Making African Diaspora Americas 1441 19:

The Making of the African Diaspora in the Americas, 1441-1900 Vincent Bakpetu Thompson, 1987 This work examines the core period of the African diaspora in the Americas The author confronts myths surrounding the ethos of this diaspora which were induced by the mercantilist preoccupations of Western Europe The entire period is portrayed as a battle between two conflicting and opposite strategies that of the slavocracy and that of the enslaved Africans culminating in the conversion of the French colony of St Domingue into the revolutionary state of Haiti The author suggests that Haiti because of its position in the midst of hostile slave societies provided inspiration for the antislavery crusade in both its particularistic and its international aspects The epilogue provides a glimpse into the author's second book on the divergent perceptions in the early evolution of leadership in the African diaspora in the Americas Amazon.com viewed Oct 26 2022

The African Diaspora Patrick Manning, 2009-05-19 Patrick Manning refuses to divide the African diaspora into the experiences of separate regions and nations Instead he follows the multiple routes that brought Africans and people of African descent into contact with one another and with Europe Asia and the Americas In weaving these stories together Manning shows how the waters of the Atlantic Ocean the Mediterranean Sea and the Indian Ocean fueled dynamic interactions among black communities and cultures and how these patterns resembled those of a number of connected diasporas concurrently taking shape across the globe Manning begins in 1400 and traces five central themes the connections that enabled Africans to mutually identify and hold together as a global community discourses on race changes in economic circumstance the character of family life and the evolution of popular culture His approach reveals links among seemingly disparate worlds In the mid nineteenth century for example slavery came under attack in North America South America southern Africa West Africa the Ottoman Empire and India with former slaves rising to positions of political prominence Yet at the beginning of the twentieth century the near elimination of slavery brought new forms of discrimination that removed almost all blacks from government for half a century Manning underscores the profound influence that the African diaspora had on world history demonstrating the inextricable link between black migration and the rise of modernity especially in regards to the processes of industrialization and urbanization A remarkably inclusive and far reaching work The African Diaspora proves that the advent of modernity cannot be imaginatively or comprehensively engaged without taking the African peoples and the African continent as a whole into account

Slavery and its Legacy in Ghana and the Diaspora Rebecca Shumway, Trevor R. Rethinking American History in a Global Age Thomas Bender, 2002-05-14 In rethinking and reframing the American national narrative in a wider context the contributors to this volume ask questions about both nationalism and the discipline of history itself The essays offer fresh ways of thinking about the traditional themes and periods of American history By locating the study of American history in a transnational context they examine the history of nation making and the relation of the United States to other nations and to transnational developments What is now called globalization is here placed in a historical context A cast of distinguished historians from the United States and abroad examines the historiographical implications of such a reframing and offers alternative interpretations of large questions of American history ranging from the era of European contact to democracy and reform

from environmental and economic development and migration experiences to issues of nationalism and identity But the largest issue explored is basic to all histories How does one understand teach and write a national history even as one recognizes that the territorial boundaries do not fully contain that history and that within that bounded territory the society is highly differentiated marked by multiple solidarities and identities Rethinking American History in a Global Age advances an emerging but important conversation marked by divergent voices many of which are represented here The various essays explore big concepts and offer historical narratives that enrich the content and context of American history The aim is to provide a history that more accurately reflects the dimensions of American experience and better connects the past with contemporary concerns for American identity structures of power and world presence

Unyielding Spirits Maureen Elgersman Lee, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company

Unyielding Spirits Maureen G. Elgersman, 2014-01-21 This comparative study uncovers the differences and similarities in the experiences of Black women enslaved in colonial Canada and Jamaica and demonstrates how differences in the exploitation of women s productive and reproductive labor caused slavery to falter in Canada and excel in the Caribbean The research suggests that while the majority of Black women enslaved in early Canada were domestics the majority of Jamaican women were field laborers often performing some of the most labor intensive work on the sugar plantations While the efforts of the planter class to increase the number of children born to Jamaican women were not completely successful reproduction seems to have been less of a concern in Canada where many Black women were often sold or freed because there was no use for them The Canadian slave context seems to have allowed a broader range of material comfort as well Despite obvious labor differences Black women in Canada and Jamaica rejected their chattel status and condition and resisted slavery similarly This study is unique in its desire and ability to place Black Canadian slave women at the center of research and then contextualize it with a Caribbean model

Cortés, 2013-08-15 This comprehensive title is among the first to extensively use newly released 2010 U S Census data to examine multiculturalism today and tomorrow in America This distinction is important considering the following NPR report by Eyder Peralta Based on the first national numbers released by the Census Bureau the AP reports that minorities account for 90 percent of the total U S growth since 2000 due to immigration and higher birth rates for Latinos According to John Logan a Brown University sociologist who has analyzed most of the census figures The futures of most metropolitan areas in the country are contingent on how attractive they are to Hispanic and Asian populations Both non Hispanic whites and blacks are getting older as a group These groups are tending to fade out he added Another demographer William H Frey with the Brookings Institution told The Washington Post that this has been a pivotal decade We re pivoting from a white black dominated American population to one that is multiracial and multicultural *Multicultural America* A Multimedia Encyclopedia explores this pivotal moment and its ramifications with more than 900 signed entries not just providing a compilation of specific ethnic groups and their histories but also covering the full spectrum of issues flowing from the increasingly multicultural canvas that is America today Pedagogical elements include an introduction a thematic reader s guide a chronology of multicultural milestones a glossary a resource guide to key books journals and Internet sites and an appendix of 2010 U S Census Data Finally the electronic version will be the only reference work on this topic to augment written entries with multimedia for today s students with 100 videos with transcripts from Getty Images and Video Vault the Agence France Press and Sky News as reviewed by the media librarian of the Rutgers University Libraries working in concert with the title s editors **Ethnic Studies Research** Timothy P. Fong, 2008-05-02 Study of ethnic groups and race relations have always existed in the academy primarily in the areas of sociology and anthropology However grassroots movements for ethnic studies programs and departments came about with very different agendas for the study of these groups It is surprising then that relatively few books devoted to these methods exist to document and promote this innovation among succeeding generations of graduate students as well as current academics and professional practitioners Ethnic Studies

Research synthesizes and benchmarks ethnic studies methodologies as interdisciplinary modes of inquiry providing state of the art summary chapters on key methods and issues extensive bibliographies and promising new directions for the future

Nations Abroad Charles King, 2018-02-19 This book discusses trans border ethnic populations in the former Soviet Union in a broader conceptual context highlighting the importance of diaspora issues both for post Sovietologists and for scholars of comparative politics and international relations in general *Latinos and Education* Antonia Darder, Rodolfo D. Torres, Henry Gutiérrez, 1997 This reader establishes a clear link between educational practice and the structural dimensions which shape institutional life and calls for the development of a new language that moves beyond disciplinary and racialized categories of difference and structural inequality These highly accessible essays which achieve a useful balance of theory and practice discuss themes such as political economy historical views of Latinos and schooling identity the politics of language cultural democracy in the classroom community involvement and Latinos in higher education
