How did the new technologies of WWI affect soldiers fighting on the front lines?

The new technologies of World War One affected the soldiers fighting on the front line because they had high-powered weapons that did a lot more damage. The soldiers used everything they had to fight off their enemies such as tanks, machine guns, etc. Front-line soldiers were risking their lives because of their limited protection. One of the new firing guns was automatic. The guns in World War One were fired in a special way, you needed to hold the burning wick into the "touch hole" to the barrel igniting the gunpowder.

How did women get involved in the war effort abroad?

Women got involved in the war because since the men were in the war the women had to take their jobs. Women also had to care for the men in the war when they had gotten sick or injured. As many as 21,000 women joined one of these Nurse Corps and served overseas. Two hundred women traveled to Europe to work as telephone operators in the Army Signals Corps. Many African Women volunteered with the American Red Cross to help with these efforts.

How was the war experience of a minority soldier different from that of a white soldier?

During this time of the war, minorities were being discriminated against. Over 350,000 African Americans joined. Many of them were given jobs, such as digging ditches and transporting goods. African Americans and Hispanics had hard times due to a lack of skill/language. Many races were segregated during their draft to the war.
