Denters, Oscar van Heffen, J. Huisman, P.J. Klok, 2013-06-29 It has taken a long time to make this book Many initial drafts of the chapters published in this book were presented in November 2000 during a two day conference on Interactive governance towards a post parliamentary democracy held in Enschede The Netherlands The Netherlands Institute of Governance NIG sponsored the conference After this conference the organisers discussed the possibility of making a book on the basis of papers presented at this event In the end it was agreed that such a publication would indeed be worthwhile provided the initial papers were fundamentally revised Moreover it was agreed that also supplementary chapters should be included in order to strengthen the international comparative perspective On this basis authors of the conference papers chapters and envisioned new chapters were invited to re submit drafts The completion of the book however was unexpectedly halted by the tragic sudden death of our co editor and dear friend Oscar van Heffen In his lifetime he was the driving force behind this project Without his efforts insightful comments and helpful suggestions this book in its present form would never have been published As such we dedicate this volume to his memory the completion of the book being an honorary debt to our friend and his wife Mirjan **Decentralizing Governance** G. Shabbir Cheema, Dennis A. Rondinelli, 2007-08-01 The trend toward greater decentralization of governance activities now accepted as commonplace in the West has become a worldwide movement This international development largely a product of globalization and democratization is clearly one of the key factors reshaping economic political and social conditions throughout the world Rather than the top down centralized decisionmaking that characterized communist economies and Third World dictatorships in the twentieth century today s world demands flexibility adaptability and the autonomy to bring those qualities to bear In this thought provoking book the first in a new series on Innovations in Governance experts in government and public management trace the evolution and performance of decentralization concepts from the transfer of authority within government to the sharing of power authority

and responsibilities among broader governance institutions This movement is not limited to national government it also affects subnational governments NGOs private corporations and even civil associations The contributors assess the emerging concepts of decentralization e g devolution empowerment capacity building and democratic governance They detail the factors driving the movement including political changes such as the fall of the Iron Curtain and the ascendance of democracy economic factors such as globalization and outsourcing and technological advances e g increased information technology and electronic commerce Their analysis covers many different contexts and regions For example William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy while Kadmeil Wekwete United Nations outlines the specific challenges to decentralizing governance in sub Saharan Africa In each case contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result

Urbanization and Urban Governance in China Lin Ye, 2017-11-29 This book explores the process of urbanization and the profound challenges to China's urban governance Economic productivity continues to rise with increasingly uneven distribution of prosperity and accumulation of wealth The emergence of individual autonomy including demands for more freedom and participation in the governing process has asked for a change of the traditional top down control system The vertical devolution between the central and local states and horizontal competition among local governments produced an uneasy political dynamics in Chinese cities Many existing publications analyze the urban transformation in China but few focuses on the governance challenges It is critical to investigate China's urbanization paying special attention to its challenges to urban governance This edited volume fills this gap by organizing ten chapters of distinctive urban development and governance issues **Urban Governance in Southeast Asia** Ambe J. Njoh, 2024-07-30 The book draws from regulation theory to explain urban planning policies and outcomes in Southeast Asia as a function of governance structures and processes A considerable portion of the book is spent re tracing the historical roots of planning dispositives including the totality of institutional entities which together constitute an apparatus of government in South East Asian polities Therefore of essence in the book are the institutional structures and administrative principles that were introduced by colonial authorities and inherited by their post colonial successors in South East Asia The book seeks to demonstrate the role of the policies and commensurate implementation institutional frameworks in accounting for important dynamics in the contemporary urban domain in the region In analyzing the institutional framework for urban planning and governance the book is doing due diligence to a hitherto neglected subject namely governmentality in the discourse on the political economy of urban management in Southeast Asia Thus the book is intended to acknowledge the importance of institutions in determining the success of urban development policies The notion of institutions or governmentality as will be used in the book includes de facto governance structures government and parastatal agencies and the formal rules and regulations they are charged with implementing The book is based on the premise that knowledge of institutions and their functions is critical

in explaining phenomena in economic geography This is particularly true in Southeast Asian countries because of the dominant and overarching role of the state or government agencies in the economy **In defence of councillors** Colin Copus,2015-12-01 By using qualitative research from a number of related projects the book examines the roles functions and responsibilities of councillors and the expectations placed upon them by citizens communities and government Localism and the Design of Political Systems Rick Harmes,2020-12-31 This book examines localism as a political idea and policy approach and explains what localism is about why it is growing in importance and how it relates to other themes in politics Illustrated with case studies from the United Kingdom mainland Europe and the Indian sub continent the book analyses localism in conceptual and theoretical terms and locates it within the overall landscape of political thought Key themes covered in the book include place space and scale decentralization and devolution multi level governance public value democracy and empowerment and political design With the focus on the bottom up constructivist aspects of localism the book argues that localism is most likely to work successfully in a political order where sovereignty is distributed across various social spheres and levels of government It offers a comprehensive view of localism by synthesizing its various strands and creating a distinctive framework for design and evaluation This book will be of particular interest to scholars students and practitioners of localism particularly within local and regional government public administration and policy human and political geography and urban studies Governance for Harmony in Asia and Beyond Julia Tao,Anthony B. L. Cheung,Martin Painter,Chenyang Li,2009-12-18 Harmony has become a major challenge for modern governance in the twenty first century because of the multi religious multi racial and multi ethnic character of our increasingly globalized societies Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies This book examines the idea of harmony and its place in politics and governance both in theory and practice in Asia the West and elsewhere It explores and analyses the meanings mechanisms dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions The book argues that in Western political thought which sees politics as primarily concerned with resolving social conflicts and protecting individual rights the concept of harmony has often been neglected In contrast since earliest times harmony or he has been a profound theme in Confucian thought and current leaders of many East Asian governments and the Chinese government have explicitly declared that the realisation of a harmonious society is their aim The book also assesses how harmony is pursued jeopardized or deformed in the real world of politics based upon empirical analysis of a variety of different cultural social and political contexts including China Hong Kong Singapore Malaysia Singapore Vietnam Denmark Latin America and the Scandinavian countries It shows how harmony as an organizing concept can help to promote new thinking in governance and overcome problems of modern day governance like distrust adversarial conflicts hyper individualism coercive state intervention and free market alienation It also discusses the potential problems posed by the

pursuit of harmony in particular in the grave threat of totalitarianism and considers how these risks could best be mitigated

Good Governance in Asia Linda Chelan Li,2016-03-22 The international aid community has advocated governance reforms as a necessary complement to economic aid to developing countries The resultant Good Governance Agenda has been criticised for its ahistorical bias The empirical case studies reported in this book further illustrate the limitations by showing the complex logics of governance reforms and their relations with development in the Asian context The analysis highlights the importance of taking full notice of the Asian reform experiences in the ongoing reflection over the global institutional and development agenda The message is not to deny the need for governance reforms or the utility of international learning and sharing of experiences Global development will benefit however from a better understanding of the linkages between governance reforms and the diverse historical conditions they are embedded in both developing or the advanced economies This book was published as a special issue of Journal of Contemporary Asia
