New Directions in Group Communication Lawrence R. Frey, 2001-11-12 New Directions in Group Communication takes as its mission the setting of the agenda for the study of group communication in the future. It does so by presenting work that scholars have not previously explored in the current small group communication literature. Part I focuses on new theoretical and conceptual directions both presenting new views and extending current positions. Part II examines new research methodologies while Part III looks at antecedent factors affecting group communication. Parts IV and V of the text provide insight into both group communication process and practices. Part VI covers different group communication contexts including communication patterns in top management teams. An excellent companion to *The Handbook of Group Communication Theory and Research*, this volume sets the direction for future study for students and scholars alike.

Group Identity Fabrication Theory Robin Kurilla, 2023-07-28 To date there has been no comprehensive and coherent approach to determining the communicative and precommunicative processes involved in the construction of group identities The present study fills this gap by developing a unified theoretical foundation that can be used to capture empirical construction processes Moreover it contributes to the domain of group communication research It creates a basic theoretical riverbed that provides a conceptual foundation for the conception of inter and intra group communication which does not take its starting point from objective categories but from de facto socialization processes In addition the architecture of an innovative social theory is presented using the example of the construction of group identity which satisfies the demands of epistemological interests in communication studies and possibly also in other disciplines **The Handbook of Group Communication Theory and Research** Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08 The Handbook

of Group Communication Theory and Research establishes a central resource for the field documenting and synthesizing the work done in group communication's 50 year history. With contributions from the most experienced and respected scholars in the field, the editors Lawrence R. Frey, Dennis S. Gouran, and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices. The volume is divided into six broad areas of communication scholarship: Foundations of group communication theory and research; Individuals and group communication; Task and relational group communication; Group communication processes; Group communication facilitation; Group communication contexts and applications. The sections serve as a crossroads where various paths pursued in each area meet, summarize, and suggest new maps and roads that need to be followed in the future. Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars, this important resource will be an unrivalled tool for scholars, researchers, educators, practitioners, and students alike.

Group Communication in Context Lawrence R. Frey, 2005-05-18

The study of group communication has never been more critical as recent national and international events point to the fragility of group life. An emerging perspective, the bona fide group perspective, offers hope for improving group communication for it recognizes that any group—a family, community group, expedition team, social support group, organizational work group, interorganizational collaboration, or international team—must be studied and understood within the multiple contexts in which it is embedded and that significantly affects who is considered to be part of a group, what occurs within that group, and how that group interacts with other groups. In the second edition of his award-winning volume, editor Lawrence R. Frey showcases original research studies conducted on and about communication in bona fide groups, demonstrating the conceptual promise of the bona fide group perspective as realized in research practice. Divided into six sections, the chapters cover a wide range of new or relatively understudied groups, including youth, community, groups, Internet support groups, climbing, expedition groups, families, neighborhoods, and school boards, and demonstrate the wealth of methodological approaches that can be used to study bona fide group communication, including survey methods, interviews, textual analysis, content analysis, participant observation, and discourse analysis.

Group Communication in Context: Studies of Bona Fide Groups, Second Edition shows that the bona fide group perspective has the power to transform our thinking about groups and group communication and in time, the practices in which groups and group members engage. The volume is intended for use in group communication courses as well as a reference for group scholars. It is also appropriate for classes in psychology, social work, counseling, sociology, anthropology, and related disciplines.
