New Eco Architecture Alternatives From The Modern Movement:

The New Eco-Architecture: Alternatives from the Modern Movement Colin Porteous,2013-10-11 The New Eco Architecture builds a historical bridge between architectural science and design It seeks to address neglected aspects of the Modern Movement as a prelude to supporting a diversity of architectural insight and experimentation aimed at twenty first century environmental needs and priorities The attitudes and influences of renowned figures are re examined in relation to current issues of architectural sustainability By setting today s green architectural quest within a twentieth century context and evaluating the main protagonists with regard to a modern eco sensitive lineage the book will be of primary interest to architectural students academics and practitioners However it should also intrigue historians theoreticians and critics who tend to gloss over such issues as well as other disciplines engaged with the built environment The New Eco-architecture Colin Porteous,Crichton Porteous,2009 From Bauhaus to Ecohouse Peder Anker,2010 Debates about environmentally sensitive architecture have been ongoing for nearly a century From Bauhaus to Eco House examines key moments of inspiration and exchange between designers and ecologists from the Bauhaus projects of the interwar period to the eco arks of the late 1980s From Bauhaus to Eco House provides new insight into a critical period in the evolution of environmental awareness and design **Energy Accounts** Dan Willis,William Braham,Katsuhiko Muramoto,Daniel Barber,2016-06-23 How does one tell the story of energy production use or conservation in a manner sufficiently convincing to influence policy behavior and design Energy Accounts explores potential answers to this question through compelling images data visualizations narratives and other examples of accounting for energy Organized into a collection containing both examples of best practices and critiques this impressive array of projects and contributors combines text and graphic material to explore different representations of energy data Including work from Kieran Timberlake SHoP AMO Lateral Office WOHA and many more the book boasts a unique graphic design which supports and enhances its role as a valuable resource for professionals and students in architecture engineering and urban design **Chemistry, Emission Control, Radioactive Pollution and Indoor Air Quality** Nicolas Mazzeo,2011-07-27 The atmosphere may be our most precious resource Accordingly the balance between its use and protection is a high priority for our civilization While many of us would consider air pollution to be an issue that the modern world has resolved to a greater extent it still appears to have considerable influence on the global environment In many countries with ambitious economic growth targets the acceptable levels of air pollution have been transgressed Serious respiratory disease related problems have been identified with both indoor and outdoor pollution throughout the world The 25 chapters of this book deal with several air pollution issues grouped into the following sections a air pollution chemistry b air pollutant emission control c radioactive pollution and d indoor air quality **Eco-Architecture VI** V. Echarri,C. A. Brebbia,2016-08-31 Comprising of the proceedings of the Sixth International Conference on Harmonisation between Architecture and Nature the papers deal with topics such as building technologies

design by passive systems design with nature cultural sensitivity life cycle assessment resources and rehabilitation as well as many others This book follows five successful meetings which started in the New Forest UK in 2006 then followed in the Algarve 2008 A Coruna 2010 Kos 2012 and Siena Italy 2014 Eco Architecture signifies a new approach to the design process intended to harmonise its products with nature This involves concepts such as minimum use of energy at each stage of the building process taking into account the amount required during the extraction and transportation of materials their fabrication assembly building formation maintenance and eventual future recycling The adaptation of the architectural design to the natural environment is another important issue The book will be of interest to architects engineers planners physical scientists sociologists and economists and contained within these proceedings are case studies from many different places around the world Topics covered consist of Design with nature Energy efficiency Tall buildings and environment Ecological impacts of materials Biomaterials Bioclimatic design Water quality Green facades Ecological Education and training Adapted reuse Transformative design Sustainability indices in architecture Bioclimatic design and passive systems Recycle reuse reduce and recovery Mixing it up and building flexibility Architectural visualisation and New techniques building information modelling Solar Architecture in Cool Climates Colin Porteous,2012-04-27 A must read for practitioners teachers and others interested in or working with energy use in the built environment including a delightful set of examples Ann Grete Hestnes former President of the International Solar Energy Society Solar Architecture in Cool Climates is an invaluable primer on low energy building design combining accessible information with convincing arguments enabling new techniques to be implemented in daily practice Approaching the topic in a thematic manner the book provides inspiration an understanding of key principles and technical data on the design of solar buildings in higher latitudes The text is enlivened through direct experience of case studies from Europe and North America dealing with new build retrofitting and conceptual projects that outline future potential the principles being equally applicable to equivalent southern latitude locations The authors examine the dilution of additional costs through different strategies the tensions between energy efficiency and environmental quality and the proactive control of energy in building design Promoting flexibility and opportunity to a diverse audience including those who use procure and finance buildings the book aims to bring the design of green solar buildings in cool climates from special interest status into the mainstream Broader environmental issues relating to solar architecture are addressed in the final chapter again drawing on case studies from the authors own wide experience Solar Architecture in Cool Climates is written for architects and other building designers students of architecture and other professionals interested in sustainable architecture renewable energy and engineering *Phygital Intelligence* Chao Yan,Hua Chai,Tongyue Sun,Philip F. Yuan,2024-01-03 This open access book is a compilation of selected papers from 2023 DigitalFUTURES The 5nd International Conference on Computational Design and Robotic Fabrication CDRF 2023 The work focuses on novel techniques for computational design and robotic fabrication The contents make valuable contributions to

academic researchers designers and engineers in the industry As well readers will encounter new ideas about understanding intelligence in architecture

Housing Fit For Purpose Fionn Stevenson,2019-10-22 Housing Fit for Purpose sets out a research focused approach to looking at the challenges facing the built environment in approaching the design construction and management of housing This book uses original research by the author on housing performance evaluation and distils it for built environment professionals arguing that learning from feedback should be taking place at every stage of the housing project lifecycle improving outcomes for end users Drawing on active research this book shows why and how the design construction and management of housing can be linked to feedback and actual evidence of how people choose and learn to use their homes It examines the key concepts which underlie participatory design occupancy feedback and learning and includes a practical primer on how to undertake housing occupancy feedback

Precedented Environmental Futures Colin Porteous,2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment
