Thinking About Success Howard G. Adams, 1996-01-01

The Power of Mentors: A Guide to Finding and Learning from Your Ideal Mentor Penelope Trunk, 2012-10-23 NOTE FROM THE AUTHOR Understanding how to find mentors and how to leverage mentors is probably the single most underrated career skill People know they should have mentors They tell themselves they should work on that But for most of us getting a mentor doesn't reach the top of our to do list I have compiled these blog posts with

the hope that after you read them you will put getting a mentor at the top of your list It s not something that is just a phone call It s a process and like all big goals you need to work on it a little bit each day You are probably thinking What do I DO each day in order to get a mentor You ll find the answer to that question right here so keep reading There are three pieces to the mentor problem The first is making yourself believe that your career will never take off if you don t have good mentors The next thing is you need to be able to rope in a mentor Or three really Most people need three good mentors at any given time The next problem is how do you ask the right questions of a mentor so you keep the mentor engaged and feeling useful I have had many mentors throughout my career Some were accidental and some were people I stalked for years Some were people I hired career coaches can be a stand in for a mentor and some were people I fired you can learn a lot from someone you fire because they know how you can be a better boss I hope this set of blog posts will show you a path to making your career more fulfilling and inspiring by surrounding yourself with people who enjoy helping you Good luck Penelope BOOK EXCERPT Why You Need a Mentor Now Of course a good education and talent are keys to building a successful career but for most people school is over and the parameters of their talent were set on the day they were born So what can you do now to get ahead Get a mentor In fact get a stable of mentors for guidance on multiple aspects of your career Executives who have had mentors have earned more money at a younger age writes Gerard Roche senior chairman at the recruiting firm Heidrick Struggles Additionally his research shows those who have had mentors are happier with their career progress and derive greater pleasure from their work The majority of executives had mentors in their first five years of their career But finding a mentor is not easy For a lucky few mentors can be found through a privileged network of relatives family friends or your parents business associates For everyone else the search requires patience a clear focus and the self confidence to be a nudge Not everyone can depend on nepotism says Alisyn Camerota New York based correspondent for Fox News I got where I am by turning reluctant people into active mentors The easiest way to create allies is to build a reputation as an overachiever That s what Camerota did during an internship early on in her career at a Washington D C based news bureau After earning the respect of her boss throughout the summer she came to rely on her for advice and support Eventually Camerota felt empowered enough to walk into her office and say My internship ends in a week and I don t have a job Can I have all your contacts She said yes Camerota copied the whole Rolodex onto a legal pad by hand and cold called the contacts until someone agreed to interview her Those calls later led to a full time job Buy the Book to Read More *Mentor Myth* Debby Carreau, 2016-11-03 Mentors are over utilized under trained and as studies show under deliver From an employer s perspective assigning a mentor is often a band aid to a larger problem From an employee s perspective a lack of formal mentorship is seen as a serious career inhibiting problem the equivalent of sailing a boat without a rudder In *The Mentor Myth* Debby Carreau represents this dichotomy explaining that while a mentor s counsel can be invaluable it is not the silver bullet human resources professionals often purport it to be The opinions of a mentor are one data point one piece in the

much more complex game of navigating a career In fact the increasing overreliance on mentorship can actually be a hindrance to a successful career Instead of continually looking outward for career guidance aspiring professionals must realize that they possess all the tools necessary to take control of their own careers by using their own strengths capabilities and visions of success Through her years of experience consulting speaking and writing about career development Debby has created a comprehensive easy to implement guide for taking ownership of your professional success Debby begins by helping the reader create a professional roadmap including how to build a personal brand project the right amount of confidence and manage time She addresses mentors in the context of networks and sponsors advising the reader how to incorporate outward influences rather than be defined by them

Mentorship Rita S. Boags, 2008-08-05 Mentorship is the process of being in a mentoring partnership giving and receiving individualized specialized learning The mentoring partnership is formed between a person with much experience and knowledge the mentor and one with less knowledge experience and know how in a particular field or profession the mentee Through the extended dialogue between mentor and mentee observation feedback and coaching growth takes place for both parties Mentorship is as old as human behavior and applicable to any walk of life at any level and at any point in a person's career from student to CEO The goal of this book is to provide information that will motivate more working adults to become involved in mentorship and see this process as essential for achieving career success Readers of this book will learn that there are people with knowledge in every workplace who could help us to become more successful With the preparation that this book will provide we can become more observant and opportunistic and take advantage of the sea of knowledge that surrounds us Contrary to popular belief growth through mentorship is not an accident and does take effort Mentoring partners must learn to produce positive results for themselves whether they are in an organization with a mentoring program or an entrepreneur plying their trade alone Numerous examples drawn from real life mentoring relationships will give the reader a flavor for the benefits that can be derived from mentorship The information in this book has been culled from feedback reports of hundreds of mentee mentor pairs in formal programs and through interviews of participants in informal relationships The data and case studies are gathered from working adults ranging from metal shop workers and secretaries and clerks to senior vice presidents in companies
