New Frontiers In Cognitive Aging:

New Frontiers in Cognitive Aging Roger A. Dixon, Lars Bäckman, Lars-Göran Nilsson, 2004 With an ever increasing population of aging people in the western world it is more crucial than ever that we try to understand how and why cognitive competence breaks down with advancing age why do some people follow normal patterns of cognitive change while others follow a path of progressive decline with neurodegenerative diseases such as Alzheimer's What can be done to prevent cognitive decline or to avoid neurodegenerative diseases The answers if they come will not emerge from research within one discipline but from work being done across a range of scientific and medical specialities This volume brings together leading experts from a range of fields studying cognitive aging including neuroscience pharmacology health genetics sensory biology and epidemiology Unlike other books in this area this book is more about new frontiers than past research and accomplishments Recently cognitive aging research has taken several new directions linking with and benefiting from rapid technological and theoretical advances in these neighbouring disciplines This book provides unique interdisciplinary coverage of the topic With each chapter including commentaries from specialists in related fields the book provides an integrative study of the topic For those within the fields of psychology cognitive neuroscience and geriatrics this volume will make an important contribution in furthering our understanding of a problem that affects us all

Handbook of Cognitive Aging Scott M. Hofer, Duane F Alwin, 2008-03-20 Provides a unique perspective I am particularly impressed with the sections on innovative design and methods to investigate cognitive aging and the integrative perspectives None of the existing texts covers this material to the same level Donna J La Voie Saint Louis University The emphasis on integrating the literature with theoretical and methodological innovations could have a far reaching impact on the field Deb McGinnis Oakland University The Handbook of Cognitive Aging Interdisciplinary Perspectives clarifies the differences in patterns and processes of cognitive aging Along with a comprehensive review of current research editors Scott M Hofer and Duane F Alwin provide a solid foundation for building a multidisciplinary agenda that will stimulate further rigorous research into these complex factors Key Features Gathers the widest possible range of perspectives by including cognitive aging experts in various disciplines while maintaining a degree of unity across chapters Examines the limitations of the extant literature particularly in research design and measurement and offers new suggestions to guide future research Highlights the broad scope of the field with topics ranging from demography to development to neuroscience offering the most complete coverage available on cognitive aging
