archive has over the last 40 years become the subject and object of widening and intensified consideration This consideration has been intellectual from scholars in a wide range of disciplines and public from communities and individuals whose stories are held captive or sometimes hidden or excluded from official archives as well as institutional It has involved scrutiny and critique of official archives limitations and practices as well as symbolic affective and theoretical expansion and heightened expectation of what the archive is or should be The very language of the archive now carries freight as administrative practice normative value metaphor description and aspiration in different ways than it did in the 20th century This collection offers a unique contribution to these reinvigorated and sometimes new conversations about what an archive might be what it can do as a consequence and to whom it bears custodial responsibilities In particular this collection addresses what it means for contemporary Australian superior courts of record to not only have constitutional and procedural duties to documents as a matter of law but also to acknowledge obligations to care for those materials in a way that understands their public meaning and public value for the Australian people in the past in the present and for the future

immigrant group left for Latin America in the aftermath of the war becoming subjects once again The rest gradually accommodated themselves to being full Canadian citizens
