Making A Motorway:

Tackling Congestion by Making Better Use of England's Motorways and Trunk Roads Great Britain: Parliament: House of Commons: Committee of Public Accounts, Stationery Office, The, 2005-06-28 Road congestion is estimated to cost industry and commerce 3 billion a year with around 7% of the motorway and trunk road network suffering heavy congestion at peak times Although the Government has set a target to stabilise congestion at 2000 levels by 2010 it has acknowledged that this will not be achieved This report which follows on from a report by the NAO HC 15 2004 05 ISBN 010293150X looks at how the Highways Agency is tackling the problem It concludes that the Agency has been too risk averse in testing and using measures adopted abroad and that they have failed to give motorists the information they need to make choices before and during their journeys

Making a Motorway James Dallaway, 1992 Photographs and text present the construction of a British motorway from start to finish Shows how a variety of machines work and what they are used for Suggested level primary intermediate Designing Safe Road Systems Jan Theeuwes, Richard van der Horst, 2017-09-18 Many books focus on individual differences and how those relate to traffic safety such as accident proneness gender differences age alcohol and the effects of drugs Others focus on the safety effects regarding the vehicle such as airbags anti lock brakes navigation systems intelligent cruise control and other new gadgets coming to the vehicle Even though these topics are undoubtedly important for traffic safety this book takes a unique approach as it focuses solely on the road environment *Designing Safe Road Systems* provides the background for those who want to know more about the effects of road design on driving behaviour It uses a systems approach to allow a better understanding of why and in what circumstances drivers may commit errors This understanding will ultimately lead to road systems that prevent fatal errors from occurring The book contains an overview of the current models and theories about human performance and human behaviour in traffic that are relevant for all those involved in designing safe road systems The central theme of this book is how design principles can reduce the probability of an error while driving The authors demonstrate how knowledge of human factors helps a road authority to better understand how road users behave They argue that in many cases the design of the environment can be further adjusted to human capabilities and that safety should be considered a system property to be built into the road system
