*My Serengeti Years* Myles Turner, 1988-05      Serengeti II A. R. E. Sinclair, Peter Arcese, 1995-08 *Serengeti II Dynamics Management and Conservation of an Ecosystem* brings together twenty years of research by leading scientists to provide the most thorough understanding to date of the spectacular Serengeti Mara ecosystem in East Africa home to one of the largest and most diverse populations of animals in the world Building on the groundwork laid by the classic *Serengeti Dynamics of an Ecosystem* published in 1979 by the University of Chicago Press this new book integrates studies of the ecosystem at every level from the plants at the bottom of the visible food chain to the many species of herbivores and predators to the system as a whole Drawing on new data from many long term studies and from more recent research initiatives and applying new theory and computer technology the contributors examine the large scale processes that have produced the Serengeti's extraordinary biological diversity as well as the interactions among species and between plants and animals and their environment They also introduce computer modeling as a tool for exploring these interactions employing this new technology to test and anticipate the effects of social political and economic changes on the entire ecosystem and on particular species and so to shape future conservation and management strategies      **Where Is the Serengeti?** Nico

Medina, Who HQ, 2019-07-16 If you've never known what a wildebeest is you'll find out now in this latest *Where Is* title about the Serengeti Each year over 1.5 million wildebeest make a harrowing journey more than one thousand miles between Tanzania and Kenya They are in search of new land to graze Even if these creatures avoid vicious attacks from lions and crocodiles they could still fall prey to thirst hunger and exhaustion This book not only follows the exciting Migration but also tells about the other creatures and peoples that co-exist along these beautiful landscapes of the Serengeti      Imagining Serengeti Jan Bender Shetler, 2007-06-15 Many students come to African history with a host of stereotypes that are not

always easy to dislodge One of the most common is that of Africa as safari grounds as the land of expansive unpopulated game reserves untouched by civilization and preserved in their original pristine state by the tireless efforts of contemporary conservationists With prose that is elegant in its simplicity and analysis that is forceful and compelling Jan Bender Shetler brings the landscape memory of the Serengeti to life She demonstrates how the social identities of western Serengeti peoples are embedded in specific spaces and in their collective memories of those spaces Using a new methodology to analyze precolonial oral traditions Shetler identifies core spatial images and reevaluates them in their historical context through the use of archaeological linguistic ethnographic ecological and archival evidence *Imagining Serengeti* is a lively environmental history that will ensure that we never look at images of the African landscape in quite the same way      Our Gigantic Zoo

Thomas M. Lekan, 2020 *Our Gigantic Zoo* tells the story of Bernhard Grzimek the most important European wildlife conservationist and his role in creating a permanent sanctuary for innocent animals in Serengeti National Park      The Trouble with Lions Jerry Haigh, 2013-02-20 The trouble with lions is that while you are conducting a pregnancy test you need

to be equally if not more aware of what you can learn from the lion's other end. That is one lesson that Jerry Haigh brings home in this fascinating collection of stories about working with wild animals in Africa. Conversational in tone, conversational in theme, you will be right beside Jerry, wife Jo, and a colourful cast of vets, guides and wardens as they scour Africa's sprawling vistas, troubleshooting lions, rhinos, humans and other indigenous mammals. Conservationists, veterinarians and fans of real life adventure tales will want to keep this memoir handy on the dashboards of their Land Cruisers.

*Cheetahs of the Serengeti Plains* Timothy M. Caro, 1994-08-15

Cheetahs of the Serengeti Plains is the most comprehensive account of carnivore social behavior to date. Synthesizing more than a decade of research in the wild, this book offers a detailed account of the behavior and ecology of cheetahs. Compared with other large cats and other mammals, cheetahs have an unusual breeding system: whereas lions live in prides and tigers are solitary, some cheetahs live in groups while others live by themselves. Tim Caro explores group and solitary living among cheetahs and discovers that the causes of social behavior vary dramatically even within a single species. Why do cheetah cubs stay with their mother for a full year after weaning? Why do adolescents remain in groups? Why do adult males live in permanent associations with each other? Why do adult females live alone? Through observations on the costs and benefits of group living, Caro offers new insight into the complex behavior of this extraordinary species. For example, contrary to common belief about cooperative hunting in large carnivores, he shows that neither adolescents nor adult males benefit from hunting in groups. With many surprising findings and through comparisons with other cat species, Caro enriches our understanding of the evolution of social behavior and offers new perspectives on conservation efforts to save this charismatic and endangered carnivore.

