

## NEW DIRECTIONS IN SOCIAL DISORGANIZATION THEORY

CHARIS E. KUBRIN  
RONALD WEITZER

*Social disorganization theory focuses on the relationship between neighborhood structure, social control, and crime. Recent theoretical and empirical work on the relationship between community characteristics and crime has led to important refinements of social disorganization theory, yet there remain some substantive and methodological deficiencies in this body of work. This article addresses these problems and charts some promising new directions in social disorganization theory.*

**Keywords:** *social disorganization; social control; neighborhood crime*

Unlike theories centered on “kinds of people” explanations for crime, social disorganization theory focuses on the effects of “kinds of places”—specifically, different types of neighborhoods—in creating conditions favorable or unfavorable to crime and delinquency. *Social disorganization* refers to the inability of a community to realize common goals and solve chronic problems. According to the theory, poverty, residential mobility, ethnic heterogeneity, and weak social networks decrease a neighborhood’s capacity to control the behavior of people in public, and hence increase the likelihood of crime. The theory was first advanced by Clifford Shaw and Henry McKay (1969/1942), who discovered that high delinquency rates persisted in certain Chicago neighborhoods for long periods of time despite changes in the racial and ethnic composition of these communities—a finding that led to the conclusion that neighborhood ecological conditions shape crime rates over and above the characteristics of individual residents.

The theory fell out of favor in subsequent years, but it has experienced a revival in the past two decades beginning with the seminal works of Kornhauser (1978), Stark (1987), Bursik (1988), Sampson and Groves

## **New Directions In Economic Psychology Theory Experiment And Application:**

**New Directions in Economic Psychology** S. E. G. Lea, Paul Webley, Brian M. Young, 1992      New Directions in Economic Psychology S. E. G. Lea, Paul Webley, Brian M. Young, 1992 This unique up to date volume features new essays by prominent economists and psychologists working at the frontiers of the subject A number of these essays probe beliefs about rationality consumer behaviour and expectations while others assess psychological explanations of economic behaviour and the contribution of experimental economics      Freud, Psychoanalysis, Social Theory Fred Weinstein, 2001-01-01 Discusses the reasons for the decline of the cultural influence of psychoanalysis      **Essays on Economic Psychology** Hermann Brandstätter, Werner Güth, 2012-12-06 Economic behavior is explored from a psychological perspective by both prominent economic psychologists with a long tradition in studying economic problems as well as economists who are open and interested in the psychological aspects of economic behavior The contributions discuss the prospects and difficulties of this dialogue between psychology and economics and survey some important areas of research where such an interdisciplinary approach has proved to be successful The text can also be used to introduce psychology to economists in order to give them an idea how to analyze economic problems from a psychological perspective It also indicates many urgent and exciting research topics awaiting eager scholars to carry on the dialogue      *The Elgar Companion to Consumer Research and Economic Psychology* Peter E. Earl, Simon Kemp, 2002-01-01 Presents over 100 specially commissioned entries on important topics in consumer research and economic psychology from behaviourism and brand loyalty to trust and the psychology of tourism Leading scholars in the fields provide stimulating insights into the area as well as summarising existing knowledge      *The Economic Psychology of Everyday Life* Paul Webley, Carole Burgoyne, Stephen Lea, Brian Young, 2002-01-04 From childhood through to adulthood retirement and finally death The Economic Psychology of Everyday Life uniquely explores the economic problems all individuals have to solve across the course of their lives Webley Burgoyne Lea and Young begin by introducing the concept of economic behaviour and its study They then examine the main economic issues faced at each life stage including the impact of advertising on children buying a first house and setting up home changing family roles and gender linked inequality redundancy and unemployment coping on a pension obituaries wills and inheritance Finally they draw together the commonalities of economic problems across the lifespan discuss generational and cultural changes in economic behaviour and examine the significance of other non economic constraints upon individuals The Economic Psychology of Everyday Life provides a much needed comprehensive and accessible guide to economic psychology which will be of great interest to researchers and students      **Psychology in Economics and Business** Gerrit Antonides, 2012-12-06 Psychology in Economics and Business is the first textbook in economic psychology that is targeted at students of economics and business administration It describes the experiments and explains the psychological background associated with the topics The book presents the state of the art in behavioral economics and economic psychology and their applications to

economics and business The first part organizes economic psychological themes within a common paradigm The applications belong to a great variety of fields in economic psychology including entrepreneurial behavior perceptions of price risk inflation and economic activities economic socialization demand theory attitudes and brand images decision making and heuristics economic expectations well being poverty and consumer satisfaction The second part deals with information processing in a wider sense The psychological principles of consistency and attribution are dealt with and recent developments in rationality and choice under uncertainty are considered A chapter on game theory focuses on psychological factors in several social dilemmas Strategies and tactics in human interaction are dealt with in a chapter on negotiation behavior The chapter on economic psychological methods deals with the acquisition of knowledge from the observation of economic behavior in reality and in experimental settings

**Bounded Rationality and Public Policy** Alistair Munro, 2009-06-10 This book is about bounded rationality and public policy It is written from the perspective of someone trained in public economics who has encountered the enormous literature on experiments in decision making and wonders what implications it has for the normative aspects of public policy Though there are a few new results or models to a large degree the book is synthetic in tone bringing together disparate literatures and seeking some accommodation between them It has had a long genesis It began with a draft of a few chapters in 2000 but has expanded in scope and size as the literature on behavioural economics has grown At some point I realised that the geometric growth of behavioural search and the arithmetic growth of my writing were inconsistent with an ambition to be exhaustive As such therefore I have concentrated on particular areas of behavioural economics and bounded rationality The resulting book is laid out as follows Chapter 1 provides an overview of the rest of the book goes through some basic definitions and identifies themes

**Handbook of Contemporary Behavioral Economics** Morris Altman, 2015-01-30 At a time when both scholars and the public demand explanations and answers to key economic problems that conventional approaches have failed to resolve this groundbreaking handbook of original works by leading behavioral economists offers the first comprehensive articulation of behavioral economics theory Borrowing from the findings of psychologists sociologists political scientists legal scholars and biologists among others behavioral economists find that intelligent individuals often tend not to behave as effectively or efficiently in their economic decisions as long held by conventional wisdom The manner in which individuals actually do behave critically depends on psychological institutional cultural and even biological considerations Handbook of Contemporary Behavioral Economics includes coverage of such critical areas as the Economic Agent Context and Modeling Decision Making Experiments and Implications Labor Issues Household and Family Issues Life and Death Taxation Ethical Investment and Tipping and Behavioral Law and Macroeconomics Each contribution includes an extensive bibliography

**Artificial Intelligence and Economic Analysis** Scott J. Moss, John Rae, 1992-01-01 This important book presents new and original work at the frontiers of economics namely the interface between artificial intelligence AI and neoclassical economics

Artificial Intelligence and Economic Analysis focuses on three quite distinct lines of AI orientated research in economics applications intended to extend neoclassical theory applications intended to undermine neoclassical theory and applications which ignore neoclassical theory in the quest for new modelling techniques and fields of analysis The contributors all of whom are well established in the field do not simply report established results but seek to identify those areas where the science of artificial intelligence could enrich standard economic analysis It includes material from mainstream economists who are willing to express their own views about the limits of mainstream economic modelling and AI based economic modelling The book makes an important contribution to a new and exciting area of economics which holds much hope for the future
