Witness Tree Lynda Mapes, 2017-04-11 An intimate look at one majestic hundred year old oak tree through four seasons and the reality of global climate change it reveals In the life of this one grand oak we can see for ourselves the results of one hundred years of rapid environmental change It s leafing out earlier and dropping its leaves later as the climate warms Even the inner workings of individual leaves have changed to accommodate more CO2 in our atmosphere Climate science can seem dense remote and abstract But through the lens of this one tree it becomes immediate and intimate In Witness Tree environmental reporter Lynda V Mapes takes us through her year living with one red oak at the Harvard Forest We learn about carbon cycles and leaf physiology but also experience the seasons as people have for centuries watching for each new bud and listening for each new bird and frog call in spring We savor the cadence of falling autumn leaves and glory of snow and starry winter nights Lynda takes us along as she climbs high into the oak s swaying boughs and

scientists core deep into the oak s heartwood dig into its roots and probe the teeming life of the soil She brings us eye level with garter snakes and newts and alongside the squirrels and jays devouring the oak s acorns Season by season she reveals the secrets of trees how they work and sustain a vast community of lives including our own The oak is a living timeline and witness to climate change While stark in its implications Witness Tree is a beautiful and lyrical read rich in detail sweeps of weather history people and animals It is a story rooted in hope beauty wonder and the possibility of renewal in people s connection to nature
