My Other Neighborhood:

My Other Life Hildy Gard, 2022-11-03 My younger siblings often wanted to know about the house they were born to and the homeland's traditions and rituals I the oldest of five related to them the experiences we encountered among the Gottscheers who worked toiled and survived in this little known native land surrounded by Slovenia and bordered by Croatia

Arrival Neighborhoods in Europe since the mid-19th Century David Templin, 2024-08-26 This book uses the concept of arrival spaces to examine the relationship between migration processes social infrastructures and the transformation of urban spaces in Europe since the mid 19th century Case studies cover cities from London to Palermo and from Antwerp to St Petersburg including both metropolises and small towns The chapters examine the emergence of settlement patterns the functioning of arrival infrastructures and the public representations of neighborhoods which have been shaped by internal or international migrations By understanding these neighborhoods as spaces of arrival and as infrastructural hubs this volume offers a new perspective on the profound impact of migration on European cities in modern and contemporary history This volume makes a valuable contribution to both migration research and urban history and will be of interest to researchers and students studying the relationship between cities and migration in Europe's past and present

The Immigrant Other Rich Furman, Greg Lamphear, Douglas Epps, 2016-03-01 The immigrants profiled in *The Immigrant Other* shed light on a system designed to dehumanize and disenfranchise them and they describe the difficulty of finding shelter in an increasingly globalized and unsympathetic world They include Muslims facing discrimination from both the War on Terror and the War on Immigration Latino day laborers Filipino immigrants supporting themselves and their families back home and Brazilian parents terrified of being separated from their naturalized children Immigrants living in Spain Australia Greece and Qatar are also represented showcasing the similarities and differences in the treatment of immigrants worldwide Each chapter in this anthology pairs a description of specific state national and transnational immigration laws and regulations with the testimony of individuals struggling to find legitimacy and sanctuary among them

The Life and Afterlife of Gay Neighborhoods Alex Bitterman, Daniel Baldwin Hess, 2021-03-19 This open access book examines the significance of gay neighborhoods or gayborhoods from critical periods of formation during the gay liberation and freedom movements of the 1960s and 1970s to proven durability through the HIV AIDS pandemic during the 1980s and 1990s to a mature plateau since 2000 The book provides a framework for contemplating the future form and function of gay neighborhoods Social and cultural shifts within gay neighborhoods are used as a framework for understanding the decades long struggle for LGBTQ rights and equality Resulting from gentrification weakening social stigma and enhanced rights for LGBTQ people gay neighborhoods have recently become less gay following a 50 year period of resilience Meanwhile other neighborhoods are becoming more gay due to changing preferences of LGBTQ individuals and a propensity for LGBTQ families to form community in areas away from established gayborhoods The current plateau in the evolution of gay neighborhoods is

characterized by generational differences between Baby Boom pioneers and Millennials who favour broad inclusivity signaling various possible trajectories for the future afterlife of these important LGBTQ urban spaces The complicating impacts of the COVID 19 pandemic provides a point of comparison for lessons learned from gay neighborhoods and the LGBTQ community that bravely endured the onset of the HIV AIDS pandemic This book will be of interest to students and scholars in various disciplines including sociology social work anthropology gender and sexuality LGTBQ and queer studies as well as urban geography architecture and city planning and to policymakers and advocates concerned with LGBTQ rights and social justice

Police, Provocation, Politics Deniz Yonucu,2022-03-15 In *Police Provocation Politics* Deniz Yonucu presents a counterintuitive analysis of contemporary policing practices focusing particular attention on the incitement of counterviolence perpetual conflict and ethnosectarian discord by the state security apparatus Situating Turkish policing within a global context and combining archival work and oral history narratives with ethnographic research Yonucu demonstrates how counterinsurgency strategies from the Cold War and decolonial eras continue to inform contemporary urban policing in Istanbul Shedding light on counterinsurgency s affect and emotion generating divisive techniques and urban dimensions Yonucu shows how counterinsurgent policing strategies work to intervene in the organization of political dissent in a way that both counters existing alignments among dissident populations and prevents emergent ones Yonucu suggests that in the places where racialized and dissident populations live provocations of counterviolence and conflict by state security agents as well as their containment of both cannot be considered disruptions of social order Instead they can only be conceptualized as forms of governance and policing designed to manage actual or potential rebellious populations

From the Ground Up Rick Grannis, 2009-07-06 Where do neighborhoods come from and why do certain resources and effects such as social capital and collective efficacy bundle together in some neighborhoods and not in others From the Ground Up argues that neighborhood communities emerge from neighbor networks and shows that these social relations are unique because of particular geographic qualities Highlighting the linked importance of geography and children to the emergence of neighborhood communities Rick Grannis models how neighboring progresses through four stages when geography allows individuals to be conveniently available to one another when they have passive contacts or unintentional encounters when they actually initiate contact and when they engage in activities indicating trust or shared norms and values Seamlessly integrating discussions of geography household characteristics and lifestyle Grannis demonstrates that neighborhood communities exhibit dynamic processes throughout the different stages He examines the households that relocate in order to choose their neighbors the choices of interactions that develop and the exchange of beliefs and influence that impact neighborhood communities over time Grannis also introduces and explores two geographic concepts t communities and street islands to capture the subtle features constraining residents perceptions of their environment and community Basing findings on thousands of interviews conducted through door to door canvassing in the Los Angeles area as well as other neighborhood communities From the Ground Up reveals the different ways neighborhoods function and why these differences matter
