Encyclopedia of Jewish Medical Ethics Fred Rosner, 2003 Ethical issues in modern medicine are of great concern and interest to all physicians and health care providers throughout the world as well as to the public at large Jewish scholars and ethicists have discussed medical ethics throughout Jewish history *Medical Ethics* Kerryn Phelps, Craig Hassel, 2012-10-31

Medical Ethics General Practice The Integrative Approach Series Ethics is a word derived from the Greek *ethikos* which means habit or custom Put simply in modern usage it is the study of how we ought to live or act in response to the situations confronting us in daily life Medical ethics in particular is a branch of bioethics and is the study of how we ought to live or act as doctors Ethics being a branch of philosophy relates to things such as right wrong duty and morality Making decisions of an ethical nature in medical practice is often difficult and demanding and the clinician has to balance medical considerations with legal and moral ones Taking the time to reflect upon ethical issues and having a structured approach to doing this can help clinicians to navigate through many potentially challenging situations Not taking time for this can compound ethical and moral concerns This has effects upon our wellbeing and can also have medico legal implications As with many medico legal dilemmas ethical problems are often compounded by poor communication This chapter does not present a detailed analysis of particular and complex bioethical issues such as euthanasia stem cell research or abortion Nor does it make concrete pronouncements about the correct view on given topics or course of action in given situations It does however give an overview of generic ethical terms concepts and methods that can be applied by the clinician to particular situations We are interested here in applied ethics and not simply theoretical ethics or meta ethics *Medical Ethics Education: An Interdisciplinary and Social Theoretical Perspective* Nathan Emmerich, 2013-07-01 There is a diversity of ethical practices within medicine as an institutionalised profession as well as a need for ethical specialists both in practice as well as in institutionalised roles This Brief offers a social perspective on medical ethics education It discusses a range of concepts relevant to educational theory and thus provides a basic illumination of the subject Recent research in the sociology of medical education and the social theory of Pierre Bourdieu are covered In the end the themes of Bourdieuan Social Theory socio cultural apprenticeships and the characterological turn in medical education are drawn together the context of medical ethics education

Medical Ethics: A Very Short Introduction Tony Hope, 2004-09-23 Issues in medical ethics are rarely out of the media and it is an area of ethics that has particular interest for the general public as well as the medical practitioner This short and accessible introduction provides an invaluable tool with which to think about the ethical values that lie at the heart of medicine Tony Hope deals with the thorny moral questions such as euthanasia and the morality of

killing and also explores political questions such as how should health care resources be distributed fairly Each chapter in this book considers a different issue genetics modern reproductive technologies resource allocation mental health medical research and discusses controversial questions such as Who should have access to reproductive technology Who should pay Is it right to fund expensive drug treatment for individuals Should active euthanasia be legalized Should treatment for mental illness be imposed on patients without their consent Who should have access to information from genetic testing Should we require consent for the use of dead bodies or organs in medical research ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Bioethics Stephen
Holland, 2016-12-27 This book provides a clear and comprehensive introduction to contemporary bioethics It also presents provocative philosophically informed arguments on current bioethical issues Holland engages with debates ranging from the more familiar such as euthanasia advance decisions to refuse treatment and new reproductive technologies to the philosophical implications of recent developments in genetics including prenatal genetic therapy genetic enhancement and human cloning The book is built around four crucial themes The first is moral status what are the implications of the moral status of human embryos or animals for our biomedical practices The second theme life death and killing looks at the ethics of ending or failing to lengthen human life Holland then explores various questions of personal identity raised in contemporary bioethical debates Finally he presents and develops a version of the argument from nature which continues to be influential in bioethics in order to make sense of the objection that some biomedical innovations are unnatural Structuring the discussions in this way creates an engaging introduction to bioethics that is an ideal textbook for students whilst offering

much to stimulate colleagues in the field This second edition has been thoroughly and comprehensively updated to reflect the most recent advances in bioethics and includes an entirely new chapter on the ethical treatment of patients in the minimally conscious state

The Ethics of Rapid Tissue Donation (RTD) Chiara Mannelli, 2021-02-11 This book offers a reflection on the central role that the ethics of informed consent plays in Rapid Tissue Donation RTD RTD is an advanced oncology procedure that involves the procurement for research purposes of fresh tissues within two to six hours of a cancer patient's death Since RTD involves the retrieval of tissues after death and since the collected tissues are of great importance for medical research the need for any form of informed consent to regulate this procedure has been questioned This book argues for the necessity of informed consent to govern RTD and it provides the reader with a bespoke informed consent process applicable to cancer patients The analysis unfolds at the intersection between applied ethics public health ethics and clinical ethics and it is informed by philosophical theories of informed consent and by the social implications of individual choices By viewing medical issues relating to informed consent in oncology from an ethical perspective the book combines philosophical analysis with discussion of concrete cancer related issues As a result the book is suitable for readers interested in ethical reasoning as well as for those with a medical background It contributes to contemporary research by offering an original analysis that relies on a rigorous philosophical approach to address innovative issues at the cutting edge of medical research and policy making
