New Dimensions Original Science Fiction Nos 1 14:

Multispecies Storytelling in Intermedial Practices Ida Bencke, Jørgen Bruhn, 2022-03-08 Multispecies Storytelling in Intermedial Practices is a speculative endeavor asking how we may represent relay and read worlds differently by seeing other species as protagonists in their own rights What other stories are to be invented and told from within those many tongued chatters of multispecies collectives Could such stories teach us how to become human otherwise Often the human is defined as the sole creature who holds language and consequently is capable of articulating representing and reflecting upon the world And yet the world is made and remade by ongoing and many tongued conversations between various organisms reverberating with sound movement gestures hormones and electrical signals Everywhere life is making itself known heard and understood in a wide variety of media and modalities Some of these registers are available to our human senses while some are not Facing a not so distant future catastrophe which in many ways and for many of us is already here it is becoming painstakingly clear that our imaginaries are in dire need of corrections and replacements How do we cultivate and share other kinds of stories and visions of the world that may hold promises of modest yet radical hope If we keep reproducing the same kind of languages the same kinds of scientific gatekeeping the same kinds of stories about our place in nature we remain numb in the face of collapse Multispecies Storytelling in Intermedial Practices offers steps toward a self critical multispecies philosophy which interrogates and qualifies the broad and seemingly neutral concept of humanity utilized in and around conversations grounded within Western science and academia Artists activists writers and scientists give a myriad of different interpretations of how to tell our worlds using different media and possibly gives hints as to how to change it too

Design for Doctor Who Piers D. Britton, 2021-05-20 The long running popular TV series Doctor Who is Piers Britton argues a uniquely design intensive text its time and space travel premise requires that designers be tirelessly imaginative in devising new worlds and entities and recreating past civilizations While Doctor Who s attempts at worldbuilding are notorious for being hit and miss old jokes about wobbly walls and sink plungers die hard the distinctiveness of the series design imagery is beyond question And over the course of six decades Doctor Who has produced designs which are not only iconic but in being repeatedly revisited and updated have proven to be an ever more important element in the series identity and mythos In the first in depth study of Doctor Who s costumes sets and graphics Piers Britton offers an historical overview of both the original and the revived series explores theoretical frameworks for evaluating Doctor Who design and provides detailed analysis of key images Case studies include the visual morphology of Doctor Who s historical adventures the evaluative character of cosplay and the ongoing significance for the Doctor Who brand of such high profile designs as the Daleks and the TARDIS interior the time tunnel title sequence and the costumes of the Fourth and Thirteenth Doctors
