Geographical Inquiry and American Historical Problems Carville Earle, 1992 Geography's mission is to comprehend changes on the earth's surface and toward that end geographers ponder the interactive effects of nature and culture within specific locations and times. This entails connecting human actions, historical events with their immediate environs, ecological inquiry and specific coordinates of place and region, locational inquiry. Most of the essays in this volume employ the variant of ecological inquiry the author calls the staple approach focusing on primary production, agriculture, forestry, fishing and its societal ramifications. Locational inquiry queries the spatial distribution of historical events. Why was mortality in early Virginia highest in a small zone along the James River? Why did cities flourish in early Pennsylvania, Massachusetts and Carolina and not elsewhere along the Atlantic seaboard? Why was Boston the vanguard of the American Revolution?

Population, Welfare and Economic Change in Britain 1290-1834 Chris Daniel Briggs, P. M. Kitson, Stephen J. Thompson, 2014. Presents the latest research on the causes and consequences of British population change from the medieval period to the eve of the Industrial Revolution in both town and countryside. *Population Welfare and Economic Change* presents the latest research on the causes and consequences of British population change from the medieval period to the eve of the Industrial Revolution in both town and countryside. Its overarching concern is with the economic and demographic decision making of individuals and groups and the extent to which these were constrained by institutions and resources. Within this the volume's particular focus is on population growth, its causes and the welfare challenges it posed. Several chapters investigate the success with which the English Old Poor Law provided care for the poor and elderly and new work on alternative welfare institutions such as almshouses is also presented. A further distinctive feature of this book is its comparative perspective. By making systematic comparisons between economic and demographic developments in pre-industrial Britain and those taking place in various regions of contemporary Continental Europe and Russia, several chapters uncover how far Britain in this period was different. Stimulating to experts and students alike, *Population Welfare and Economic Change* offers overviews and summaries of the latest scholarship by leading economic historians and historical demographers alongside detailed case studies which showcase the original research of younger scholars. Chris Briggs is Lecturer in Medieval British Economic and Social History at the University of Cambridge and a Fellow of Selwyn College. P. M. Kitson is a former Research Associate at the Cambridge Group for the History of Population and Social Structure and a Fellow of Downing College, Cambridge. S. J. Thompson is a former J. H. Plumb Fellow and Director of Studies in History at Christ's College, Cambridge. **CONTRIBUTORS** Lorraine Barry, Jeremy Boulton, Chris Briggs, Bruce M. S. Campbell, Tracy Dennison, Nigel Goose, R. W.
