Feynman, 2025-04-29 A treasure trove of illuminating and entertaining quotations from beloved physicist Richard P Feynman Some people say How can you live without knowing I do not know what they mean I always live without knowing That is easy

How you get to know is what I want to know Richard P Feynman Nobel Prize winning physicist Richard P Feynman 1918 88 was that rarest of creatures a towering scientific genius who could make himself understood by anyone and who became as famous for the wit and wisdom of his popular lectures and writings as for his fundamental contributions to science The Quotable Feynman is a treasure trove of this revered and beloved scientist's most profound provocative humorous and memorable quotations on a wide range of subjects Carefully selected by Richard Feynman's daughter Michelle Feynman from his spoken and written legacy including interviews lectures letters articles and books the quotations are arranged under two dozen topics from art childhood discovery family imagination and humor to mathematics politics science religion and uncertainty These brief passages about 500 in all vividly demonstrate Feynman's astonishing yet playful intelligence and his almost constitutional inability to be anything other than unconventional engaging and inspiring The result is a unique illuminating and enjoyable portrait of Feynman's life and thought that will be cherished by his fans at the same time that it provides an ideal introduction to Feynman for readers new to this intriguing and important thinker The book features a foreword in which physicist Brian Cox pays tribute to Feynman and describes how his words reveal his particular genius a piece in which cellist Yo Yo Ma shares his memories of Feynman and reflects on his enduring appeal and a personal preface by Michelle Feynman It also includes some previously unpublished quotations a chronology of Richard Feynman's life some twenty photos of Feynman and a section of memorable quotations about Feynman from other notable figures Features Approximately 500 quotations some of them previously unpublished arranged by topic A foreword by Brian Cox reflections by Yo Yo Ma and a preface by Michelle Feynman A chronology of Feynman's life Some twenty photos of Feynman A section of quotations about Feynman from other notable figures Some notable quotations of Richard P Feynman The thing that doesn't fit is the most interesting Thinking is nothing but talking to yourself inside It is wonderful if you can find something you love to do in your youth which is big enough to sustain your interest through all your adult life Because whatever it is if you do it well enough and you will if you truly love it people will pay you to do what you want to do anyway I'd hate to die twice It's so boring

Bethe, 1997 Hans Bethe received the Nobel Prize for Physics in 1967 for his work on the production of energy in stars He helped to shape classical physics into quantum physics and increase the understanding of the atomic processes responsible for the properties of matter and of the forces governing the structures of atomic nuclei This collection of papers by Hans Bethe dates from 1928 when he received his PhD to the present
