My Now Is Your Surroundings Proceb As Object:

Zen and the Art of Subration Ashoka Annamaya Ishaya, 2019-04-15 *Zen and the Art of Subration* is a three part masterwork arising from the author's thirty five year journey to overcome cultural conditioning and achieve the ultimate transformation living on light and oxygen Ashoka Annamaya Ishaya shares an intimate look into how she discovered tantric and Taoist practices for cultivating immortality and integrated them into her life She follows up this first person account with a teaching guide distilling knowledge and practices aimed at readers on their own transformative path toward achieving your immortal jing cycle Ishaya believes that if a critical mass of humans commit to the process of sustainable immortality we can affect the evolution of our entire species Ishaya pursues an illuminating range of questions Are we as a species destined to be enlightened Can we apply mindfulness skills to evolve our physiology How can our health care system better support the maturation of our species Can we become an immortal species The treatise concludes with a scholarly overview of noted prophets from varied traditions and times who have taught and fostered transformation of consciousness and sustainability of culture

The Irreducible Reality of the Object Charles William Johns, 2020-08-17 This intriguing and compact book investigates whether or not philosophy can have a use in the face of capitalist realism today Can philosophy study everyday objects like computers and mobile phones Can it think of advertising the population electricity buildings and even dreams as objects in their own right which convey particular and novel qualities when analysed Johns book starts from an immanent phenomenological study of objects arguing that such objects disclose larger systems of anthropological meaning and control The author moves away from the Husserlian essence of the object and embeds his objects in a series of uses or equipment as Heidegger called it However Johns makes a speculative move by positing the very existence of such uses distinct from the human and first person phenomenological consciousness This is when the annals of phenomenology meet contemporary strands of realism such as Speculative and Object Oriented models For Johns the world is in a constant state of being utilised not merely through humans but through objects and their relations and not only on a macro scale but on a micro scale described by the theories of quantum physics The object then becomes a locus of use yet importantly one that can never be reduced to relations alone This is because the author believes that certain aspects of a relation withholds itself in its act of relating The mutual dynamics of relation and property are thus rearticulated in a new light This novel description of relation places Johns squarely between relational ontologies such as Deleuze Latour and Garcia and non relational ontologies Harman This work is invaluable to researchers and any reader of contemporary philosophy in the age of advanced technology and capitalism

New York Medical Journal, and Philadelphia Medical Journal ,1907 **The impact of UK overseas aid on environmental protection and climate change adaptation and mitigation** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2011-06-29 The Environmental Audit Committee states that the UK should only provide funding for multilateral institutions with strong environmental credentials The current scale of the World Bank's

lending to fossil fuel powered energy generation is unacceptable and the Committee urges the Government to be prepared to vote against new World Bank funding for high emissions coal fired power stations The profile of climate change has increased hugely but there is far less awareness of the importance of protecting biodiversity and ecosystems The Committee believes that the Department for International Development DFID needs to publish a clear strategy on its approach to environmental issues to ensure that it gives them sufficient priority in its programmes and expenditure Every effort must be made to help emerging economies leap frog fossil fuels and fuel their growth with clean energy instead High levels of consumption in the UK increases demand on production in poor countries which leads to degradation of their natural resources The report calls on the UK Government to ensure that economic activity in Britain does not cancel out or even reverse the positive impact that UK aid is having overseas
