New Directions in Psychohistory Mel Albin, Robert James Devlin, Gerald A. Heeger, 1980 Psychological Undercurrents of History Henry Lawton, Jerry S. Piven, 2001 Psychological Undercurrents of History gathers together salient works of scholarship which endeavor to interpret the madness and imagination of our past from ancient religion to the Holocaust to Millennialism and Apocalyptic violence New Directions in European Historiography Georg G. Iggers, 1984-07 Impressive analytical essays on the transformation of historical studies in Europe In four impressively researched essays Georg Iggers recounts the transformation of historical studies in Europe during the twentieth century with particular emphasis on the historiography of the past fifteen years Although the book does survey a broad area of contemporary historical thought it is primarily a careful analytical examination of the methodological and theoretical reorientation of certain influential European historians The first essay discusses the emergence at German Universities during the eighteenth and nineteenth centuries of the concept of history as a scientific discipline distinct from the classical tradition of literary history and the later broad acceptance of this mode of Enquiry in the Western world Against this background Mr Iggers then considers the challenge to this mode of the political social and intellectual upheavals of the twentieth century especially after World War II The three essays following examine important attempts to develop alternate paradigms for historical study the French historians of the Annales tradition the German political historians of the 1960s the various Marxist historians of France Poland East Germany and Great Britain In despite of the frequent insistence by philosophers and theorists of history that history is not a science in contemporary terms historians themselves have striven in recent years to strengthen the quantitative aspects of historical study moving away from traditional patterns of writing and adopting methods and concepts from the systematic social sciences Mr Iggers book is an excellent introduction to these contemporary changes in historiography and in its comparative analyses itself makes a contribution to historical studies

The Leader: Psychohistorical Essays Charles B. Strozier, Daniel Offer, 2013-11-11

PETER GAY The syllabus of errors rehearsing the offenses of psychohistory looks devastating and seems irrefutable crimes against the English language crimes against scientific procedures crimes against common sense itself These objects are real enough but their contours and their gravity mysteriously change with the perspective of the critic From the outside psychohistorians are to academic history what psychoanalysts are to academic psychology a monolithic band of fanatics making the same errors committing the same offenses all in the same way But seen close up psychohistorians just like psychoanalysts turn out to be a highly differentiated even a cheerful contentious lot Disciples of Hartmann jostle discoverers of Kohut imperialists claiming the whole domain of the past debate with modest isolationists orthodox Freudians who insist that psychoanalysis engrosses the arsenal of psychohistorical method find themselves beleaguered by sociological revisionists The charges that confound some psychohistorians glance off the armor of others Yet there are three potent objections aimed at the heart of psychohistory however it is conceived that the psychohistorian ignores at his peril It would be a convenient but it is a wholly unacceptable defense to dismiss them as forms of resistance The days are gone when the advocates of psychoanalysis could checkmate reasoned criticisms by psychoanalyzing the critic To summarize these objections psychohistory is Utopian vulgar ix x

New Directions in Psychohistory, **The Mass Psychology of Ethnonationalism** Dusan Kecmanovic, 2013-11-11

Throughout the nineteenth and twentieth centuries ethnonationalism has left its indelible mark on Europe and every other continent The latest events in the Balkans in central and eastern Europe and in the former Soviet Union unequivocally testify to the power and influence of ethnonationalism at the end of the second millennium What forces make people so committed to their ethnonational groups that they are ready to ignore all other concerns first and foremost the rights and interests of people of other ethnicities What is the social psychological and anthropological underpinning of ethnonationalism And finally why and how do people adhere to nationalist attitudes and beliefs These questions are virtually impossible to avoid for anyone who has directly felt the impact of ethnonationalism but they also present themselves to anyone who has indirectly experienced the prejudices unleashed by

ethnonationalist forces This book attempts to answer all these questions by focusing on national feeling and the social psychological and anthropological foundations that underly the sense of belonging that is essential to nationalism No matter how qualitatively different nationalist attitudes and beliefs are from national sentiment the latter has to be considered in any study of nationalism
