mixed and reflects the fact that there are a number of mechanisms involved that interact with each other to produce opposing results The book highlights the theoretical underpinnings behind the inherent contradictions and shows that the final outcome depends on a number of country specific factors such as the nature of non traded goods factor endowments technological and institutional factors Thus though not exhaustive the book integrates FDI within most of the existing economic systems in order to define its much debated role in developing economies A theoretical analysis of the different facets of FDI as proposed in the book is thus indispensable especially for the formulation of appropriate policies for foreign capital
