The Oxford Handbook of the Science of Science Communication

Kathleen Hall Jamieson, Dan Kahan, Dietram A. Scheufele, 2017-05-17 The proposal to vaccinate adolescent girls against the human papilloma virus ignited political controversy as did the advent of fracking and a host of other emerging technologies. These disputes attest to the persistent gap between expert and public perceptions. Complicating the communication of sound science and the debates that surround the societal applications of that science is a changing media environment in which misinformation can elicit belief without corrective context and likeminded individuals are prone to seek ideologically comforting information within their own self constructed media enclaves. Drawing on the expertise of leading science communication scholars from six countries, *The Oxford Handbook of the Science of Science Communication* not only charts the media landscape from news and entertainment to blogs and films but also examines the powers and perils of human biases from the disposition to seek confirming evidence to the inclination to overweight endpoints in a trend line. In the process it draws together the best available social science on ways to communicate science while also minimizing the pernicious effects of human bias. The Handbook adds case studies exploring instances in which communication undercut or facilitated the access to scientific evidence. The range of topics addressed is wide from genetically engineered organisms and nanotechnology to vaccination controversies and climate change. Also unique to this book is a focus on the complexities of involving the public in decision making about the uses of science, the regulations that should govern its application and the ethical boundaries within which science should operate. The Handbook is an invaluable resource for researchers in the communication fields particularly in science and health communication as well as to scholars involved in research on scientific topics susceptible to distortion in partisan debate.

Inside a U.S. Embassy Shawn Dorman, 2011 *Inside a U.S. Embassy* is widely recognized as the essential guide to the Foreign Service. This all new third edition takes readers to more than fifty U.S. missions around the world introducing Foreign Service professionals and providing detailed descriptions of their jobs and firsthand accounts of diplomacy in action. Time and Space in Literacy Research Catherine Compton-Lilly, Erica Halverson, 2014-04-24 Literacy researchers interested in how specific sites of learning situate students and the ways they make sense of their worlds are asking new questions and thinking in new ways about how time and space operate as contextual dimensions in the learning lives of students, teachers and families. These investigations inform questions related to history, identity, methodology in school and out of school spaces and local/global literacies. An engaging blend of methodological, theoretical and empirical work featuring well known researchers on the topic, this book provides a conceptual framework for extending existing conceptions of context and provides unique and ground breaking examples of empirical research.

Learning Space Jeremy Delamarter, 2025-01-13 As a genre, science fiction is uniquely

suited for highlighting and modeling the basic tenets of critical pedagogy that branch of educational philosophy and theory devoted equally to 1 exposing the hidden power structures embedded in educational practice and 2 articulating equitable and sustainable alternatives The science fiction novum that is the technological or scientific newness found within the text serves as a catalyst not only within the textual universe but also potentially within the universe of the reader New questions arise Previously hidden beliefs come to light Tacit assumptions are exposed The unfamiliar nova of science fiction can lead to new interrogations of our own all too familiar surroundings causing us to see our previously unquestioned worlds in a new way These new understandings are at the heart of critical pedagogy The learning spaces within science fiction texts can expose the fault lines within the educational structures of the real world Questions about what it means to be human about the proper limits of technological power or about the relationships and obligations of one species to another have profound implications for 21st century educators and learners particularly those who are interested in creating just and equitable learning spaces Learning Space Exploring Critical Pedagogy through Science Fiction draws on popular science fiction stories to provide current and future educators with the language concepts vocabulary and practices to cast a critical lens upon their own learning spaces and their own pedagogical practices For example a critical examination of the way that Yoda trains Luke Skywalker in *The Empire Strikes Back* reveals a great deal about the insidious nature of deficit thinking assuming that students learn best when they empty their minds and remain passive The assumed hierarchical power structure between teacher and student and the assumed relationship between learners and the knowledge with which they are supposed to be filled all of these are called into question when viewed through a critical lens The more we recognize the injustice in Yoda's pedagogy the more we might begin to see it in our own Similarly Isaac Asimov's classic *Foundation* trilogy imagines a world in which mathematical modeling and statistical computation are used not only to predict what people might do but instead to determine what they should do This kind of algorithmic determinism is unfortunately common in contemporary education and yet far too few educators and learners recognize just how much of their own agency has been given over to the machines By highlighting the algorithmic inequities in the world of Asimov's text we begin to recognize similar inequities at play in our own world Ultimately this book uses science fiction to highlight educational inequities in such wide ranging topics as standard English literary canons machine learning notions of academic dishonesty epistemicide inequitable school discipline and more More importantly however it provides a framework for moving forward giving current and future educators the critical knowledge and skills both to recognize pedagogical injustice and to create viable just and sustainable alternatives