**Elephant Destiny**

Martin Meredith, 2009-04-27

For thousands of years the majestic elephant has roamed the African continent as beloved by man as it has been preyed upon. But centuries of exploitation and ivory hunting have taken their toll; now as wars and poachers continue to ravage its habitat as disease and political strife deflect attention from its plight, the African elephant faces imminent extinction. What will become of these magnificent beasts as the elephant's future looms ever darker? Martin Meredith's concise and richly illustrated biography traces the elephant's history from the first ivory expeditions of the Egyptian pharaohs 2500 years ago to today, exploring along the way the indelible imprint the African elephant has made in art, literature, culture and society. He shares recent extraordinary discoveries about the elephant's sophisticated family and community structure and reveals the remarkable ways in which elephants show compassion and loyalty to each other. Elegant, illuminating and urgent, *Elephant Destiny* offers a beautiful and important tribute to one of earth's most majestic creatures at the very moment it threatens to vanish from being.

*Africa's Threatened Rhinos* Keith Somerville, 2025-01-14

Africa's surviving rhinos are under serious threat. Poaching for their horns, massive extermination by sports hunters in the nineteenth and first half of the twentieth century, and progressive habitat loss have all driven black and white rhino close to the edge. This book considers human interactions with these magnificent and enigmatic animals, charting hunting for food and hides

and then hunting for horn to meet external demand for this much coveted commodity as well as peaceful coexistence over the course of three millennia With only two females alive in a closely protected reserve in Kenya the Northern White Rhino is on the brink of extinction The Southern White Rhino was increasing in numbers but poaching in South Africa Botswana and Namibia has now reduced the population to fewer than 20 000 while Black Rhino are hovering around the 6 000 6 500 mark also with the danger of extirpation everywhere but in parts of eastern and southern Africa Many books have been written on poaching and the decline of the rhino often from a very personal engaged viewpoint This volume takes the reader into important new territory showing how human agency has led to the situation we now face Covering the history of commercial and sporting exploitation of rhino it brings the picture up to date with an overview of contemporary conservation and anti poaching operations This urgent work is a significant contribution to our understanding of wildlife on the African continent

The White Spaces of Kenyan Settler Writing Terrence L. Craig, 2017-03-27 The White Spaces of Kenyan Settler Writing provides an overview of Kenyan literature by white writers in the half century before Independence in 1964 Such literature has been over shadowed by that of black writers to the point of critical ostracism It deserves attention for its own sake as the expression of a community that hoped for permanence but suffered both disappointment and dispossession It deserves attention for its articulation of an increasingly desperate colonial and Imperial situation at a time when both were being attacked and abandoned in Africa as in other colonies elsewhere and when a counter discourse was being constructed by writers in Britain as well as in Africa Kenya was likely the best known twentieth century colony for it attracted publicity for its iconic safaris and its Happy Valley scandals Yet behind such scenes were settlers who had taken over lands from the native peoples and who were trying to make a future for themselves based on the labour willing or forced of those people This situation can be seen as a microcosm of one colonial exercise and can illuminate the historical tensions of such times The bibliography is an attempt to collect the literary resources of white Kenya in this historically significant period **Blood Ivory** Robin Brown, 2011-11-08 masterly account of the massacre of the African elephant The Spectator It is more than a thousand years since the exploitation of the elephant began when they were most commonly used as war elephants However it is only in the last hundred years with the coming of the great white hunters and their special elephant guns that the very existence of the African elephant has been threatened With an update by John Hanks WWF s former leading elephant scientist this new edition of Blood Ivory tells the story of how the professional hunting fraternity was the first to realise the threat to the elephant and how it kick started the whole conservation movement It is not a story with a happy ending however It is a tale of war colonialists against traditional practices and customs newly independent African countries against each other poachers and smugglers against any kind of constraint Robin Brown draws on his depth of knowledge and understanding of Africa and his career as a leading wildlife film maker to paint a vivid picture of hunting s impact on Africa s elephant population vividly portraying the powerful personalities of those involved on both sides of the massacre **The**

**Gnu's World** Richard Estes, 2014-04-12 This is the first scholarly book on the antelope that dominates the savanna ecosystems of eastern and southern Africa. It presents a synthesis of research conducted over a span of fifty years, mainly on the wildebeest in the Ngorongoro and Serengeti ecosystems, where eighty percent of the world's wildebeest population lives. Wildebeest and other grazing mammals drive the ecology and evolution of the savanna ecosystem. Richard D. Estes describes this process and also details the wildebeest's life history, focusing on its social organization and unique reproductive system, which are adapted to the animal's epic annual migrations. He also examines conservation issues that affect wildebeest, including range-wide population declines.

