**Directions:** Read each passage and then respond to the questions. Each question will ask you to make a logical inference based on textual details. **Explain your answer by referencing the text.**

Emilio took the cap off his head, dropped the baseball bat, and rested his elbows on the fence. It wasn't that he couldn't find the ball. It was sitting right in the middle of the lawn, just beyond the fence. The fence was not very high either. Emilio could probably get a running start, grab the top of the fence, and flip right over it. But there was a dog, a large Rottweiler with a spiked collar. He sat under an awning a few feet away from the ball. He looked at Emilio and let out a menacing growl. Archie, Scotty, and Dutch ran up to Emilio and surveyed the situation. Archie was the first to speak, "So, are you going to do it, Emilio?"

"Where are you, honey?" Valentino asked. "I'm upstairs, dearest!" Dulce shouted as she finished wrapping the tie. Valentino held the flowers behind his back and crept up the stairs. Dulce tied the bow and concealed the package behind her back as she stepped into the hallway. Their eyes met and Valentino and Dulce smiled at one another.

**Inference and Consciousness** Timothy Chan, Anders Nes, 2019-12-20 Inference has long been a central concern in epistemology as an essential means by which we extend our knowledge and test our beliefs. Inference is also a key notion in influential psychological accounts of mental capacities ranging from problem solving to perception. Consciousness, on the other hand, has arguably been the defining interest of philosophy of mind over recent decades. Comparatively little attention, however, has been devoted to the significance of consciousness for the proper understanding of the nature and role of inference. It is commonly suggested that inference may be either conscious or unconscious. Yet how unified are these various supposed instances of inference? Does either enjoy explanatory priority in relation to the other? In what way or ways can an inference be conscious or fail to be conscious, and how does this matter? This book brings together original essays from established scholars and emerging theorists that showcase how several current debates in epistemology, philosophy of psychology, and philosophy of mind can benefit from more reflections on these and related questions about the significance of consciousness for inference.
