Politics of Opportunity Allocation: The Workplace and the Law Bernard R. Gifford, 2012-12-06 Bernard R Gifford In the United States the standardized test has become one of the major sources of information for reducing uncertainty in the determination of individual merit and in the allocation of merit based educational training and employment opportunities Most major institutions of higher education require applicants to supplement their records of academic achievements with scores on standardized tests Similarly in the workplace as a condition of employment or assignment to training programs more and more employers are requiring prospective employees to sit for standardized tests In short with increasing frequency and intensity individual members of the political economy are required to transmit to the opportunity marketplace scores on standardized examinations that purport to be objective measures of their and potential In many instances these test scores are the abilities talents only signals about their skills that job applicants are permitted to send to prospective employers THE NATIONAL COMMISSION ON TESTING AND PUBLIC POLICY In view of the importance of these issues to our current national agenda it was proposed that the Human Rights and Governance and the Education and Culture Programs of the Ford Foundation support the establishment of a blue ribbon National Commission on Testing and Public

Advances in Econometrics and Modelling B. Raj, 2013-03-09 During 1985-86 the acquisition editor for the humanities and social sciences division of Kluwer Academic Publishers in the Netherlands visited the University of Florida where I was also visiting while on sabbatical leave from Wilfrid Laurier University as the McKethan Matherly Senior Research Fellow to discuss publishing plans of the faculty He expressed a keen interest in publishing the proceedings of the conference of the Canadian Econometric Study Group CESG that was to be held the following year at WLU This volume is the end product of his interest, endurance and persistence But for his persistence I would have given up on the project Most of the papers though not all included in this volume are based on presentations at CESG conferences In some cases scholars were invited to contribute to this volume where their research complimented those presented at these conferences even though they were not conference participants Since papers selected for presentation at the CESG conferences are generally the finished product of scholarly research and often under submission to refereed journals it was not possible to publish the conference proceedings in their entirety Accordingly it was decided in consultation with the publisher to invite a select list of authors to submit significant extensions of the papers they presented at the CESG conferences for inclusion in this volume The editor wishes to express gratitude to all those authors who submitted their papers for evaluation by anonymous referees and for making revisions to conform to our editorial process