**Wildlife between Empire and Nation in Twentieth-Century Africa** Jeff Schauer, 2018-12-04 This book traces the emergence of wildlife policy in colonial eastern and central Africa over the course of a century. Spanning from imperial conquest through the consolidation of colonial rule, the rise of nationalism, and the emergence of neocolonial and neoliberal institutions, this book shows how these fundamental themes of the twentieth century shaped the relationships between humans and animals in what are today Kenya, Tanzania, Uganda, Zambia, and Malawi. A set of key themes emerges: changing administrative forms, militarization, nationalism, science, and a relentlessly broadening constituency for wildlife. Jeff Schauer illuminates how each of these developments was contingent upon the colonial experience and how they fashioned a web of structures for understanding and governing wildlife in Africa, one which has lasted into the twenty-first century.

**Tropical Nature** Guillaume Blanc, Mathieu Guérin, Grégory Quenet, 2025-03-01 Across Africa and South East Asia, the impulse to protect nature often dovetails with the domination of local people. From mass displacement to severe restrictions on land use and daily acts of violence, conservation work risks reproducing Eurocentric modes of colonialism and worsening the effects of the climate crisis. In this insightful and wide-ranging study of the colonial history of conservation, *Tropical Nature* seeks to provide a much-needed history of the Global South from its own perspective. Comparing case studies ranging from Ali Bongo's Gabon to the postcolonial African itinerary of the agronomist Arthur Bunting, this volume advances a small-scale global history that deciphers the relations binding human societies to the non-human world.

**Nature's Mirror** Mary Anne Andrei, 2020-11-20 It may be surprising to us now, but the taxidermists who filled the museums, zoos, and aquaria of the twentieth century were also among the first to become aware of the devastating effects of careless human interaction with the natural world. Witnessing firsthand the decimation caused by hide hunters, commercial feather collectors, whalers, big game hunters, and poachers, these museum taxidermists recognized the existential threat to critically endangered species and the urgent need to protect them. The compelling exhibits they created, as well as the scientific field work, popular writing, and lobbying they undertook, established a vital leadership role in the early conservation movement for American museums that persists to this day. Through their individual research expeditions and collective efforts to arouse demand for environmental protections, this remarkable cohort, including William T. Hornaday, Carl E. Akeley, and several lesser-known colleagues, created our popular understanding of the animal world and its fragile habitats.

For generations of museum visitors they turned the glass of an exhibition case into a window on nature and a mirror in which to reflect on our responsibility for its conservation

Ivory Keith Somerville, 2017-01-01 Half of Tanzania's elephants have been killed for their ivory since 2007. A similar alarming story can be told of the herds in northern Mozambique and across swathes of central Africa with forest elephants losing almost two thirds of their numbers to the tusk trade. The huge rise in poaching and ivory smuggling in the new millennium has destroyed the hope that the 1989 ivory trade ban had capped poaching and would lead to a long term fall in demand. But why the new upsurge? The answer is not simple. Since ancient times large scale killing of elephants for their tusks has been driven by demand outside Africa's elephant ranges from the Egyptian pharaohs through Imperial Rome and industrialising Europe and North America to the new wealthy business class of China. And who poaches and why do they do it? In recent years lurid press reports have blamed mass poaching on rebel movements and armed militias especially Somalia's Al Shabaab tying two together two evils poaching and terrorism. But does this account stand up to scrutiny? This new and ground breaking examination of the history and politics of ivory in Africa forensically examines why poaching happens in Africa and why it is corruption crime and politics rather than insurgency that we should worry about.

*Elephant Reflections* Dale Peterson, 2023-12-22 *Elephant Reflections* brings award winning wildlife photographer Karl Ammann's gorgeous images together with a revelatory text by writer Dale Peterson to illuminate one of nature's greatest and most original works of art the elephant. The photographs move from the purely aesthetic to the informative depicting animals who are at once enigmatic individual mysterious elusive and iconic. In riveting prose Peterson introduces the work of field scientists in Africa and explains their recent astonishing discoveries. He then explores the natural history and conservation status of African elephants and discusses the politics of ivory. *Elephant Reflections* is a book that could change the way the world thinks about elephants while we still have some measure of control over their fate.

*Seven Natural Wonders of Africa* Michael Woods, Mary B. Woods, 2009-01-01 This book explores Zimbabwe's other natural wonders as well as its history people and culture.

My Serengeti Years The Memoirs Of An African Games Warden: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have enthralled audiences this year. My Serengeti Years The Memoirs Of An African Games Warden : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. My Serengeti Years The Memoirs Of An African Games Warden : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. My Serengeti Years The Memoirs Of An African Games Warden : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
